Thread: >>>>> NEVER PAY FEES AGAIN || PAYPAL TO BTC 1:1 OR MORE || REVOLUTIONARY METHOD <<<<<

Sword - *February 3, 2019, 6:44 am*

I have a method to use PayPal to buy BTC at 1:1 OR MORE. Meaning Less Paypal for More BTC (UP TO 20%!)

It may take some time, but no more than 2-3 days!

You will never get scammed using this method because it is 100% safe.

It does not include localbitcoins, paxful, hiribi, or any low quality method

Price: $30

Autobuy Link: https://selly.gg/p/a2f4f04e

I'll give out one vouch copy, why not.

This has been given to CreativeDot

Hint: This method is VERY new. I came up with this method on my own. It would not have worked 2 weeks ago even if you fully understood the method and wanted to try it. I will sell only a few copies so this does not get saturated.

It's a good method and profitable aswell.
Thanks for the vouch.

"I purchased this guide and this is my honest review.

Ebook 0/10
Well, this doesn't even come with an ebook, OP literally copy pasted a 5 line message to me which is the entire guide.
3 of these lines are not even actualy sentences.

Grammar 7.8/10
There were barely any words so can't really put much on the grammar side of this guide.

Guide 2/10
In all honesty this is far overpriced. I would personally only pay $5-$10 for this. It's very silly and

honestly not worth buying.
OP mentioned that he wants to increase the price over time which is absurd. All in all the method would work but the profits will be nowhere near impressive. I would say this method is public since honestly I'm 100% CONVINCED that anyone on this forum knows about this.

Support 8/10
Can't really say much about support as I am not even going to try this method. It's absurd and not worth the money. OP is friendly so that's a plus.

Conclusion
Don't waste your money, I'm not trying to salestrash OP, it's just the truth. He also mentioned that the profit is not guaranteed (worst case scenario you make your money back).
However instantly after reading this I knew that this would be quite a waste of time. Can it work? Yes. Is it repeatable? If you find an idiot that allows you to repeat it. Is it scalable? Honestly I would not say so, the more money you try to do this with the longer it will take.
I'm convinced this method is not a matter of hours but can take upwards of a few DAYS before you even see any return.
By the time you've made the $65 back you'll be in for atleast a while unless you instantly drop a lot of money and are lucky as fuck to find people who will let you perform this method.
My advice is to drop the price to ATLEAST $30.

Thanks for reading

EDIT: OP got mad after readingthis review, either he can't handle criticism or doesn't want the truth to be out there. He went as far as to report my post. As far as I'm concerned I should be allowed to leave an honest review as a client, unless you only want fake vouches of course."

That's a review from a previous customer so beaware. :)

Not sure what you're upset about, but you can't rate my grammar or support by comparing my service to another member. People are going to get the wrong idea from your post, especially because you didn't quote it. Not sure why you're telling me I'm getting mad, but okay. Thank you for sales trashing though.

I've warned you don't sell this for such a high price and stick to cheap Bytes payments.
According to most the method simply aint worth so much.

I have decided to drop the price down to $30. Please stop using my sales thread as a form of communication.

Welp. GLWS OP and er... yea

Edit: OP gave me a negative popularity for sales trashing. DWC as i did nothing to sales trash the thread.
