Telegram Group Scraper
| Install In Termux | No Root Required |

What is a telegram group scraper?
Telegram Scrapper Can Collect All User Information From A Group & Saves It To members.csv.

You can use this in any way you want like promote something with bulk sms to all , or add them all to group ("add2group.py" is still in devlopment i will complete it before 10 December)

Begin by watching the video.

Important: the tool used in the video is version 1, but you should download version 3 (latest at the moment) on Github.

See the #How to install and use section on Github.

[Video: https://youtu.be/I8oR9tuYyrU]

API setup

Go to http://my.telegram.org and log in.

Click on API development tools and fill the required fields.

put app name you want & select other in platform Example :

copy "api_id" & "api_hash" after clicking create app (will be used in setup.py)

How to install and use

$ pkg install -y git python
$ git clone https://github.com/th3unkn0n/TeleGram-Scraper.git
$ cd TeleGram-Scraper

Install requirements
$ python3 setup.py -i

Setup configuration file (apiID, apiHASH)
$ python3 setup.py -c

To generate user data
$ python3 scrapr.py

(members.csv is default if you changed name use it)
Send Bulk sms To Collected Data
$ python3 smsbot.py members.csv

Add users to your group (in development)
$ python3 add2group.py members.csv

Update tool
$ python3 add2group.py members.csv

?

Nice tutorial, good to know about this app.
Although the topic tile is a bit misleading.
