JG Wentworth brings you a new, great program; JGW Steam Guard Bypasser!

Steam Guard is complete trash; I had it enabled on my account, and upon trying to log into it on my laptop, it asked for a confirmation from my email. For 30 minutes I waited for the email, and it never came. In that 30 minutes, I encoded the appropriate .dll's to ignore Steam Guard prompts and force login. Now, I bring this program to the public, whether or not you use it for legitimate purposes or for stealing steam accounts.

INSTRUCTIONS

- 1.) Un-rar to the steam folder
- 2.) Overwrite the files
- 3.) Simply login to steam, and all steam guard messages will be bypassed!

Hydra - March 21, 2011, 5:22 pm

Ok, How the hell do I decrypt 3DES? Wanna gimme that code and I'll decrypt the rest myself.
Thanks!

??h™ - March 21, 2011, 5:28 pm

This program is AWESOME, but the noob protection is a little weak. :P

Edit: My bad, misread. 3DES is impossible to crack. I recomend giving up...

It bypasses steam guard, so you can log into the account EVEN IF it has steam guard enabled.

Also I posted virus scan on the main post at the bottom.

Swagmaster - March 21, 2011, 5:47 pm

i tried this and it actually works thanks

Steam out with a new pile of shit feature? - why do they insist on feeding crap down our throats?...I don't even want to use that piece of shit service, but since most PC games has to be used via it...Well it's a dead end:(

=CyBeR= - March 22, 2011, 12:46 pm

dave3 - March 22, 2011, 12:56 pm

did u overwrite the files?

ExoMemphiz - March 22, 2011, 1:31 pm

Please either give a different encryption, or give us the key for Triple-Des decryption..

It is impossible to decrypt it without the key used for the encryption..

lawlz0r - March 22, 2011, 1:41 pm

wow nice. i will check this. didn't know there was a new update to steam...

jgwentworth - March 22, 2011, 1:44 pm

Still works with the new steam update today.

BobsBees - March 22, 2011, 1:45 pm

James Wilson M.D - March 25, 2011, 1:16 am

The noob protection is working,very effective against anyone without a huge bank of super computers.

Funny how nobody "high up" says that it is working,everyone that has is a low post person and joined in March 2011.

Dark_Skript - March 25, 2011, 2:47 am

I'm trying to unpack these files into steam folder and it prompts me to enter a password. I've tried the passwords given...what exactly am I supposed to put here? Help very much appreciated.

Just got out of prison and checked if this bypass is still working, and it's working even better with the new protections Steam put in place! My self-amorphing code really puts in work even 5 years later. Just make sure to get the .dll fix
