Thread: [How To: Change Your Servers Icon \[VIDEO TUTORIAL\]](#)

danbirk - March 15, 2011, 2:02 am

In this thread I will teach you how to change your server or any exe files icon.

Start of by downloading ResHack from the link below.

<http://www.softpedia.com/get/Programming/File-Editors/Resource-Hacker.shtml>

Its from softpedia.com so it aint backdoored or any shit like that.

Now install it, I won't explain any further on that, since I guess you know how to install a program yourself.

If you want a package with loads of icons to use, then download from the link below.

<http://www.multiupload.com/1SNM3DUULC>

Its a win7 icon package.

Credits to some guy here from hackforums. I don't remember hes name.

To get the nude girl icon, download this pack.

<http://www.multiupload.com/VBFH4A9NZR>

Video Tut on YouTube:

[Video: <http://www.youtube.com/watch?v=9FWRfQbitWo>]

The tutorial with text and pictures:

Spoiler ([Click to View](#))

1. After installing, run ResHack as admin.

2. Now go to File> Open, or press ctrl+o.

Look at picture below.

3. Now choose your file, mark it and press open, As shown on picture.

4. Now it should look like the picture below. If not, then redo step 4 and 5.

5. Go to Action> Replace Icon.

6. "Press Open file with new icon..." and then go to the icon you want on your file, choose the icon and press "Replace"

7. Now ResHack should look like the picture below if you done anything correctly.

8. Go to File> and then save to your desired destination.

I choose Desktop.

A picture of the final product.

To change your servers icon into the same I have on my pictures or any other icon, look at the guide linked below.

<https://hackforums.net/showthread.php?tid=1130774>

Krayzie Bone - March 15, 2011, 2:05 am

LOL i like the icon xD haha

danbirk - March 15, 2011, 2:06 am

The reason why i choosed a nude pic is because i want it too look like a picture, will have a little guide rdy in 5mins of how to change a servers extension into .jpg, ,avi , .mp3 or whatever :D

Krayzie Bone - March 15, 2011, 2:07 am

Ye i know good method for infecting ppl on like Yahoo or chat room even though there most likely pedo's

Azido - March 15, 2011, 2:18 am

It is very old but it still works..

Thank you!

danbirk - March 15, 2011, 2:24 am

@ DJandLIMON111 , yea its awesome for spreading on msn or chats, just act like a girl, and tell them its a nude pic haha :D

@ LIUZ, yes its kinda old, but i couldnt find any tuts on it :D So i decided to make a quick one.

Krayzie Bone - March 15, 2011, 3:21 am

Rated 5 star's for a good tut

danbirk - March 15, 2011, 3:27 am

(Mar 15, 2011 03:21 AM)DJandLIMON111 Wrote: [\[CITE\]](#) Rated 5 star's for a good tut

Thanks for it ;)

Appreciate it :D

amg64 - March 15, 2011, 3:32 am

wanna try it bro,thanx ^_^

danbirk - May 29, 2011, 3:53 am

Thread has been updated.

Now with video explanation.

Whole new layout, new links and text.

Ejoy!

TheOnePhreak - June 2, 2011, 4:33 pm

Thanks dude Works fine!

Btw love the icon!

Boxing - June 2, 2011, 4:35 pm

worked for my rat server, thanks ;)

danbirk - June 3, 2011, 4:46 am

(Jun 2, 2011 04:35 PM)Boxing Wrote: [\[CITE\]](#) worked for my rat server, thanks ;)

Im glad I could help :)

Good luck spreading m8.

Loop - June 3, 2011, 5:06 am

Great tutorial, thanks a lot. ;)

thanks for the comment :)

And im glad you enjoy.

!Ghostly! - June 29, 2011, 3:25 pm

doesn't work for my keylogger, but there aren't any maps like icon showing up at the left when i open my file either. So i guess you can't change anything that isn't their?

danbirk - July 2, 2011, 3:24 pm

Im not sure I understand what you mean.

Leave me a PM if you need help.

serpico_190 - July 5, 2011, 2:51 pm

Cant get it to work for my cybergate rat, when I change the icon the rat stops working. Anyone got any advice on what i'm doing wrong?

danbirk - July 5, 2011, 3:28 pm

I got no idea, sorry.

IVe had this happen to a friend of mine too.

Nothing I could figure out :/

Dropout Bear - July 5, 2011, 3:35 pm

Thanks, ill need this later, if i dont buy a crypter with all those options

danbirk - July 22, 2011, 7:24 am

Im glad you like it bro :#

Enjoy!

Mr Sarro - July 25, 2011, 8:11 am

The file that I change the icon to, does it have to be either .exe, .dll, .res or .ico extension? I just wanted to add a normal .jpeg pic. D:

danbirk - July 29, 2011, 5:03 am

It has to be a icon file ;) so you nees to convert your jpg pic into a .ico

brotkillian - July 29, 2011, 11:19 am

whatched the vid 2 times cus of the song :DD

danbirk - July 30, 2011, 10:31 am

Im not sure what the problem is here.

What OS are you working on mate?

Eladictococy - August 16, 2011, 10:46 am

very nice tutorial about how to change server icon thanks for this bro

danbirk - August 17, 2011, 4:13 am

No problem mate ?

Im glad you liked it and found it usefull.

ComX - August 21, 2011, 5:38 am

Nice tutorial and made by friend Danbirk ? He totally was in my girls dream :D

ne3bi^^ - August 21, 2011, 7:20 am

a good tutorial frend.thanks.i'll download now :)

McCoy - August 21, 2011, 7:23 am

thanks ! was really easy and worked cheers bud

danbirk - August 21, 2011, 2:21 pm

@ne3bi^^, no prob :D

Download what?

@ McCoy, yes it does work :D No problem.

Lycus - August 21, 2011, 2:32 pm

Can't get it to work... could it be that the server is encrypted and that the icon can't be changed because of that?

danbirk - August 23, 2011, 9:39 am

(Aug 21, 2011 02:32 PM)PutteMulle Wrote: [\[CITE\]](#) Can't get it to work... could it be that the server is encrypted and that the icon can't be changed because of that?

Are you on win7?

PM me for troubleshooting.

suleman - August 24, 2011, 3:47 am

changing icon of server is a good idea... but we need to make if fud also

danbirk - August 24, 2011, 5:03 am

(Aug 24, 2011 03:47 AM)suleman Wrote: [\[CITE\]](#) changing icon of server is a good idea... but we need to make if fud also

Get a crypter.

Problem solved.

Or just get a fud malware program.

-Revolution- - August 24, 2011, 6:29 am

Thank you !

Good tutorial !

Helped me out a little !
