Thread: [SQL Exploiter Pro v2.15 :: The best sql injection tool](#)

sql_dare_devil - August 4, 2009, 2:12 pm

Hi everyone,

This is the latest release with new functions and improvements. Now hacking websites with SQL Exploiter Pro v2.15 is as easy as 1-2-3. Real and Pro hackers are simply going to love it for how easy and organised it is. The SQL Exploiter Pro v2.15 makes sql injection so simple that even novice or beginner hackers can hack shops with it. The SQL Exploiter Pro v2.15 can hack CFM, ASP and PHP exploits as well as download MS access databases of exploitable sites.

SQL Exploiter Pro v2.15 is also the best for MYSQL PHP and Syntax Error hacking. It has five parts:

The URL Extractor:

The URL Extractor uses query in such a way that your IP is not blocked by google since it uses another search engine linked to google:

The Attacker:

The attacker gets the tables, columns and their data from CFM, ASP and PHP sites.

The Database:

The database saves all hacked sites and you can easily access the hacked sites whenever you need them. Hidden some of the website in the picture. Can't give real shops for free, hahahahahhaaaaa.... :lol:

The Syntax Error Hack:

The Syntax error is the most difficult and time consuming type of hack. it is very easy with SQL Exploiter Pro v2.15.

The MYSQL and PHP Hack:

SQL Exploiter Pro v2.15 is great with MYSQL and PHP hacking. Can get tables and columns of MySQL version 5.

DAM!

Got to the site too late...

Too many downloads, link disabled...

Might as well download it from another site...

The only reason the links don't work is because this thread is three days away from being three years old.
