Thread: Pulling the trigger on ETH need iphone wallet suggestions

Sheff_G - *January 4, 2021, 7:04 pm*

I'm pulling the trigger and buying some ETH around $500. Can anyone recommend me a good wallet for iphone users.

No Exchange wallet
No KYC wallets
Must be able to adjust fee

Thanks to anyone who helps

I just downloaded exodus but it won't allow me to change fee's unless it's fixed

You can't. Custom Gas prices for ETH aren't available yet.
