Thread: [Ectoplasm infecting other members with my rat, USING JAPAN EARTHQUAKE TO MAKE PROFIT!!](#)

Inspector Gadget - March 15, 2011, 12:37 pm

FUCK SAKEE

ectoplasm asked me to infect someone for him so i sent him my direct link blah blah.. turns out the member is from hack forums (he hasnt come back on sice i found out)
i swear he keeps sending my virus to other members is there anything i can do to stop him doing it ?

I cant post proof here as its all im pms on hack forums, i will get the user to come on here and reply in this thread.

He claims its fine as the member got his account + facebook pages back so he dosen't owe me, yet i asked the user and he hasn't got it back at all.

So basicly hes infected a member, scammed me + hacked a members facebook pages.

He is using a facebook page that was made to support japan to scam donations and spam it with shit to make money with.

Tell him to stop? And delete the victims..

If it's on fileave, remove it. Just uninstall the people you get, this is a pretty dick move by him. Here comes more E-Drama, he will be saying he isn't the one doing it, you will say yes he is, but nothing will happen due to both lack of evidence.

Also, I didnt even get logins to who ever hes talking about.

If you have proof post this in the [Rules, Announcements, News and Feedback Section](#). Then it will attract the attention of staff if he has been infecting other members. I would expect this off Ecto though.

Inspector, Once he comes on, staff can check the time difference of people. Also check PMs where I did not say he was from HF and did not know. Your the one with the rat, Your the one with logins not me.

Also, This is a fail attempt IG.

Just by that post right there you seem pretty guilty.

H??????a X™ - March 15, 2011, 12:48 pm

This isn't going to settle anything, you both have no proof so far. You can PM staff with proof, if you have any. All this thread is doing so far is going back and forth, back and forth. Lol, just lock this thread and have staff deal with it. ._. The members won't be able to say who is wrong or right.

This dude wanted rsgp and kept telling me that on MSN. This one day then there was this dude I didnt like and told him to see if you can get his shit. He ended up giving me his FB only. Then this guy wnated something on his fb which he aint getting. I told him i hooked him up with the dude who has the bills.

Then now, hes trying to get me banned by saying this guy used HF. How am I supposed to know we never used his HF login. I also doubt this dude was active or even had posts.

this is going to staff for scamming + infecting other members i do have proof.

averageuser - March 15, 2011, 12:56 pm

Both users probably have a tendency to lie. OP is most likely just trying to take revenge on EctoPlasm for something completely unrelated to the matter, and I wouldn't be surprised if EctoPlasm is infecting members here. Yet in the end, neither of these scumbags will get any punishment due to a lack of proof. This will be a back-and-forth argument with no end, and no resolution. Junk the thread and move on OP, you're wasting your time.

Scamming, wow k.

Infecting? He said he didn't know the guy was on HF + stop bullshiting, if a guy is maybe registered on HF but doesnt actively use it, and he gets RATED/keylogged its not against the rules as in "infecting other members"

Solution is simple, firewall the guys IP and it wont show on your RAT anymore.

So basically.. its ok to infect hf members?

scam?

then deny it all and try make the innocent one look like a douche?

Hes blatantly lied his ass off to me by saying its fine the user got his facebook back, i just asked if the fanpage was back and he replied no he hasnt got it back, according to ecto the owner phoned fb and got it back.

either way whats to stop him (a rep trusted member) spreading more and getting me in shit.

I would be grateful if this happened to me... Only if it wasn't HF members. Just uninstall all of the new servers you got and remove the file somehow? I don't know if you want to upload it to VirusTotal because your stub will be detected...

So try to send an eMail to the hosting site with your link saying it's a virus? That might allow them to remove the link via violating the ToS? That's all I could think of.

Good luck ;]

2. Link to the thread in question if it exists where you may have been scammed.
3. Search Scam Reports area for any existing threads with the scammer. Search by username and also uid. If everyone adds the users profile then UID will be very effective.
