Thread: [CUSTOM] Occult's Tor/Onion Domains

Occult - *January 12, 2020, 2:54 am*

If you're interested in starting a Tor service or simply want a custom domain for your site, this is the place to get them! I offer a variety of lengths and quick turnaround times.

Tor domains use the entire English alphabet and numbers 1-7. The longer the custom characters in a domain, the longer it takes to create and the more expensive it will be. This is reflected in an exponential increase in price. The majority of domains will have a turnaround of less then a day.
6 or less custom characters (ex: canada2akxhp7glq.onion) $5

7 custom characters (ex: hacking2kxhp7glq.onion) $7

8 custom characters (ex: academic2xhp7glq.onion) $10

9 custom characters (ex: education2hp7glq.onion) $50

10 custom characters or more Price on request.

There is a 10% discount when using Monero.

Terms of Service + More information.
Spoiler (Click to View)All sales are final.

Prices are in USD and are non negotiable. Payment is made through BTC, BCC, Monero, or ETH at the current market price at the time of the sale.

I only communicate through PM's on Hackforums.

You must go first unless the order price exceeds $50 (before discount.) In that case we can use a middleman if requested.

If I believe that your order is unfeasible I reserve the right to deny it.

You will be provided with an RSA key. I expect that you will know how to set it up yourself but I will provide assistance (relating only to tor domain configuration.)

The characters following your custom characters are COMPLETELY RANDOM. I have no control over them.

Vouches

Since it has been a while since I've been on HF and it looks like rep got reset, I'm willing to give out one 6 or less character domain to a trusted user upon request. Please either reply to the thread or PM me.

Service is available and I am still looking to give out a vouch domain to a trusted user.
