Thread: [\[Your first VB2008 Program\] Web browser \[With codes & Screen shots\]](#)

BETAhr - August 5, 2009, 1:09 pm

Here is a simple tutorial with screen shots showing you how to make a simple web browser in visual basic 2008.

You will need these items, and place them like they are in the screen shot.

1 text box, 1 Home button, 1 Go back button, 1 Go forward button, Refresh button, 1 Stop button, 1 Menustrip (For shortcuts), 1 Go button.

[IMG]http://i28.[censored].com/28uhiqs.jpg[/IMG]

Now the stop, refresh, go, back, forward, home, will all be picture boxes.
(They will not have line around them when the project is built)

Now add the code

Pictures boxes...Just double click on them so it will be picturebox_click

[IMG]http://i28.[censored].com/2nkh2r.jpg[/IMG]

Now lets add the code for our shortcuts.

Just double click on each option on your menu strip as seen below.

[IMG]http://i28.[censored].com/290u7if.jpg[/IMG]

If you would like to make it go to a website (such as your own) on start up

Under Form1_Load put

Code Webbrowser1.Navigate "www.Yourwebsite.com"

Here is the full code.

MenuStrip - Options - Exit

Code Me.close

MenuStrip - Shortcuts - Google.com

Code Webbrowser1.Navigate "www.google.com"

MenuStrip - Shortcuts - Myspace.com

Code Webbrowser1.Navigate "www.myspace.com"

MenuStrip - Shortcuts - Youtube.com

Code Webbrowser1.Navigate "www.youtube.com"

MenuStrip - Shortcuts - Hackforums.net

Code Webbrowser1.Navigate "hackforums.net"

MenuStrip - Shortcuts - Wikipedia.org

Code Webbrowser1.Navigate "www.wikipedia.org"

PictureBox - Back Button

Code Webbrowser1.Goback
PictureBox - Forward Button
Code Webbrowser1.Goforward
PictureBox - Refresh Button
Code Webbrowser1.Refresh
PictureBox - Stop Button
Code Webbrowser1.Stop
PictureBox - Home Button
Code Webbrowser1.Gohome
PictureBox - Go Button
Code Webbrowser1.Navigate (Textbox1.Text)
That it...A simple basic web browser in Visual Basic 2008 (VB .NET).

Druidoron - August 9, 2009, 12:45 pm

wow thanks guy, have u more good tutorial for vb? ?

BETAhkr - August 9, 2009, 4:08 pm

Yes, Here's some by me.

AnubisX - August 9, 2009, 4:53 pm

Thanks for this tut, but it is very un needed with vb.net not only because of vb2k8's auto fill but also because their are already a mass of tutorials like and even better than this one....

Sorry to sound negative but their are so many browser tuts with nothing extra.

BETAhkr - August 9, 2009, 11:55 pm

Oh well, I will make an advanced web browser tutorial, Just for you, Check back in a day or 2. :)

BumbleBee - August 16, 2009, 2:13 am

Where are the:home,fron.back,....buttons...?

BETAhkr - August 16, 2009, 2:50 am

My buttons are the pictures.

[IMG]http://i29.[censored].com/2dkilc8.jpg[/IMG]
After you make this, Try making this, It's better. :)

I mean where are these buttons at the tool box? Or you put basic buttons and customize them????

huso69 - August 16, 2009, 5:48 pm

maybe make a tab web browser :D

BETAhkr - August 17, 2009, 3:33 am

This is for a beginner huso, That's why I gave him the link so when hes ready
He can make a different web browser.

Anyway...

These buttons can be whatever you want, I used a picture box and double clicked
on the picture so if you click on the picture it does the function, Some
people use command buttons.

zer0cool - September 8, 2009, 3:21 am

one question please, okay

how do i make my web browser compatible with flash. so i can watch youtube videos etc.

thanks

lol By the way You Forgot to add the WebBrowser Component on The Form.

nice tut.

BETAhkr - September 8, 2009, 5:34 am

No I didn't, Mine is as the size as the form and white like the background of my form.
I added a box and buttons, I didn't forget anything. :)

_3rr0r - September 16, 2009, 8:14 pm

I finished it, thank you for helping me :)

BETAhkr - September 24, 2009, 2:53 pm

No problem, You can always try this more advanced web browser
I suggest it to anyone.
