My diet is fine, I'm losing weight from that alone right now, just need to supplement with exercise. As I said, take too many off days. I'll be fine lol

multiply by 2.2 for kg to pounds
cm divide by 100 to get to meters and then multiply by 3.3

You can just type "kg to pounds" on google then you'll get instant results. But, I'm glad that someone can still convert it without using Google ?
