they are obtained over manual spreading on different sites.

Well they are US bots and they cost much more then this,
if you want to buy random world mix they will be only 15$/100.

Those are called installs and yes you make it self explaning why they get scammed.
I think you need to look into what is called installs.

This are only for those who know the real value of US Bots.
And its not that no one is buying, I already got 2 big orders from here.

Are you offering vouch copies? 5$ per bot is a lot to invest in with nothing to go off of.

5$ per bot is a lot, Cant efford vouch copy buddy.
if you think its a lot, then simpley dont buy. Why brag for it.

pacman - *October 18, 2020, 8:16 pm*

PM me brother I am interested

Parmenio - *October 18, 2020, 8:36 pm*

yah tbh $5 for a Win10 U.S machine isn't all that expensive. when you take time to properly integrate yourself, you can extract much more value over time vs. buying 1k global loads, of which 20-30% are still active after 2 weeks

Hey are you able to provide quality traffic to a twitter account that's aimed at cosplay onlyfans type stuff?

Mario1 - *August 8, 2021, 11:12 am*
Yo I have a counter offer - $10 per install; bots are from Dubai, could have oil locations n shit on them.

Seriously tho, $5 is way too much mate.. I can get broke USA dudes to open my rat knowingly for 5 bucks.
