How To Make Your Keylogger FUD 100% Without Crypter/Encryption!!!

Hello every one!

1.First off all u need to download a keylogger(in my opinion Repzo or Decay you can find here in HF)tested!...and build your server.

2.Download a binder (i using ?Binder? its newest)

link: <http://www.mediafire.com/?udvma5226vy82d5>

scan on NVT:

<http://vscan.novirusthanks.org/analysis/508eceab4c9fb250324a77e3365d9fb2/YmluZGVyLWV4ZQ==/>

3.select one small(kb) program of your choise..i using using the "fear.exe" is the zompie girl from tha MAZE game(if click it appears in your monitor with clasic screaming sound::D

link: <http://www.mediafire.com/?2t72257dsd6ixae>

scan on NVT:

<http://vscan.novirusthanks.org/analysis/0ff293d1e2dd8f84cfa97dcc8805f473/ZmVhci1leGU=/>

3.Bind it!Bind your server and fear.exe(at your option) together!

Done!!!!go scanned is realy 100% FUD!! have fun with your slaves!!

PM me if u need something!

p.s for enybody:DO NOT SCAN ONLINE the best and easy unlimited way is bs scan(blakshades scan):

<https://hackforums.net/showthread.php?tid=834815&highlight=bs+scan> (need acc but is easy)

Have Fun!!! thnx!

link for Repzo logger here:

<https://hackforums.net/showthread.php?tid=677807&highlight=repzo+logger>

link for Decay logger here:

<https://hackforums.net/showthread.php?tid=941247&highlight=decay+logger>

rapidfire08 - March 19, 2011, 7:45 am

G0od One Thanx F0r This Its Really Helpful Great Share ;)

supa - March 19, 2011, 7:46 am

Ill check although im suspicious.

giviker - March 19, 2011, 8:07 am

nice one bud...its FUD ..

vagatron - March 19, 2011, 8:12 am

(Mar 19, 2011 08:07 AM)giviker Wrote: [CITE](#) nice one bud...its FUD ..u welcome!!! now get some vics!!:)

T3eS 2 - March 19, 2011, 8:23 am

GOING TO TRY THIS MATE....

NICE SHARE..

AnonSpirit - March 19, 2011, 8:44 am

this isnt like fud it only bypasses 9 antivirus
but god work mate

(Mar 19, 2011 08:44 AM)AnonSpirit Wrote: [\[CITE\]](#) this isnt like fud it only bypasses 9 antivirus but god work matedoes the best job ever!!!

all here searchig for crypters and searching and searching

this is real easy way to make servers undetectable!!

thnx bro!

giviker - March 19, 2011, 9:20 am

i dont hope some noobs will make it be detected

vagatron - March 19, 2011, 9:27 am

(Mar 19, 2011 09:20 AM)giviker Wrote: [\[CITE\]](#) i dont hope some noobs will make it be detected i hope this too...

but it FUD for now!....

Poukaz - March 19, 2011, 9:34 am

Thnx you, i dont hope some noobs will make it be detected =/

giviker - March 19, 2011, 9:43 am

did it make them urself????...

chris305 - March 19, 2011, 9:52 am

Don't scan on nvt even with the box ticked it still send your file. Don't scan at all only skids do that.

vagatron - March 19, 2011, 9:54 am

(Mar 19, 2011 09:43 AM)giviker Wrote: [\[CITE\]](#) did it make them urself????...

the TUT yes!

the keylogger and binder its not my!

just bored to searching one month for FUD and free crypters!

i test this method and he works Great!!!!

Ghoster - March 19, 2011, 9:55 am

Anyone know how to stop the Decay logger? Tested on myself and getting tired of the logs coming in of my self -.-

chris305 - March 19, 2011, 9:55 am

Btw is this runtime too or only scantime?

(Mar 19, 2011 09:55 AM)Ghoster Wrote: [\[CITE\]](#) Anyone know how to stop the Decay logger? Tested on myself and getting tired of the logs coming in of my self -.-

Lol fail. Well try checkin your windows dir and application data. Also scan with emsisoft and it will probably detect it.

vagatron - March 19, 2011, 10:00 am

(Mar 19, 2011 09:55 AM)Ghoster Wrote: [\[CITE\]](#) Anyone know how to stop the Decay logger? Tested on myself and getting tired of the logs coming in of my self -.-

- 1.LoL!!
 - 2.ctrl+alt+delete
 - 3.task manager
 - 4.find the name of your server
 - 5.right click to see where runing
 - 6.delete for task manager and delete from file that runs!!
- :)

giviker - March 19, 2011, 10:01 am

yea..he is right never scan online scans...it will always be sent....put it in the main topic vagatron

vagatron - March 19, 2011, 10:04 am

both my frined!!!

i make it yestrday i uploaded in yt and and today i bored to block infected victims!!!! its working great on sturtup!all working good!

thnx

(Mar 19, 2011 10:01 AM)giviker Wrote: [\[CITE\]](#) yea..he is right never scan online scans...it will always be sent....put it in the main topic vagatron
yes sure....i find the best way to scan!!!! ;)

Ace of Sp?des - March 19, 2011, 10:06 am

Why the hell would you use such a file as fear.exe for it?

1) I am against RAtIng but, I will take your point of view here. It is alarming your victims and making them aware that they are infected.

2) What if someone young and/or fragile, such as an 8 year old runs it? How would that make you feel?

vagatron - March 19, 2011, 10:17 am

(Mar 19, 2011 10:06 AM)Ace of Sp?des Wrote: [\[CITE\]](#) Why the hell would you use such a file as fear.exe for it?

hi friend....i dont use this name for my server!!lol!

fear.exe is the file to bind with server!!!after that i reanme and change icon to server!!!! :)

Ace of Sp?des - March 19, 2011, 10:21 am

Yes, but the result is still the same. That girl popping up screaming, no?

vagatron - March 19, 2011, 10:34 am

(Mar 19, 2011 10:21 AM)Ace of Sp?des Wrote: [\[CITE\]](#) Yes, but the result is still the same. That girl popping up screaming, no?

if take the file and run it...who's care?! :)

with a infection gift and a startled!!! :)lol...

Ace of Sp?des - March 19, 2011, 10:37 am

Did you even read my first post? It makes the victim alert that something od happened. He will know or at least suspect that he is infected. I'm just trying to take your point of view here. What I really care about, is that the file might really scare someone, because you do not know who is going to run it. It might be an 8 year old or someone with a weak heart. People like you make me hope that the Hindus are right about karma.

MaDk1oWn - March 19, 2011, 10:41 am

Nice one, I may try this out on a few peeps. Thanks for the share:D

vagatron - March 19, 2011, 10:50 am

(Mar 19, 2011 10:37 AM)Ace of Sp?des Wrote: [\[CITE\]](#) Did you even read my first post? It makes the slave alert that something od happened. He will know or at least suspect that he is infected. thnx for this..its ok if the links get deleted etc just just tell me and we will re-upload again!
thanks for the advice!

DragQueen - March 31, 2011, 11:28 pm

this is bulshit Why ?

bcz the binded file will drop into some directory
and than one sec later AV will jump and remove it
So instead this methood do somwthing better
like good crypter So its clean in Scan and its not drop
to local HD only to memory

DannyX - March 31, 2011, 11:47 pm

Very Nice,Going to Try.

[To Short]

vagatron - April 1, 2011, 7:50 am

(Apr 5, 2011 04:21 PM)Ghoster Wrote: [\[CITE\]](#) This works in the way of scans, however, the second they open it, it is detected.

my friend i know waht are u mean...BUT..i try it man times in the past and still i have many many slaves from this!!...some times yeas...i heard that is virus...

but its good way to try...(set antis on myour keyloggers)! and keep going!!! :)

PinkSugar - April 5, 2011, 4:49 pm

i doubt this will be runtime FUD

vagatron - April 5, 2011, 4:53 pm

(Apr 5, 2011 04:49 PM)Shakur tupac Wrote: [\[CITE\]](#) i doubt this will be runtime FUD

i have many of slaves with this method!realy my friend...some times find as virus...

the bind method is for bypass NOT for encryption..etc!

u can try it btw :) thnx!

if u want more clear & fake.exe to bind it with our .exe just PM me....

:) thnx!!

s3v3red - April 5, 2011, 6:05 pm

(Apr 5, 2011 04:49 PM)Shakur tupac Wrote: [\[CITE\]](#) i doubt this will be runtime FUD

of course it wont, because a binded file (unless using runpe) will drop the second file (your virus) and then run it. But if your binder uses runpe to run the second file then it should be FUD runtime for a little while.

vagatron - April 5, 2011, 6:22 pm

u can try it...

Hapomen22 - April 10, 2011, 1:57 pm

Hey vagatron, I followed the steps and sucessfully binded the server with your .exe file. And I tested in my other pc, I checked Task Manager and the .exe with the name I gave to it was there.

But I don't get logs sends to my gmail, why is that ? I choose to send the logs in interval of 15 mins, but I don't get nothing ! The email test made was correct, and I got the test message in my inbox.

I hope you can help me ! + rep :)

vagatron - April 10, 2011, 3:03 pm

lol and u?!...u are motherfucker...but i dont tell to anybody....

if u dont like it...go to die bitch!! :D

(Apr 10, 2011 04:21 PM)syabrembo Wrote: [\[CITE\]](#) hehe,nice work "vagatron"..^_--
thnx my friend!.... :)

i working to reFUD one crypter...just wait.. ;)

for some stupid troll noobs!!!!...this is NOT a crypter!!!

JUST bypassing AV's!!!!

if u usins some UD keylogger/RAT u can do great job !

thnx!

(Apr 10, 2011 04:17 PM)Mr.Kewl Wrote: [\[CITE\]](#) How how many months it will remain FUD?
my brother i using this method 2 month a go and still 2-3-4/33

thnx i love u :P

Hapomen22 - April 10, 2011, 4:35 pm

So anyone can sort out my issue please ? I guess I'm not to far away from making this thing to work, so some help would be much appreciated. As I said, my .exe file seems to work (I binded fear.exe (I know I could've taken something else) with my server.exe of course), the file executes itself, the MAZE zombie girl appears, and the .exe appears in Task Manager exactly as I named it (Mozilla Firefox Update 3.8), some BS that doesn't seem suspicious. Still, I don't get logs ? So what do I do wrong, anyone could be enough kind to help me out ? I used Rapzo Logger v 1.5.

(And no I'm not a noob, I've been around HF for almost a year, it's just I didn't bother to post)

ps : I added you on msn vagatron.

vagatron - April 10, 2011, 4:45 pm

lol!...ok but what type of hack u need....my tut is for fud keylogger!
if u want to "hack" u need an RAT...

on HF u can find free good rats..like darkcomet,cybergate,spynet etc etc....

for this u need RAT(of course) +portforwarding+one good crypter to crypt yours shit)(your .exe server) and then u have to spread it to your friend!

look at rats TUT's or on youtube...have many TUT's

i hope thats help!! :)

thehardway - April 11, 2011, 5:33 pm
is this still FUD

2Short

SWEET_GIRL - April 11, 2011, 5:46 pm

u cant close/stop/pause AVG u must unistall it!!! :(

bro here is 5:00 at morning...i can help u tomorrow!!really..
just download tv (teamviwer)

thnx and gn!

knistad112 - April 11, 2011, 11:03 pm

i mean i sende a key logger to my freind and used rapzo keylogger and i when i maked the programm and and tryed to start it i needed a program to open it that i can see my friend screen not teamviewer i want to se his screen

Hapomen22 - April 12, 2011, 11:19 am

Yo vegatron, yesturday I finally succeeded to receive logs to my gmail. And I was right, to get the logs sent, you need .net framework. I infected myself on my laptop (which had .net framework), and I received the logs after 15 mins ! I cured myself after and everything was alright. But I need to make my server FUD, it is only 50% now ! I desperatly need it to be FUD, you know, it's a little surprise for my bro's ex gf haha. (We already reverted her FB 6 times last summer, and now we wanna go a little bit further)

So can you help me mate ? Maybe you have a FUD crypter for me ? Or do you have any good fud crypting tuts to share ? Thanks anyways !

vagatron - April 12, 2011, 2:04 pm

(Apr 12, 2011 11:19 AM)Hapomen22 Wrote: [\[CITE\]](#) Yo vegatron, yesturday I finally succeeded to receive logs to my gmail. And I was right, to get the logs sent, you need .net framework. I infected myself on my laptop (which had .net framework), and I received the logs after 15 mins ! I cured

yo bro!!!...if u search and find some new keyloggers can be more UD...i dont have FUD crypter!now i try to refud one!...but if u want u canr buy one..or u can send our server to crypt it..cheap!...look around...i think u can find with 50 cent etc...

?

Hapomen22 - April 12, 2011, 4:25 pm

Yeah, that's my plan. I think I'll get a private crypter, do you have any suggestions for me ? I know they remain FUD for a long time and it's worth the money :P After that, I think I'll go make a RAT lol.

x-iPleasuRE - April 12, 2011, 4:49 pm

Wow.. Never thought of this, I binded my file AND crypted it - ___ - didn't know that crypting was unnecessary..

vagatron - April 12, 2011, 4:53 pm

for my opinion..stop use keyloggers and try to learn how to using DAMN RAT'S :))))

u dont need keyloggers! :)
i using blackshades but isnt free(40-50-60\$)....
u can find on search darkcomet or cybergate(the best free)
then u can buy own'z or cobra crypters!!!

go to see some TUT's...RAT's is the best thing!

?

And you're going to make it worst by scanning it on virus total.
Next time use <http://vscan.novirusthanks.org/>

killermx - July 5, 2011, 10:08 am

Tested it detect ASAP exexute.

bad-antics - July 5, 2011, 10:12 am

thanksagain vouch 100% right on br0

Zeon - July 5, 2011, 11:08 am

No, it'll FUD it for sure, but whether it corrupts your server or not is a completely different question.

FartByDick - July 5, 2011, 12:05 pm

(Mar 19, 2011 07:39 AM)vagatron Wrote: [\[CITE\]](#) How To Make Your Keylogger FUD 100% Without Crypter/Encryption!!!

Hello every one!

1.First off all u need to download a keylogger(in my opinion Repzo or Decay you can find here in HF)tested!...and build your server.

2.Download a binder (i using ?Binder? its newest)

link: <http://www.mediafire.com/?udvma5226vy82d5>

scan on NVT:

<http://vscan.novirusthanks.org/analysis/508eceab4c9fb250324a77e3365d9fb2/YmluZGVyLWV4ZQ==/>

3.select one small(kb) program of your choise..i using using the "fear.exe" is the zompie girl from tha MAZE game(if click it appears in your monitor with clasic screaming sound::D

link: <http://www.mediafire.com/?2t72257dsd6ixae>

scan on NVT:

<http://vscan.novirusthanks.org/analysis/0ff293d1e2dd8f84cfa97dcc8805f473/ZmVhci1leGU=/>

3.Bind it!Bind your server and fear.exe(at your option) together!

Done!!!!go scanned is realy 100% FUD!! have fun with your slaves!!

PM me if u need something!

p.s for enybody:DO NOT SCAN ONLINE the best and easy unlimted way is bs scan(blakshades scan):

<https://hackforums.net/showthread.php?tid=834815&highlight=bs+scan> (need acc but is easy)

Have Fun!!! thnx!

link for Repzo logger here:

<https://hackforums.net/showthread.php?tid=677807&highlight=repzo+logger>

link for Decay logger here:

<https://hackforums.net/showthread.php?tid=941247&highlight=decay+logger>

OMG !!! REALLY WORKS O__o

Reticulum - July 5, 2011, 7:46 pm

Next time use <http://vscan.novirusthanks.org/>

So? I'm not going to download a infected file... I'm not retarded.

Zeon - July 6, 2011, 2:04 am

(Jul 5, 2011 07:46 PM)xxridgexx Wrote: [\[CITE\]](#) So? I'm not going to download a infected file... I'm not retarded.

Allow me to say, you ARE retarded. Virus Total distributes malware samples so that in half an hour your previously FUD malware is detected by every antivirus on the planet.

!Hacker! - July 8, 2011, 9:40 am

nope, didnt get a single log

GodlyPro - July 8, 2011, 10:05 am

Can anyone please explain me what FUD means? Im kinda new here xD

Lucifer Morningstar - July 9, 2011, 1:06 am

(Jul 8, 2011 10:05 AM)GodlyPro Wrote: [\[CITE\]](#) Can anyone please explain me what FUD means? Im kinda new here xD

Fud means Fully Undetectable, next Fully Undetectable means that every anti-virus will not detect the "real virus".

When you make a trojan, you go FUD it and you're anti-virus will not detect it and remove it.

Hope you understand now :)

opx1230 - July 12, 2011, 11:14 am

thanks nice work keep it up

silent101 - July 13, 2011, 11:21 am

thanks .. nice .. great tut

necromonger26 - July 13, 2011, 11:57 pm

nice tut...gonna give it a shot

hackeye - July 14, 2011, 1:26 am

fud is always 100%.

otherwise it's not fud.

and some people don't trust .exe files.

but nice way to do it.

zak07 - July 14, 2011, 2:39 am

nice tut...gonna give it a shot

Monkeyboy - July 14, 2011, 2:37 pm

nice tutorial dude.. thanks..

xLuCkiE - July 15, 2011, 11:33 am

it UD not FUD its 2/5,, scand it on novirusthanks

innocentboy - July 17, 2011, 7:47 am

avast detect fear.exe as virus !

cool => youre time saver :D

MegaHackerOne - July 17, 2011, 7:55 am

going to try, if this works, I owe you a country

innocentboy - July 17, 2011, 8:01 am

<https://sites.google.com/site/goodvsbad292/mobile-utilities/22-11-2011.zip?attredirects=0&d=1>

i did this! it was undetectable tx

pk7415369 - July 21, 2011, 3:23 pm

Thanks Man !! Works Great ! !

vagatron - August 5, 2011, 4:54 pm

thank u all bros!!! have fun!!

lolris21 - August 13, 2011, 6:04 pm

is fear.exe the file that is whats blocking the anti-virus?

If I use leexpress bind fear.exe & Emissary keylogger.exe will this work?

Is the fear.exe file or can I make my own?

I`m going to use Emissary

Sample - August 14, 2011, 4:33 am

maybe yours tutorial is good for newbies (only) :P ??

0 /43 (0.0%)

this is my server!!! ;)
does the best job ever!!!
all here searchig for crypters and searching and searching
this is real easy way to make servers undetectable!!
thnx bro!Fucking noob scanned it on VT.... 0/43 = VT

This isn't FUD anymmore anyways.

Black Shadow - August 14, 2011, 5:10 pm

I am 100% sure this will only be scantime fud not runtime.

ripclaw90000 - August 14, 2011, 6:36 pm

great! and thanks for the (blakshades scan) link. Im looking for the best offline multi-AV scanner.
and havn't seen this one yet

vagatron - August 27, 2011, 2:41 pm

(Aug 13, 2011 06:04 PM)lolris21 Wrote: [\[CITE\]](#) is fear.exe the file that is whats blocking the anti-virus?

If I use lexpress bind fear.exe & Emissary keylogger.exe will this work?
Is the fear.exe file or can I make my own?

I`m going to use Emissary
fear.exe bypassing av's and make more easy to spread your logger or ypur bot!the bind method is very good to make servers more UD!

alfonzo1955 - August 27, 2011, 3:24 pm

This is not FUD, FUD is both runtime and scantime. This is only scantime unless the binder does not drop.

vagatron - August 27, 2011, 3:51 pm

(Aug 27, 2011 03:24 PM)alfonzo1955 Wrote: [\[CITE\]](#) This is not FUD, FUD is both runtime and scantime. This is only scantime unless the binder does not drop.

ok...take some new UD kaylogger bind it and try it to yourself!!(with your AV on of course)

Iron m@n - August 27, 2011, 5:45 pm

Nice one ...bro Keep it up!

?

Abdulious - August 27, 2011, 6:27 pm

Thanks bud it works :) great tutorial + rep.

h4kr! - August 27, 2011, 7:14 pm

being FUD?it depends on how infamos the code is.and some dont work after doing that!

vagatron - August 27, 2011, 7:15 pm

thank you all bros!!i hope to help again soon.. :D

Blakhacker - February 9, 2012, 2:34 pm

Hey , on virustotal.com it scanned the server file and proved that it can be detected by antivirus.
You asshole give some other trick to make keylogger fully undetectable.

Alex4747 - February 9, 2012, 3:28 pm

thanks for the post, very useful,
giviker youre right

nitrox95 - June 18, 2012, 7:54 am

How you do this? I have never been able to get anything FUD...
Searched everywhere, please help someone, I'm getting frustrated...
thanks!

HostQuick - July 31, 2012, 11:54 am

LOL THE FEAR.EXE IS HER KEYLOGGER/RAT.

herrdeutschland - July 31, 2012, 5:16 pm

hey dudes or ubbers can u explain for us how this server becomes fud by binding 2 exe s together
please

i m really confused

iP0d - August 1, 2012, 8:45 am

works perfectly.. i think its detected now.. damn noobs

ch3micalburn3d - August 1, 2012, 9:23 am

sorry but it isn't fully undetected ,But i guess you could update us with a better method if you have one . thanks for sharing anyways

Austerity - August 3, 2012, 5:49 am

Thanks for sharing this bro :) Will try it out sometime.

l4rr1p0tt3r - August 3, 2012, 10:21 am

Thank you for the post,I will try later ^^

(Feb 9, 2012 03:34 PM)Blakhacker Wrote: [\[CITE\]](#) Hey , on virustotal.com it scanned the server file and proved that it can be detected by antivirus.

You asshole give some other trick to make keylogger fully undetectable.You're the idiot and the asshole. You're the reason why it is detected... You DO NOT SCAN FILES ON VIRUSTOTAL.

Any one, how to make .exe fud with hex editing, I tried editor to find signature, but its look so hard..and if any vb source for crypter plz,,,I surely try this hope it is FUD...

marcusx - *May 8, 2013, 5:27 am*

thanks but not 100% FUD.

Excelent tutorial :)
