Thread: [Increase dl speed by 300% \[24online client\]](#)

vqs - March 25, 2011, 4:15 pm

My first little contribution to the wonderful community.

There is a bug in 24online client software.I can easily increase my speed from 50KB/s to over 1 MB/s.Watch the video below to see how its done.

[Video: <https://www.youtube.com/watch?v=wVYxZ96r-Po>]

Note:If the download stops and dl speed becomes 0bytes/s then again login and exit after a few secs.

Jcollins6695 - March 26, 2011, 12:53 am

Not very convincing. Nice try though (:

-mothered- - March 26, 2011, 1:40 am

If you're already running at optimal speed, as per the connectivity provided by your ISP, then there's nothing you can do to Increase It.

My speed is 512 kbps and I pay only \$10/mo for it and I can get 1 Mb+/sec with this???

thread title "Increase dl speed by 300% [24online client]"

50 kb/s increase for 300% are 1 mb/s lol??

did you meant 3000 %???

vinzpo - March 26, 2011, 4:12 am

Good tutorial thank you for your help

!!!! - March 26, 2011, 4:22 am

Bro just understand one thing!

There is no possible way to increase your internet connection speed expect tweaking your modem and that too is quite hard..

@ction - March 26, 2011, 4:33 am

You can't do it unless you hack your ISP.

Whatever port/setting you choose,you are not changing your ISP anyways.ISP has set its own limits so it won't work.

Valour - March 26, 2011, 5:22 am

Agreed with all those who think this wont work because the set limits wont change unless u hack-change it.

vqs - March 26, 2011, 7:18 am

OF course if you didn't watch the video, you would make these comments.Watch the 30 sec video and it will shut every1's mouth.

If you don't believe it fine.But it works and it works like a charm

MarvMart - March 26, 2011, 7:46 am

Agreed. I have a 4mbps line, there is no way I can increase because the DSLAM does not support higher speeds ;-)

Demogorgon - March 26, 2011, 1:24 pm

Your connection speed is based on your distance from server(s) & your plan with provider
YOU CANNOT INCREASE YOUR INTERNET SPEED WITH A "HACK"
Thread is total bullshit/Link most likely infected

No, it works only with downloads that can be resumed.If you have a premium account there,then only it will work,

sumit.xlr15 - June 24, 2011, 3:49 am

Even i use 24online!!
today while downloading a movie with utorrent my torrent speed went upto 7 mbps & i downloaded the movie within 10mins!
u on facebook?search me by:sumit sharma ,new delhi, afgji!
& then you can tell me tis trick more briefly!!
thankx

xenoix - June 25, 2011, 2:02 am

ill try this... !!! lets see...
its old bug.. and dont work at all for me now.... !!!

i think this trick is 1yr old... and dead now ...

still thanks for posting...
tc

one more thing... if you exit client like that ... at the end of the day it will reduce data from your accounts only (which is not a good thing for user with limited data plans)

exiting client like that wont hide user's identity as our ip is registered :)).

so using this trick for speed is not a good idea (if its still working for someone ... i had bad exp)

autorunman22 - June 25, 2011, 2:15 am

somebody got this to prove true? Its gonna be an outbreak if so.

Highly misleading title. You should have mentioned the stuff about 24 online client etc. in the title.

The Sly - April 13, 2014, 10:47 am

I always put this iron thingy I use in the kitchen over my antenna xD Increases internet speed as well. But I don't think this is very convincing at all xd
