Thread: $500+/DAY => LOW RISK HUGE PROFIT GAMBLING METHOD

Charybdis - *November 20, 2020, 1:10 pm*
Tired of losing money when gambling?

My method has helped me win over $1000 in a single day. All the money I make, I use as spending money (clothes, shoes, etc.). This method uses probability to your advantage and provides you a 99.36% chance of winning every time. This method has nothing to do with sports betting, as sports can be highly unpredictable.

Requirements
Online Gambling Account
$650 Minimum Starting Balance

Proof

Price (in BTC)

Does this have anything to do with martingale?

Sent you a PM regarding a review copy.

OP was kind enough to give me a vouch copy.

The guide is a simple one with just 5 pages. It is more like a strategy than a method as this does not utilize any loophole/exploit or any script on a site. You will have to have the recommended capital and the time to invest into the strategy and only then should you expect an ROI. I would like to remind people that at the end of the day this is gambling and you might not make the amounts stated in the thread title as your luck ran out or its just a bad day to bet.

The OP recommends a site that he uses for this strategy and it is a well known site. However, this will work for any gambling site that offers this particular game and can also work in real life setups.

I'd like to see you try the method at least, it's gambling and there's no downtime to start (FAIK) unless stated otherwise or you haven't got the required funds up front.

Good review, but it would be a lot more credible for anyone interested if payment proofs were provided to show that this method IS viable and not like most of the crap being posted.

is this related to martingale or blackjack?

can you give me some info?

The vouch is invalid until you try the method and show returns (with proof).

I am not asking anyone to buy his method and the only gambling I do is poker with my buddies (home games).

So why ask for a vouch copy ? To get a free method ? If you knew you weren't going to execute it

you should've let the seller know. That makes the review baseless.

My Review:

I asked for a vouch copy as I meet the requirements of having $650 and having an Online Gambling Account. However, I will not be trying this method. The reason is because this will not work. It is martingale strategy with one of the games that has a pretty big house edge. Ive personally played this in the past and it is only a matter of time until you loose everything. Op claims to have made profit, but all I can say is that it is luck. Not worth it in my opinion. He does give some tips, that may help extend your time, but like I said you will lose in the end.

You do not know the terms between me and the OP for the vouch so please offer your opinion where people give a shit about what you think.

If this was a sure shot way of making money, would it be termed gambling? Ask yourself that, lookit up in a dictionary if required.

The review posted above should clarify what I have said in my review for those that don't seem to understand simple English.
