Thread: [\[PICS\]\[TUT\]New Spreading Method! \[Extreme Details\]](#)

Kikarian - March 14, 2011, 1:02 pm

Everything In this tutorial was made By DeadlyStealth! Do not Leech!

Introduction:

In this Tutorial I will explain a new Way of spreading VIA Deviantart.com. for people that don't know what Deviantart is, it is a very popular website where people share their art. But you can also share Windows theme's wallpaper, GUI's (General User Interface). We will be doing a little way that I know that is using Rainmeter.

Tools Needed:Server

Binder (Needed the Most)

FUD (Fully undetectable) Crypter

Why do we need this you ask? Having these tools will increase the chance of getting more slave's/Victims, if you have a UD (Undetectable) Crypter that will also work, but please don't expect the same amount of slave's/victims as someone with a FUD Crypter.

Let's crack on with the tutorial.

Step 1:

Go to www.Deviantart.com

Then Create an Account.

Then follow these Steps on the left hand side:Customization

Skins & Themes

System Monitoring

Rainmeter

Picture Tutorial:Spoiler [\(Click to View\)](#)

Step 2: Now go a few pages down (Go to the next page a few pages in) and where not alot of people go like page 231 or something like that. Now, click an Image of your choice copy the image and description, and then on the right it should say "Download File." Or another way is to find rainmeter skin that alot of people like then download (Copy the Image that you see). then rename it to V3.0 New Version, you get the gist don't you?

Picture Tutorial:Spoiler [\(Click to View\)](#)

Step 3:

After the download has finished you should have a server ready if not or you don't know how to

make a server there are many tutorials here. Now get your FUD Crypter and Crypt your server, Then Bind your File to the .exe it should have some green icon if it doesn't try and re-download or find another one to download.

There is no picture for this because every one will be different as we won't have the same Crypter/Binder.

Step 4:

Now after Binded and Crypted re-zip the files and then upload to DeviantArt then for the title name it the same as the one you downloaded from but change to v3.0 Or something like that. I.E: I download a rainmeter skin called "Simplicity" and then I will make the title for when I upload it to "Simplicity V2.3" or something.

Then as the Category:

Customization

Skins & Themes

System Monitoring

Rainmeter

Well that's it really.

Using this method I have currently got 240 Rat Victims and I am always Gaining more rapidly.

Do Not Leech Made by Deadlystealth, this took 2 and a half Hours to make!

Thanks

That nice..

Be carefull when downloading something from deviant..xD

btw,what binder u use?

doudouBM - March 14, 2011, 2:05 pm

Yeah you smart guy, good method and tutorial. Thanks!

@d4rk_m4n™: Viotto Binder is easy, quick and free (miss the icon change)

milo1 - March 28, 2011, 7:00 am

cool idea i will try it later

Kikarian - March 28, 2011, 7:07 am

Thank you. And I am sure you will get unsuspecting slaves. HaHa

StaTiX - March 28, 2011, 7:19 am

hell

this actualy has some potential

thanks op

Kikarian - March 28, 2011, 7:54 am

Waaa? you had no faith? :P Ye it's a good way to get Victims..

SIM-701256 - March 31, 2011, 6:04 am

fucking great tut!

got over 100 downloads!! :D

Kikarian - March 31, 2011, 3:40 pm

That is really good to know, but I'm am not responsible for what you do or what happens.

Mk28 - April 7, 2011, 9:48 am

Nice tutorial. Works like a charm if you're FUD and you bind correctly.

derrik - April 7, 2011, 9:53 am

Seen this before, but nice anyway.

Crotex - April 7, 2011, 10:20 am

Trying it right now. I'll post results. Thanks for share anyways!

paulos - April 7, 2011, 10:27 am

Thanks dude - Nice TUT.

- Keep up the good working :D

Inventor1 - April 7, 2011, 12:00 pm

Disserne - April 9, 2011, 5:21 pm

Bookmarked and I'll definitely use it later

Bark™ - April 9, 2011, 5:34 pm

Nice... Now I just need a FUD crypter and im ready =D

Decker - April 9, 2011, 6:03 pm

Where are the exe files that are supposed to come with these? I've downloaded about a dozen Rainmeter RAR/ZIPs and they're just a bunch of folders/pictures, no executable files to bind a RAT to. Am I missing something?

Even the one used in the OP seems to have no exe in the zip/rar

akshaybz - April 9, 2011, 6:15 pm

Oh boy...i was in love with deviantART...but you spoiled the party....but stilll,thanx for the method ?

A great tutorial, if I was l337, I'd + rep you. Good job dude, keep up the good work.

niddhoeggr - April 11, 2011, 3:51 pm

Dont have a FUD crypter at the moment but tried anyhow, thanks !

DJ Pauly D - April 11, 2011, 4:17 pm

I'm going to try this out now, thanks a lot for sharing :].

Doonsoldier - April 11, 2011, 5:05 pm

lol like deviantart doesn't have enough crap on it already. Just another reason to never go to the sight.

Unless your planning to do this of course... HeHe

lorens13 - April 11, 2011, 6:26 pm

Great tutorial,gonna try this tomorrow.Thanks for sharing it:)

Ghost? - April 11, 2011, 7:33 pm

Could anyone point to a binder for rmskin and exe, if that's what we have to do?

Anyways, thanks for the tut!

Also, this method has been started to become detected as this notice has been posted on the Rainmeter site:

Quote:There has suddenly been a rash of uploads to deviantART.com, in the Rainmeter area, of skins which are simply copies of an existing deviation with a virus added. These can be identified by the fact that they have comments disabled, or have some comments "hidden". PLEASE help us to help you. Read the comments for any skin you are tempted to download from deviantART.com. On the right of the deviation, near the bottom, there is a section for "Statistics". The first item in this is "Comments". If they are "Disabled", or when you look at the deviation there are any "Hidden by owner" entries below it in the comments area, DO NOT download this skin.

ihasdevkit - April 19, 2011, 10:57 am

great, i use that site alot...

Doggie! - April 19, 2011, 12:03 pm

Not bad acctually...But its not that new...Its just a way of spreading...Server, Crypter, Binder, WinRar and there ya go...

My sugestion is warez...And not some popular site cuz there ppl. reply really quick and you cant get enouf victims...

brothaxkilla - June 2, 2011, 8:16 am

Wow...nice tut bro...must been very hard work.
nice sharing,,

Kikarian - June 2, 2011, 8:44 am

Thanks man,

I'll be releasing another tutorial either today or tommorow on a different matter. So make sure to keep checking my threads. ?

Any more comments from anyone.?

Iron m@n - June 30, 2011, 7:59 am
