Thread: [\[FASTEST ONLINE?\]=> -= VANDALLISM #1 YOUTUBE BOT®=-\[Comment Rater!\]+\[Many Features\]<=](#)

Grants - March 25, 2011, 5:13 am

There is currently no better or faster bot on HF! And this is true, you can check that by watching this video, or checking speed of other bots and then check this one.

[Video:

http://www.youtube.com/watch?v=EXtYKHZytwk&feature=plcp&context=C38db0b5UDOEgsToPDskINTqHk_DT1TqVHsCttJpV_]

Why is this bot different then others?

There are a lot of differences between this bot and other youtube bots around internet.

First off this youtube bot is using API's. That makes this youtube bot a lot faster then using ordinary web browser.

Currently, as i checked on hf, all youtube bots are actually using webrowsers, and its speed actually SUX!

Since it will take you around 20secs per 1 account to LOGIN-Comment/rate/sub-SIGNOUT.

With the API's, the bot will do 50 accounts in 20 secs.

The speed is main reason of course since many people will use this bot for their youtube services online and this is fastest way and with quality you could choose to do it. For features list take a look down here and you will see what this bot actually posses beside SPEED.

lets bet that this is best bot on HF.. except that spk's one, it has more options(mostly useless options which are easy to add) but this one is actually faster.

So you can keep laughing but you will never be able to make something like this :D.

Vouch for Dorde, done deals with him in the past, all went fine :).

dCrypt - March 25, 2011, 12:21 pm

Holy shit that rates fast, I just done 100 dislikes in a matter of seconds where as my old bot would take over an hour. That's crazy, I highly recommended this to anyone, you can make a lot of money with one of these bots. Definately worth \$30, easily.

I wish you good luck on your sales, now i understand how SpK's bot was so successful.

I am more than happy with your bot i'll even advertise it in my sig for a while.

10/10, I'm sure this will go far.

Best Regards, dCrypt.

(Mar 26, 2011 05:44 PM)TheEnd-cR Wrote: [\[CITE\]](#) Will there be proxy support & the ability to mass-view videos? I'd buy it if you had those features.

once there is a proxy each different account gives 1 view. SO if u have like 100 accounts, you will get 100 views.

THats not the problem adding the proxy, i already have it on my old youtube bot, so i can just pass it here, but problem IS many customers couldn't find a proxy that goes with youtube, so it was pretty useless for them.

Ra?e - March 28, 2011, 6:32 pm

Awwhh man i'd love this but 30 is abit steep "/

Grants - March 30, 2011, 12:43 pm

my friend gave them for test use only, since i really don't have a lot utube accounts myself. i just wanted to show the speed with 50 accunts.

And about the price, no 30\$ isn't much. There are only 2 bots like this online, the other one costs 50\$.

With this speed, no chance its too much.

around 10-13 minutes..

a bot which uses a web browsers would do it around 10-15 hours. :D

Wrong.

Twitter had the same holes in their system, and once I had succesfully released the first twitter bot ever that used their api's to post tweets, they removed static authentication, and you are new forced to use oauth, because of the scale my software was used on.

Youtube will do the same, if I release a youtube bot that would use the api's.

Since you aren't such a good seller, and will never reach the amount of copy's required for youtube to actually take action, you are safe.

But if a smart person would release one, it will only work for a few weeks.

That is why I cancelled my big project.

Please learn before you speak. ?

you can do that with proxy, the point is that my youtube bot is using apis, and if i add proxy, speed won't be the same..

And last time i added that option on my older version of bot, people were crying how they can't find proxy that accepts youtube..

Looks like he coded his own API which is 50% faster than the API itself. Check this thread for more info: <http://www.blackhatworld.com/blackhat-seo/youtube/295158-youtube-all-one-tool.html>

He also got a avatar changer, comment obfuscator, and other stuff.

If you include the avatar changer in this one, before his gets released, I will buy this and agree with what you said. But before you've done that, don't bash on better coders.

A HUGE vouch for Vandallism bot guys. Get this right now :). I think the colors don't look that great, I would probably make it black/blue (but who cares). This API bot is fucking amazing. Don't get any other booster, especially not those \$5 bullshit things made out of public sources. This is extremely fast and reliable, and "Dorde" is really dedicated into perfecting it.

And guys stop asking it supports proxies or includes YT accounts. I'm going to look for accounts right now. Read through the thread and stop asking him silly questions ;)

Good luck with your great bot dude!

By the way it says 'subscribe' in the logs.

np enjoy...

About comment rater, the thing is that i done everything i KNOW. I done 90%(and if you remember i said that like 1 month ago, because thats when i tried and failed) but those other 10% is a part that is fucked up.

What i am most interested is to make sure my customers have a version that is bug-free, and i am very trying to figure out how to finish it. As i found out there is no apis for that part of youtube, and i tried something else but it failed, so i stopped working on it. But few days ago 1 my friend told me

that there is another way, so me and him are trying it, i can only be honest and say that i don't know how to code that part, and i am putting everything on him. However he is not from HF, and he is a lot older then me and i can't actually hurry him up since he has better thigns to do. He told me he will try to do it over weekend, however i haven't heard from him. I will ask tomororow.

I can make it slow, but thats not what i want you to have, since i know for boosting SPEED IS MOST IMPORTANT.

Please do your suggestions for other updates, since while we figure comment rater, i can do some other stuff :).

Thanks.

You can't take a video down using the API flag method, because YouTube doesn't support it anymore. It's just a waste of time flagging using API bots. (same goes for YouToob FE)

Hello i have Tubenoia and MeTube. If i use tubenoia to susbscribe, like and favorite a video using 500 accounts it does the work in 20 mins. But when i use Metube for the same job it takes 50 mins. I am thinking of getting vandalism. So is it faster than tubenoia and Metube ? If so how long does it take to complete the above task ? Thanks.

Do all of the accounts (that i provide for the bot) use different preset proxies, etc? I'm not trying to blow up a youtube, then get popped for using this program, if theres a better one out there. LMK what youtubes latest things they watch out for are, so I can prevent a ban, or video delete.

as i understood you want to boost your video? Well if you use my bot, your video will not get deleted, what might get banned are your accounts. Mostly if you spam with them, if you use them with a short period between other usage then they won't get banned, but if you keep using them(subscribing, commenting, liking etc) every second new video, they will deff get closed.

Hey bro ! This bot have a comment rater right ?? Do I need to use proxy when I use the comment
rater or otherwise I will get banned like 20 minutes after ?

Thanks in advance

yes there is comment rater working..

No this bot doesn't have proxy support, it did had before, but people were crying how their proxies die too fast, i said i cannot give them proxies they have to find themselvs. And mostly good proxies were expensive so not many used this option.. After 6 months i deleted this from my program because it was un-useful, and it slowed down bot pretty much.. ANyway it is not true that accounts die in 20 minutes, they don't die at all if you don't spam with accounts, mostly they die if you comment too much too fast.

Grants is a great person to deal with. I had a problem using the bot, but it was my computer's fault. He helped me over TeamViewer and even offered me a full refund if we couldn't fix it. He suggested a solution and it worked like a charm. He's a great guy and the bot works flawlessly.

Grants - May 13, 2012, 2:00 am

I am back.. Well let me clear something out. The reason my bot wasn't working is beacuse of protection system(sepa) which isn't mine project.. They were switching from 1 version to another and it was down few days, after that i had to update my bot, however i didn't even knew all this because i was away from country i had pc on.. I couldn't even log in to hf for long time because the country i was in was banned...

I am not a guy that just leaves a project, and takes away all the money from people and never come back! I have respect, and if i say its lifetime, its much more then 2 years.(we are up for 2 years almost).

Anyway, my problems aren't your problems, i understand i had to keep up with updates but i wasn't at home and only i know why i couldn't, i don't want to and i can't to explain all my problems... It never happened before so please accept my appologyze!

If you still have problems with log in, either pm me or contact me on msn, or just post here!

And just to say i'l be working on some updates from June, we will fix everything and add more features!

Thanks.
