[+] See all

Extremely Fast and Efficient Defragmentation Enhanced

Using IObit's latest defrag engine and the new "Boot Time Defrag" technology, Smart Defrag 2 has not only the world's fastest defragmenting speed but also the most advanced defragmenting ability. It's been specially designed for modern, large hard drives, which eliminates the long waiting time.

Designed for Top Disk Performance Enhanced

Smart Defrag 2 doesn't just provide simple defragmentation. It also streamlines your file system, places the frequently used files and directories into the fastest area of the disk, enabling your computer to run at top speed with the most stability.

Always-on Automatic Defragment Enhanced

Smart Defrag 2 works automatically and quietly in the background, so it continually and constantly keeps your computer fragment-free.

"Boot Time Defrag" Technology New!

Smart Defrag 2 is using a new "Boot Time Defrag" technology which allows you to defrag files during the system boot process, while these files cannot be defragged or are not safe to move after the system is already boot-up.

The download is via CNET which is a very reputable site, so a scan report is not warranted.

Anyway, @the op, I don't use tools of this nature, but will check it out for informative purposes.

Thanks.

IObit is rogeware.

They are a commercial company which feeds off copying others. They make inferior products and their malware removal tool actually got worse from Version 1 to Version 2.

The only good software of theirs is the game booster, and all it does is disable a few components, I suggest you stay away from this product and use Defraggler, and CCleaner from <http://www.piriform.com> for the lighter optimization.
