Thread: MRR + PLR selling techniques

faustussss - *February 6, 2019, 8:28 am*

I’m just curious, does anyone know how to make cash with PLR + MRR? I just downloaded a huge file of MRRs and PLRs, feel free to PM me if you have any useful info! ?

Even tho you have the files already the first step is to make sure you have a high quality PLR package. You need to take it as it is as well as take some topics from it or faq's. Basically you're going to take your topics you pick and you are going to make a video, or some type of presentation in general explaining these topics thoroughly. You don't want to make your videos or presentation long as we are going to make the customers pay for the full video. So make your video/presentation and then use a software to cut your video to where it will only show a certain length of the video or presentation. At the end of your short video or presentation link the customers to a website to where they have the option to buy the full course.

If your PLR package is not high quality you can forget about it because there are thousands of people doing this.

Gotcha, thanks for the advice! I'm still new to making and using them, but it looks like a good source of passive income.
