the render should be brought out more, the way the smudge is on her head and left arm makes it look sloppy. i like the subtext but the main see through text with stroke doesnt work. needs some lighting and darken the edges. the smudge settings should be varied. not just one continuous stroke

6.5/10

Koi's a smudge pro now? Its a stock not a render XD

You've over blended the focal, your lightsource is on the wrong side lol & use a different smudge brush this ones ugly lol

no smudge pro. i cant smudge, i dont recognize the stock so i did not know, however it doesnt mttter either way, like u said its ugly, the smudging needs different variations blah blah blah

Horrible smudge

Horrible splatter

Horrible text

Work the render, fix her light.

Asatru - March 20, 2011, 5:47 pm

The background needs some work other than that 8.5/10.

Good effort, but you haven't done much to it other than smudging the edges outwards, try to use filters and gradient maps, as well as c4d effects, one thing I do like is the text, keep it up 5/10 from me :)

you youngins should watch a movie call blue lagoon 2 milla is in it shes about 17 and she is fucking SEXY (and you catch a glimpse of her boobs/booty)...oh cool sig :)

EDIT: Apologies for not leaving an appropriate response, i didn't see the requested format.

5/10 - based on: The background is way to simple IMHO. I think you could have really gone crazy, I just like to see people really challenging themselves...I also think the little brushes that i believe are little light overlays around your focal image are a little intense and random...but, the text is diamond.

^ LoL, I like the comment you made there before you talked about the signature. Anyways pseud0 is a graphics and web design god from what I've seen so far.
