Thread: [EZ-HWID - .NET HWID System](#)

Meth - March 26, 2011, 4:07 am

Was just bored so put this together, someone might use it.

Before someone asks, Yes this will actually add, remove there hwid. It's great for quickly adding (or removing in the case of chargebacks) HWIDs aswell as keeping track of customer data.

EZ-HWID

[img]<http://k.min.us/jmk8za.jpg>[img]Add HWID from program

Remove HWIDs

Edit HWIDs

Keep track of info

Can be implemented with any form of HWID

Saves all info when closed

Includes an example of how to implement it into your code aswell

Project Download (PHP Files, Manager Vb project, Implementation example:

<http://www.mediafire.com/download.php?dys2vqhsq83isvd>

Don't be a leecher - If you actually download say thanks

Might make some instructions setting it up later although it should be pretty straight forward.. If you need help ask.

Brief Instructions

1. Upload all the PHP files to your server (Make sure they all have 0777 privliges)
2. Replace the URLs throughout the "Manager"'s code with yours
3. PROFIT.

From there you can use any sort of hwid you'd like and just implement the hwid check into your project.

Emilnerd - March 26, 2011, 4:32 am

Hey, i tryed this shit. i got no errors when uploading but wher those it save data? :L

couse i must download the HWID As string any idea how bro?

Meth - March 26, 2011, 4:34 am

It creates a textfile for each hwid in the same directory as to where you upload the php files.
Make sure all the php files have 0777 privileges

Then you just implement it as usual in a program by checking if there HWID exists.

If you need help implementing it I could TV you real quick and set it up.

xDowwdeen - March 26, 2011, 4:37 am

I AM GETTING A VIRUS ALART.

[img]http://screensnapr.com/e/QZCOZi.jpg[/img]

Emilnerd - March 26, 2011, 4:38 am

Yes Please :), add me on msn Emilhj@hotmail.no

(Mar 26, 2011 04:37 AM)iFlynn Wrote: [\[CITE\]](#) I AM GETTING A VIRUS ALART.

[img]http://screensnapr.com/e/QZCOZi.jpg[/img]

Ignore it this is full open source, just look thought Source. its clean Btw

xDowwdeen - March 26, 2011, 4:51 am

would you be able to do it so that it uses a MySQL database.

Meth - March 26, 2011, 4:53 am

You could, but I havn't dealt with SQL in .net

xDowwdeen - March 26, 2011, 4:54 am

no i mean so that it still uses the php files and it creates and updates the database via the php files

Also have u got msn?

Doctor07 - March 26, 2011, 4:55 am

I am downloading this RIGHT NAOW ;D

Ill write back soon to say how it is.

Meth - March 26, 2011, 4:56 am

Oh I see what you mean, I'll give it a go later, 5am to tired right now.

Not a big PHP person either but ill give it a go

(Mar 26, 2011 04:55 AM)ViolentReality Wrote: [\[CITE\]](#) I am downloading this RIGHT NAOW ;D

Ill write back soon to say how it is.

It was like 4am when I wrote it all and I didnt comment it. Hopefully you can make sense out of it
heh.

Just a note: The implementation example of it I provide is purely an example, you can use any
HWID system you want with it.

You basically just have to check if a textfile with there hwid exists.

Doctor07 - March 26, 2011, 5:04 am

(Mar 26, 2011 04:56 AM)Meth Wrote: [\[CITE\]](#) Oh I see what you mean, I'll give it a go later, 5am to

heh.

Just a note: The implementation example of it I provide is purely an example, you can use any HWID system you want with it.

You basically just have to check if a textfile with there hwid exists.

Im gonna try base this around adding to an Online Database, as i havn't learnt about anything like that yet and i think its time i do ;D

Meth - March 26, 2011, 5:05 am

That's kinda what this already does with the PHP ;o

But anyways let me know if you need any help.

Nazworth - March 26, 2011, 7:18 am

I'm Downloading, Will be checking it out. Thanks

Doctor07 - March 26, 2011, 7:43 am

(Mar 26, 2011 05:05 AM)Meth Wrote: [\[CITE\]](#) That's kinda what this already does with the PHP ;o

But anyways let me know if you need any help.

You got msn bro, ive got the majority of it setup.

Angry Asswipe - March 26, 2011, 8:48 am

This is really stupid using the MAC Address as a HWID Validator. You should really be using Processor + HDD + GPU + RAM and Possibly + OS... not MAC addr, you wasted your time.

Gone-KaPPaH - March 26, 2011, 9:59 am

Thanks for this going to take a look at it

DaRkReD - March 26, 2011, 10:07 am

mac address can be spoofed... just saying

Meth - March 26, 2011, 12:09 pm

(Mar 26, 2011 10:07 AM)Mov DaRkReD Eax Wrote: [\[CITE\]](#) mac address can be spoofed... just saying

I didn't say it should be used, it was simply an example of how to implement it.

You can use whatever the fuck hwid you want. .

(Mar 26, 2011 08:48 AM)UnknownCh00B Wrote: [\[CITE\]](#) This is really stupid using the MAC Address as a HWID Validator. You should really be using Processor + HDD + GPU + RAM and Possibly + OS... not MAC addr, you wasted your time.

Holy fucking shit, the point if this isnt the fucking HWID. It was simply a god damn example of how you could use it and MAC was the first thing to come to mind. The main point is the management.

I wasted my time for helping? Alright youre an idiot. And I should use RAM And OS? Right cause people TOTALLY don't have the same OS, RAM, HDD. I have my own unique HWID on all my programs. Stop slamming me for helping.

Where the fuck are your contributions? You made some basic hwid grabber? Bravo!

Shit this is why I never release anything.

Xflinitrix - March 26, 2011, 12:15 pm

Fuck everyone else Meth thanks I downloaded it and it works great. Ive edited the HWID and im using my own and added a little protection myself.

If anyone is wondering yes you can use MySQL to store the users :) But you have to know how to make it show up in vb. Anyway dont mind any other skid bashing on the thread bro, great job and Im gonna use this for my up coming program :).

[img]http://bdadv.files.wordpress.com/2011/03/haters_gonna_hate_10.jpg[/img]

Meth - March 26, 2011, 12:27 pm

Thanks. Perhaps they all missed at the bottom of my thread "From there you can use any sort of hwid you'd like to check if there HWID exists on your server."

Haters gonna hate. Glad someone found it useful

ShadowGh0st - March 26, 2011, 12:31 pm

Is this what you used on v1 of coologgeR?

Meth - March 26, 2011, 12:32 pm

(Mar 26, 2011 12:31 PM)ShadowGh0st Wrote: [\[CITE\]](#) Is this what you used on v1 of coologgeR? no i just made this last night out of boredom.

You can use it with any HWID/Protection in your program. It's just an easy way of managing all your customers.

I use it with CoolLogger with my normal protection system to manage customers.

Convicted - March 26, 2011, 1:40 pm

I will look into this when im home, looks verry interesting.
Vouch for you!

Bender - March 26, 2011, 2:02 pm

Thanks so much man I appreciate it

ShadowGh0st - March 26, 2011, 2:13 pm

I implemented HWID & Mac Address now thx ;p

Meth - March 26, 2011, 2:13 pm

As others said though, you should Change the MAC check to something else

SIM-297877 - March 26, 2011, 3:41 pm

Will it Encrypt the data when it saves? Also vary nice, I did something like this for a CAD system for logins. I like.

Meth - March 26, 2011, 3:50 pm

No. it's saved locally on your computer I didn't really see the need.

I could add it but this was just a basic easy to use example. made it at like 4am couldnt be bothered.

Doctor07 - March 26, 2011, 4:16 pm

Thanks for all the help bro, this has got to be one of the best shares ive seen in this section.
?

[img]http://images1.memegenerator.net/ImageMacro/4986164/HATERS-GONNA-HATE.jpg?imageSize=Large&generatorName=HATERS-GONNA-HATE[/img]

.CRz - March 26, 2011, 4:17 pm
thanks for this, Nice share.

Meth - March 26, 2011, 4:31 pm
Not a problem, atleast a couple people made use of it.

This Girl Is On Fire - March 26, 2011, 5:08 pm
Don't know if this has already been posted, but, MAC address's can be spoofed in seconds.

Meth - March 26, 2011, 5:10 pm
<https://hackforums.net/showthread.php?tid=1159967&pid=10730705#pid10730705>

Is it really that difficult for people to see the point of this isnt the hwid? Apparently I need to go edit the source and reup because people are just gunna keep fucking pointing it out.

It's a management system. It cant be implemented with any HWID.

The Mac Address hwid was an example of implementation

emiak - March 26, 2011, 5:28 pm
thank mate ! m happy to see your thread

Angry Asswipe - March 26, 2011, 8:18 pm
(Mar 26, 2011 12:09 PM)Meth Wrote: [\[CITE\]](#) I didn't say it should be used, it was simply an example of how to implement it.

Shit this is why I never release anything.
Chill bro... I'm only implying that because you used MAC address, it's useless, but since other people can use something else, bravo on the work.

Meth - March 26, 2011, 8:52 pm
Although I wouldn't recommend using the MAC it's hardly useless unless youre a moron and don't have a index page it's not like there going to know a valid MAC.

CaZzUaLLv3x - March 26, 2011, 9:15 pm
this doesnt work, it keeps saying it didnt find my hwid... i set-up the websites correctly

Meth - March 26, 2011, 9:22 pm

(Mar 26, 2011 09:15 PM)CaZzUaLLv3x Wrote: [\[CITE\]](#) this doesnt work, it keeps saying it didnt find my hwid... i set-up the websites correctly

Haha, correction you just can't set it up. I love when people say something doesn't work because they're to stupid to use it.

CaZzUaLLv3x - March 26, 2011, 10:36 pm

(Mar 26, 2011 09:22 PM)Meth Wrote: [\[CITE\]](#) Haha, correction you just can't set it up. I love when people say something doesn't work because they're to stupid to use it.

dont worry lol.. i replaced the code with this and it worked perfect

Code Try

```
webRequest = webRequest.Create("http://localhost/" + GetMACAddress() + ".txt")
```

```
webresponse = webRequest.GetResponse()
```

```
inStream = New StreamReader(webresponse.GetResponseStream())
```

```
TextBox2.Text = inStream.ReadToEnd()
```

```
If TextBox2.Text = GetMACAddress() Then
```

```
MsgBox(GetMACAddress() & " is activated")
```

```
Else
```

```
MsgBox(GetMACAddress() & " is not activated")
```

```
End If
```

```
Catch ex As Exception
```

```
MsgBox(GetMACAddress() & " is not activated")
```

End Tryif it doesnt find the file then it wont connect or if it doesnt find hwid in the file it wont connect,

1) ill be making the username be stored in the file and use splits to get it out

Meth - March 26, 2011, 10:37 pm

Glad you got it to work. Enjoy.

TheDubWubCub - March 27, 2011, 12:09 am

THANK YOU THANK YOU OMG! haha thnx <3

Doctor07 - March 27, 2011, 5:09 am

So many haters, jesus christ >.<

Meth - March 27, 2011, 6:54 pm

Lel it's k. Haters gonna hate.

Atleast a couple people used it

?Mhaw - March 27, 2011, 6:57 pm

hehe nice post very helpful

Meth - March 28, 2011, 12:06 pm

Mhm, glad you found use out of it.

Vertu - March 28, 2011, 12:12 pm

thanks for this, very useful thing!!

jeave - March 28, 2011, 12:15 pm

thanks for this

good job :)

Doctor07 - March 29, 2011, 5:06 am

Just bu\ping this thread, as i think it deserves more views.

Alex™ - March 29, 2011, 5:44 am

ima download this thanks :) ima try to integrate it with fafaffys hwid

dmXsta - March 29, 2011, 2:57 pm

this looks pretty sick, i'll try it out later

Meth - March 29, 2011, 3:36 pm

Mhm glad you guys like it.

0x3a - March 29, 2011, 10:45 pm

@meth: if you do break into mysql with .net let me know i can give you a few pointers. I use it regularly with my tools.

jBarrel - March 30, 2011, 5:28 am

wow really nice :)

fking too short

Aeon-Ev3L - March 30, 2011, 8:05 am

thank you for sharing it looks good ?

DeToX - March 30, 2011, 11:23 pm

hmm... this is very interesting :)

Stenography - April 7, 2011, 3:44 am

awsome man thank u soo much !

Blue Screen of Death - April 7, 2011, 12:22 pm

very nice. thanks you for this tool:)

Meth - April 8, 2011, 3:26 pm

Thanks guys. Glad you all enjoyed

PurpleSky - April 8, 2011, 3:37 pm

Wow dude,Very nice...Thanks for the share <3!

PPDP - April 13, 2011, 5:15 am

Thanks man, using this in my Booter.

Thanks

Meth - May 24, 2011, 3:22 pm

Youza welcome.

INB4NICEGRAVEDIG.

shut the fuckup

ii_SNiPEzZ_xX - May 25, 2011, 4:02 pm

can anybody help me to impliment this, because iv planning to make something atm but i dont have any money to buy a really really good one, and i have no idea how to use this.

Meth - May 25, 2011, 4:40 pm

Almost everything is done for you ._. Implementing it is rather easy

Doctor07 - September 4, 2011, 10:00 am

Damn, "Invalid or Deleted File" Fuck sake :L

Ace™ - September 4, 2011, 5:36 pm

Can you reupload and post a mirror please. Thanks. and the picture of it looks great.

FFX - September 9, 2011, 1:07 pm

Please post again, is down and looks very interesting. Very good job congratulations

Brucie - September 10, 2011, 5:56 am

I wouldn't trust meth, he promised a coollogger update as its not working.

now he's posted another free project ;)

i'm guessing its a virus.

Doctor07 - September 10, 2011, 9:37 am

(Sep 10, 2011 05:56 AM)Elvis presley Wrote: [\[CITE\]](#) I wouldn't trust meth, he promised a coollogger update as its not working.

This was posted AGEES ago and was dug up; This wasn't a virus as i used it countless times on my old computer :]

Pixelblocker - September 10, 2011, 1:40 pm

Link is down... Can you please reupload? This could be very usefull

Androcir - September 10, 2011, 2:58 pm

Bookmarked this, i might use this, quite often in sometime.

So yeah, thanks a lot! And hope you get bored more often ;)

Yeah and a reupload would be sweet

Dread Pirate Roberts - November 7, 2011, 3:04 pm

Vouch for Meth's Hwid Program.

Genious.

the ??!f ?f ?all \$t?€€t - November 7, 2011, 3:07 pm

the link is death :(

Can u please fix the link?

Greetz nexxion

BTW: thanks for uploading :)

reflexir - November 7, 2011, 3:09 pm

bet you \$5 anything this can be easily patched

Meth - November 7, 2011, 3:38 pm

(Nov 7, 2011 04:09 PM)reflexir Wrote: [\[CITE\]](#) bet you \$5 anything this can be easily patched

Jesus fucking christ, I already said you have to SECURE IT YOURSELF, this is simply a hwid

management system to allow you to easily add/remove Hwids.

This is why I dont contribute here

sickoryy - May 13, 2012, 8:24 am

please reupp :D this looks rly nice

li0nsar3c00l - May 13, 2012, 11:40 am

please upload this project again, it looks pretty nice

Meth - November 2, 2012, 12:31 pm

Going to reupload this when I get home figure people still might have some use.

dlwhdrif - November 3, 2012, 4:23 pm

Please re-upload the source.

I really do want it.

BlackLayer - November 12, 2012, 6:01 pm

Please re-upload, really i need this

?

SkyRider2 - November 12, 2012, 6:23 pm

Nice one man, good work nice to see some potential around here.

Meth - November 12, 2012, 6:37 pm

Reuploaded

<http://www.mediafire.com/download.php?dys2vqhsq83isvd>

Enjoy if you have any questions ask away although I dont really code in .NET anymore.

SkyRider2 - November 12, 2012, 6:38 pm

You might want to put this on Original post?

Meth - November 12, 2012, 6:40 pm

Already did that :)

Made this along time ago so it could be a lot more efficient but it works. Remember the HWID implemented in the example is proof of concept I highly advise implementing your own hwid system.

BlackLayer - November 14, 2012, 7:25 am

(Nov 12, 2012 07:37 PM)Meth Wrote: [\[CITE\]](#) Reuploaded
