Thread: ($10) Grand Theft Auto Online - Account Modding Service - GET BILLIONS - ALL UPGRADES

Takehito Morokuzu - *July 30, 2019, 9:00 am*

For just $10, I will add any amount of:
Money (Currently limited to 24m, limitation of cheat at the moment)
RP/Levels
Upgrades
To your account. I can mod both Social Club and Steam accounts!

I will accept Bitcoin, Ethereum, and other crypto currencies!
If you do not have any of those, I will also accept Steam and Amazon US and UK gift cards!

So, How does this work?
Start a contract using the button below, send your login details for the social club or Steam account, once I accept the contract, send the $10 in the currency of your choice. Once I receive the $10, I will add $2 billion to your account, level you up to Level 500, and upgrade everything. Of course, you can specify any option you want, if not specified this is what I will upgrade.

I highly recommend changing your password before sending it to me, and changing your password again once completed.

Hey there, glad to see these sort of services are still alive. I run one myself but on an alternative website. Now that I've seen this I don't want to post here and ruin the business, hopefully, you get some more reputation and get some more sales! Goodluck

Just for PC, I do not own a console so I cannot mod this. However feel free to message me if you have a PC, I can make a pre-modded account for you ?

Takehito Morokuzu - *August 2, 2019, 7:15 am*
This service is still active, anyone who buys today will get 50% off! So $5 for any upgrades, any amount of money and any amount of level. I will also add all weapons so you don't have to buy them manually.

I'm pretty new in modding stuff. So,
a) How long will this take?
and b) Is there a risk of getting banned or do you only use legit methods?

kind regards,

i have alot of experience on gta and i know that 10$ is a rip off what he is doing is called a recovery EVERY mod menu has a recovery option ur gunna buy it for 10 $ then but a mod menu its not worth 10$

even free mod menus have a recovery obviously more risk but if ur gunna pay 10$ then get a 10$ mod menu it should be safe for recovery and more modding fun

Sure you can. But free mod menus are very risky, and so are most paid mod menus, I use a mod menu that is designed to be safe. not one person who has used this menu has gotten banned.

ozzy - *August 9, 2019, 9:43 am*

like i said 10 euro mod menu is probably enough for a safe one but u can always put an extra 10 for a life time mod menu with infinite recoverys a good one is wardens its around 25 euro and has a really good rep i dont know theres multiple sellers for it

Sure. But can you stop posting on my thread if you are not interested in purchasing, this is my service and I can charge what I want. I offer 50% off to anyone who wears my signature. So you I can do this for $5. And any buyer can come back later and ask for another recovery or if they want anything else.

Currently rockstar have increased their anti cheats, so this service is temporarily postponed until the cheat has become undetected. I can let you know when it is ready again.

When the cheats are undetected, the ban risk is very low.
However all cheats will become detected at the same time, meaning we need to wait until they have been updated and are safe to use again.

You can exchange paypal for bitcoin/ethereum on places like Coinbase (recommended) or localbitcoins.

Because I am under the minimum age for PayPal, even if I verified my ID I would be banned.

Also bitcoin is safe and easy to use, coin base makes it very easy to buy bitcoin within a few minutes.

Yes but it is very unlikely. None of my customers have reported any bans, and I have been using it myself on my account for months, and I have not been banned. To be safe I would personally use an alt account, in case you have any important on that account. (you will be banned for 1 month if it does happened and your account will be reset)
