The amount of times I've seen this kind of method promoting free Google Adspend is incredible. I spend about $25K a month on Google Ads, please let me know if you'd be willing to give a vouch copy. Really skeptic about this one, regardless GLWS. Hope this is real.

NOS - *September 6, 2020, 11:08 am*
Will your domain eventually get blacklisted from ads? Is there a way to prevent or circumvent a ban?

I would like to see this guy test it out too. I've seen a bunch of these methods, but never have seen anyone confirm that they work consistently

Most of these adwords methods work but they don't really fit well for someone running a real business with high adspend. You have to churn accounts spending only $350-500 per account. So to get 25k ad spend you will be making a shit ton of accounts. And since they're all only spending $350 you don't really have much time for the algorithm to optimize.

Usually these accounts are best for BH niches where you are constantly getting banned. Or if testing new offers and want to test for free, then once you have some data move over to your real accounts.

I would much rather buy an account ready to spend rather than the method if that is something you're interested in providing.

Winds - *September 7, 2020, 9:03 am*

OP gave me a vouch copy, first of all thanks a lot for the opportunity to review it!

The method looks very good and OP showed me concrete proof that it worked. The package includes 6 videos that show you exactly what to do step-by-step and 1 .txt file that will tell you how to run campaigns safely without getting blocked. This is by far way better than free tutorials online because with them you'll get your campaigns blocked instantly while OP provides exactly what you need to do (with the exact campaign settings & tips) so you can spend the whole threshold and even more without getting blocked!

So while there are some "tutorials" online, you can try them out for yourself and see that you'll get blocked (I know this because I've tried them by myself).

I'll be showing proof soon that one of my accounts spent the whole threshold (once the threshold is over).

Keep in mind: OP doesn't run/show you how to run blackhat campaigns (AKA CPA, ClickBank etc), it's your job to figure that out by yourself if you want to go that route.

Good luck with sales!

Looks interesting. 1 hour and 15 minutes to make 5 accounts and 3 will live? Do I also need to make multiple PayPal accounts?

This is an excellent method. I have expansive knowledge of Google Ads and have not seen this done before. Anyone can genuinely do this for $10 an account. OxaByte explains everything thoroughly and where others have left me a bit lost, I understood everything in full with detail.

I have also had all of my questions answered within seconds on Discord and have no doubts remaining.

In terms of revenue potential, this will be up to you to think outside the box, however there are hundreds if not thousands of ways you could use these accounts. Very impressed and I don't leave reviews often.

Pick it up.

You're using MCC accounts right?

What's the starting adspend for each new account and the increase in adspend ?

5/10/40/80/200$?

If you support using MM, use the teamviewer demo to create a gmail login to googleADS and successfully bind the newly purchased VCC, I'll buy your tutorial for $230 and leave a great review!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
