Thread: Coder that can help setup Bustabit V1

fknhippie - *August 14, 2020, 1:31 pm*
Hi.

Looking for someone who knows how to setup Bustabit V1, I have the source files for the setup all ready to go.

I am looking for something affordable, let me know.

Do you have a domain n host or vps
You need root access for permissions

Hello, yes I do it's just a matter of setting it up which I am a bit confused, I tried to do it but no luck

Just literally looking for someone that knows how to configure via the console to install what is needed and what not
