Very good write up. Looking forward to Neo3

1eye - *April 14, 2021, 4:32 pm*
So 3 years+ & there are still 0 applications on it by people who arent getting paid to build. 100% the future of france

FYI this shit will go up bc 10IQ apes will ape -> number go up -> 20IQ apes join etc etc

There's flamingo.finance, the gateway for DeFi on NEO

1) no one uses that

2) nice GUI, its like 6months old atleast now if im not mistaken
https://i.gyazo.com/415fa5aea37a1a668362c15bee197619.mp4

3) I work on onchain applications & can fully vouch idc about this chain cus its wack

1 - I use it, so do many others. Just recently it achieved US$250M in liquidity. If that is "no one", then f*ck me.

2 - Not sure how this is a concern. Every project in in development. Having a GUI that is six months old is not a reason to be concerned. Projects don't magically appear and have years of development just like that.

3 - Doesn't seem like it.

200.000 tx/day
$330 mio liquidity provided
$44 mio trading volume in the last 24 hours

GUI works perfectly fine for me but whatever..

I don't understand your third point.

1 - Just like in 2017, they market this shit super hard to get the asians to buy but fr 250M in liquidity is deffo not a lot in this type of market.

2 - A GUI deffo is not everything but lets be real here name me 1 of the big boy firms that has capital in flamingo or NEO? Not those shitty ones that no one has heard about

3 - I mostly work with solana, but sure

If you know anything about Neo you'd know that absolutely no effort was put into marketing until

they had a working product.
