Thread: [\[TuT\]\[PICS\]Viewing Source Codes Of An Defacet Site\[TuT\]\[PICS\]](#)

AnonSpirit - March 23, 2011, 11:55 am

Hi so today im going to show you how to:

1.View the source code of an defacet/hacker site + HD PICTURES ?

i know that many people know about this "trick" and many dont so thats why i did make a little tut on how to do this + PICTURES IN HD?

[img]http://img863.imageshack.us/img863/4165/letsstartsmall.jpg[/img]

Ok first we will open your web browser:

[img]http://img851.imageshack.us/img851/9967/pic1x.png[/img]

and then we will find a defacet site if you dont know any click [Here For Sites That have Been Hacket By GALAXY](#)

when you open you deface site just click CTRL + S or go to files ---> save as,...

when you will do this a pop out will come like this one below

[img]http://img716.imageshack.us/img716/2033/screenshot3ms.png[/img]

make sure that you save it as a TXT format!!

when you will save it as a xxx.TXT you will se a little icon in the ,... like here

[img]http://img825.imageshack.us/img825/1682/screenshot5gu.png[/img]

so now you are technely done now be free and open the TXT file :

[img]http://img41.imageshack.us/img41/7917/screenshot8h.png[/img]

so this is basically everything you have to know about this i hope that you enjoyed my little tut ?

Here is the test deface ive just "made" modifet from d3m0n

<http://professorfunkilu.cwahi.net/>

[color=#483D8B]oh yea be free now and add your own codes to it ?

DO YOU LIKE MY OS-OPERATION SYSTEM COOL RIGHT YOU CAN GET IT FOR FREE BY CLICKING [HERE](#)

Is that Ubuntu on Virtual box or on your main PC?

AnonSpirit - March 23, 2011, 11:57 am

Yes it is but and its on my main PC

Oh, well great tutorial :) Keep it up :D

Maradonnie - March 23, 2011, 12:04 pm

What kind of operating system are you using? Looks awesome.

AnonSpirit - March 23, 2011, 12:09 pm

WWW.UBUNTU.COM ITS FREE OPEN SOURCE AND YOU IF YOU USE WINE YOU CAN RUN ANY WINDOWS PROGRAM THERE

placeholderda - March 23, 2011, 12:13 pm

View > Page Source

You're doing it wrong. No right click necessary. At all.

MadBlob - March 23, 2011, 12:27 pm

Its also possible to add "view-source:" before the url in Chrome/Mozilla.

Example: view-source:https://hackforums.net/

Micce - April 15, 2011, 10:21 am

najs tutorial keep it up :P
