Thread: [Free Mathematics Help For Everyone](#)

Sine - March 21, 2011, 2:27 pm

Don't really know if someone is interested^^

but if you have problems with maths or need sth to solve
simply ask me in this Thread ?

I will try my best (I am quite sure that I will solve at least 90% of your questions)

The only case where I can't solve them is:

1. It is maths at a very high university-level or
2. You are not able to question me correct, or I am not able to understand you correct

(I will help you with your maths-PROBLEMS, but I am not going to make your daily
maths-homework)

Hope I can help someone with my offer ?

Headshot_x - March 21, 2011, 6:33 pm

thats why theres calculators..

Teleport - March 21, 2011, 7:19 pm

Ugh I'm getting a headache
 $478 \times \pi / 5896 + w(7598549)$
 $W = 5785000$

xMontage - March 21, 2011, 10:05 pm

Melted Oreo, that's yours
43957605965000.25
