Thread: [Source + Release] Vanilla Rat v1.6 - Advanced Rat Coded In C#

VelvetCoding - *May 13, 2019, 9:02 pm*

Full Description:
Vanilla Rat is a remote administration tool coded in C# for Windows. It is stable, simplistic, and designed for ease of use. Vanilla Rat uses the Telepathy TCP networking library, Costura.Fody DLL embedding library, and dnlib module reading and writing library.

Features:
- Remote Desktop Viewer
- File Browser (Including downloading, drag and drop uploading, and file opening)
- Process Manager
- Computer Information
- Hardware Usage Information (CPU usage, disk usage, available ram)
- Message Box Sender
- Text To Speech
- Screen Locker
- Updater
- Live Keylogger (Also shows current window)
- Website Opener
- Application Permission Raiser (Normal -> Admin)
- Clipboard Text (Copied text)
- Chat (Does not allow for client to close form)
- Audio Recorder (Microphone)
- Process Killer (Task manager, etc.)
- Remote Shell
- Startup

Update Notes:
Hey guys! To start the v1.6 update notes, I would like to say, I am still working extremely hard on this program. I will not be ditching it anytime soon. Before I list off some of the things that were added in v1.6, I would like to ask for your assistance. Please keep the feedback and constructive criticism going, I am totally open to it, and it's part of the reason that I have gotten so far with Vanilla. In this update, I worked mainly worked on two new features, this was the client updater, and the remote shell. I deeply apologize for all who had to find some way of updating their clients with the file browser. I also added a remote shell for all those super geeks. Another smaller addition I made was the addition of the cursor in the remote desktop, this will add a little bit of CPU usage, however this is completely worth it, because it is incredibly annoying trying to locate the cursor. I also fixed some issues with the file browser, which included, limited upload and download sizes, and upload not working on v1.5. Please note, I accidentally messed up the client menu, and I had to redo every single button on the menu, please report any issues with the menu to me over PM. As a last note, I am trying as hard as I can to add requested features, however, I also need to release other features at the same time to prevent issues (an example of this is the client updater). Thank you for keeping this project alive, Hack Forums members! This has, and still is, the largest learning curve I have ever experienced in this amount of time.

Releases: https://github.com/DannyTheSloth/VanillaRAT/releases

Demo:

Edit: As always, just for you, Vanilla.

duplex - *May 14, 2019, 6:58 am*
Oh damn, you don't disappoint, very HQ.

trippye - *May 14, 2019, 7:16 am*
Looks good!
What version of .NET does this require on target PC?

foxnot90 - *May 14, 2019, 8:09 am*
dam thanks for sharing,Hq post

That feature is not currently added, it is planned for v1.7 ;)

Arianasdad1 - *May 14, 2019, 7:13 pm*
if anyone can help me set this up i can pay you i dont understand how to do everything or im doing it wrong because when i open the vanilla rat program and try to build it gives me an error.

Vagabundo Legendario - *May 14, 2019, 8:49 pm*
startup is not working for me, good work

Vanilla - *May 14, 2019, 8:52 pm*
Lol these always crack me up. Nice release

ping010101 - *May 15, 2019, 10:50 am*
that is HQ release, Please keep on the good job! Thank you!

rilch - *May 15, 2019, 1:28 pm*
as said in previous comment. startup feature is not working.

Good news! Vanilla has been patched! Check out the Github repo for the new release. (Thanks to NYAN for pointing out the mistake)

CypherZero - *May 17, 2019, 12:48 am*
Nice work on this project, will help lots of people in learning some stuff.

LordDragon - *May 17, 2019, 2:46 am*
Which crypter should you recommend for this product?

baodao1984 - *May 17, 2019, 3:18 am*
does not grab email n pass of victim but work fine. which crypter is good for this rat. any help

VelvetCoding - *May 17, 2019, 2:31 pm*

Google has fixed its password vulnerability, as of right now, you can't do that. Sorry!

DoktorWulff - *May 17, 2019, 6:25 pm*
Are there any rats I can use for Iphones?
Also with live keylogger, etc.

SIMPR - *May 17, 2019, 8:21 pm*

I've tested this and its fully operational i vouch that this is a stable and high quality app

Sybyl - *May 18, 2019, 7:38 am*
This is just stunning HQ stuff, keep the good work man, if you need some help let me know!

naxster - *May 23, 2019, 4:43 am*
Looking good!!
Is it possible to make the target framework to 2 or 3? Or does it only work for framework 4? :)

VelvetCoding - *May 23, 2019, 6:56 am*

I would have to check the functions to make sure nothing is specific to 4, but IG I can try. It does seem pretty standard at this point for Windows machines to have 4 included in their service packs, but if you are talking about use for Win 7, I will be happy to try.

Thank you! You are the best! :D
Yes I was talking about Windows 7, since their default .NET framework version is 3.0 :)

The thing is that not many people (in this case Windows 7 users) knows what .NET framework even is, so they don't bother to update to the latest version.
That's why I like to use RAT that have .NET framework compatibility 3.0.

So, update on the .NET situation. Sadly, I could not downgrade to 3.5, because it broke the network library, which would have been the hardest to redo. What I will do, Is I will implement .NET version checking and make sure it's updated before the RAT starts ;)

That's actually a feature in VS itself, you can set it to where it will install whatever .Net framework is required.

Didn't even notice! Thanks for pointing that out.

Renegade007 - *May 27, 2019, 3:42 pm*

.NET huh ....I have a problem with dependency

gerwin888 - *May 27, 2019, 4:26 pm*
Ok so a really noob question: I have everything set up (I think), I have a paid crypter, so how can I RAT friends for learning purposes of course? Do I send them the stub or?

Edit: Ok I am further now I have the stub now installed on my pc, how can I spread it for learning purposes to lets say my friends network to test it there?
I am right now just playing with it on my own pc but i want it to be on my friends pc for learning purposes.

Why don't you just ask them to test it for you lol, I must really hate those friends.

kaku1019 - *May 29, 2019, 7:35 am*
Hey can anyone guid me how to step up this rat

gerwin888 - *May 29, 2019, 8:13 am*

I keep losing my slaves after ~5 minutes using Vanilla RAT

Why is it? Is it because its a free RAT? What am I doing wrong?

VelvetCoding - *May 29, 2019, 10:36 pm*
(May 29, 2019 08:13 AM)gerwin888 Wrote: [CITE] I keep losing my slaves after ~5 minutes using Vanilla RAT

Antivirus may have caught it, it is not FUD. It could also be due to crashin if they are not on Windows 10, because it's target framework is 4.6.1.

FrostyRR - *June 8, 2019, 2:52 am*
Could anyone help me with the Build section on the application?

inkredibleandy1 - *October 30, 2019, 10:15 am*
Hi, I would like to see how this product works as I am interested
