iGlitch - March 20, 2011, 12:30 pm

EctoPlasm wanted to do a trade with me, i wanted a custom facebook application script and he wanted a update on my fan pages ! he told me the script was hosted on his sever, it was a runscape site and it was using some java application. it installed some sort of a keylogger on my computer and he went on my fb and stole my fan pages!

so if EctoPlasm could please give my pages back i would be happy!

heres how i know its him !

what's up with all those Ectoplasm threads lol, anyways this isn't evidence to get him banned since first of all it's off site, and Staff can't look at links that were provided off-site.
