Everyone is saying it's 10/10 and that it will get crazy amount of sales over the next 5 years, you can look at the reviews, 10/10 on Steam and 92% on Metacritic so you definitely wouldn't waste your money.

Most VR games can be played like any regular game but you'll have to do some research for this one, I don't know for sure. I wouldn't recommend getting it without VR, you'll be missing on tons of features and it'll feel like some Indie shooter.
