Thread: How to make FUD RAT payloads

AnonSurfer_344 - *November 19, 2020, 10:37 am*
Hi,

i want to know what is the best way to make FUD RAT payloads and bind it with another program

if someone know how please reply to me with the method

thanks.

Check this out. It still bypasses Windows Defender. Which is the main AV you wanna worry about if you're mass spreading.

Use this tool (clean but run in sb) [deleted] to get Async base64.

It bypass W10 scan but not execution

It does for me?

You can always obfuscate the vbs yourself or buy a crypter.

I just wanted to say that it does not bypass Runtime W10 anymore as shown in the video

I have tried it

Either that or you don't want it to get detected so you're throwing people off. OOPS! ?

yeah.... sure i guess, i don't want the 10k views video about a vb.script dating from April to be detected

You got me bro, i'm the impostor

You have to purchase stub crypto or if you know in Cryptography then it will be easy for you to make it FUD
