Thread: Play any Battle Royal mobile game with keyboard and mouse

Dys-functional - *October 8, 2019, 12:47 pm*

This is not a hack tool, script or anything that will result the ban. With this service you will simple mirror your android screen to PC, with key mapping. Without emulator, without installing any Android based OS. Just install this simple app on your Windows PC.

Requirements:
-Windows PC
-Mobile app that you can download from Play Store
-Windows app that you can download from link

Screenshots:

PM for download link. VIP members will get direct link and regular members will get survey link.

I'm goin to test this, thanks for the post

h34rtl3ss - *October 17, 2019, 12:18 pm*

can't pm can you send link?

Pochino - *October 19, 2019, 4:39 am*

hit me up dude :) looks good

Prince™ - *October 20, 2019, 3:06 am*

Sending you a message now to get the link.

JordRiddle - *October 20, 2019, 4:28 am*

are you sure this is not tencents emulator?

This is a mirroring software with key mapping feature, so you can see your smartphone screen on big screen with option to control it from PC keyboard or mouse, perfect for gaming.
