Thread: [\[TUT\] How To Install Themes\[VB.Net\]](#)

SoulZeh - March 28, 2011, 12:37 pm

Hey this is my First tutorial and i will Try my Best to Explain it my best okay..Credits to AeonHack And All The Other People For Making Themes

Step 1.

Open VB.Net And make a New windows Application Form Name it what ever you like.

Like so

[IMG]<http://i459.photobucket.com/albums/qq312/ERROR666/tut1.png>[/IMG]

Step 2.

Now Add A Class.vb To your Project Like This

[IMG]<http://i459.photobucket.com/albums/qq312/ERROR666/tut2.png>[/IMG]

Step 3.

Now Class.vb Should be open and you should Public Class Class1

End Class

Delete All that In the Class.vb.

So it Looks Like This

[IMG]<http://i459.photobucket.com/albums/qq312/ERROR666/tut3.png>[/IMG]

Now Copy All the source Code Of AeonHack Theme i Uploaded mine as a Attachment so you can download it there, Copy all The code

and paste it into The Class.vb Like this

[IMG]<http://i459.photobucket.com/albums/qq312/ERROR666/tut4.png>[/IMG]

Sorry it wont show all the source but you get the idea

Here Is The Source For The Theme i Used

Code <http://www.gamefront.com/files/20168212/AeonHack+Genuine+Them.txt>

Now Hit DeBug And When The form Shows up Just Hit Stop Debugging

When that is done Go onto Form1.vb[Design] And On your Toolbox you should have GTheme, GButton and Seperator

Like so.

[IMG]<http://i459.photobucket.com/albums/qq312/ERROR666/tut5.png>[/IMG]

Deceptive - March 28, 2011, 12:50 pm

Edit this thread and delete everything on it. AeonHack has a tutorial of his own on how to add his OWN themes.

SoulZeh - March 28, 2011, 12:51 pm

AeonHack Told me to Post This

Deceptive - March 28, 2011, 12:53 pm

Okay, if he did show us some proof.

SoulZeh - March 28, 2011, 12:54 pm

Well i sent him a message on Msn so... just wait till he reply's on this thread then

Deceptive - March 28, 2011, 12:55 pm

Okay, well it kind of makes no sense for him to ask you to post this when he has a tutorial on how to install on all of his threads. It's really not that complicated

Steps. Create new class C&P code on new class.

Build

Add Theme

Done. Don't see why you had to make a new thread.

SoulZeh - March 28, 2011, 12:57 pm

But Learners dont know how to so.. though would be nice to make one.

R3c0N - March 28, 2011, 12:57 pm

TheMist don't be a noob already. He contributed to the forum in his own way and I thank you for that.

Deceptive - March 28, 2011, 12:58 pm

But he has a .GIF video of him installing it. I still don't believe he told you too.

R3c0N - March 28, 2011, 12:59 pm

TheMist stop complaining already..

Deceptive - March 28, 2011, 1:00 pm

(Mar 28, 2011 12:59 PM)R3c0N Wrote: [\[CITE\]](#) TheMist stop complaining already..

I'm not complaining. You're complaining about me complaining even though I'm not.

SoulZeh - March 28, 2011, 1:03 pm

cheers Recon Least some1 dont flame :D

6e756c6c - March 28, 2011, 1:42 pm

Yes, KevvYE showed me a tutorial he wrote on another site and it looked pretty well done so I told him to post it on Hackforums. Some people can just take in pictures better then video/audio. I do appreciate you looking out for me though, TheMist. :)

Deceptive - March 28, 2011, 7:02 pm

Your themes turns me on.

I'm using it in all my programs from now on. :)

Reeally dude. You sound like a little kid why do you care so much that this thread is here?

R3c0N - March 30, 2011, 11:39 am

I care this much that this thread is here. Alot of people have problems following just simple video's / gif images so i like it that KevvYE posted this. (I am not one of the people that have problems following video's or gif images.)

Mortalis Piratica - March 30, 2011, 11:42 am

They are easy as hell, just copy and paste theme's source in ur source and then just build your application it will appear at top.

MirrorDude - March 30, 2011, 5:56 pm

(Mar 28, 2011 07:02 PM)TheMist Wrote: [\[CITE\]](#) Alright, sorry for seeming like a such a dick. ya....nice tut Keyve, thx for the contribution to HF, saw video/gif didnt work... gonna try this

SEXY THEMES!!!

---noobs check out my thread on setting up a keylogger

Ghost? - March 30, 2011, 7:13 pm

Nice tutorial man.
Will try this zoom.

.Astro - March 30, 2011, 7:41 pm

Do you guys realize how old it is, and that it's been grave dug?

@OP - Great tutorial, should help some people learning to install these. Although it's not very hard.

Stenography - March 31, 2011, 4:13 am

thanks alot my friend !!!

Bacardi - March 31, 2011, 4:17 am

Uh what?

03-28-2011, 09:37 PM

Anyway,
Nice simple tutorial, I'm sure it would be useful to people.

The_J0k3r - April 1, 2011, 10:17 am

for me it doesn't show up, tried both debug and build, but does it might have to do with dotnetbar?

EDIT: does not have anything to do with DotNetbar :p

Zombie++ - April 1, 2011, 10:26 am

This is very good tutorial for people who trying to add custom themes first time and get some errors like me :D

SoulZeh - April 4, 2011, 7:23 pm

Thank You For The Comments People <3

Diabolic - July 3, 2011, 2:59 pm

Thanks for posting this, this just helped me out loads!

Nazworth - July 3, 2011, 3:04 pm

You never have anything positive to say so why do you even bother speaking? It's people like you that make things shit, kthxbye<3

BTW - Nice TUT, people always ask how they work.

SoulZeh - July 3, 2011, 3:06 pm

cheers [R]elapse took me awhile <3 thanks for keeping it alive

tojba - September 6, 2011, 12:53 am

Is it just me or is the source DL broken?
Nonetheless nice tutorial.

IVludKipz - October 11, 2011, 5:08 pm

I did all this but theres always little errors that dont work and it really pisses me off

6e756c6c - October 11, 2011, 5:39 pm

__init__ - November 30, 2011, 1:29 pm

Thanks for this tutorial. Very clear and easy to follow

CheckFallen - November 12, 2014, 8:25 pm

Noob friendly tutorial. Very easy steps.

SaketSaket - November 12, 2014, 10:35 pm

(Nov 12, 2014 09:25 PM)ThaFallenOnes Wrote: [\[CITE\]](#) Noob friendly tutorial. Very easy steps.
You are Grave digging 3 years old tutorial ;)

SoulZeh - November 14, 2014, 5:31 am

He maybe grave digging but that doesn't mean it still doesn't work, I myself haven't worked with VB.Net for a long time now but I doubt it much it's changed.

Teruz14 - November 14, 2014, 6:12 am

Great tutorial :) good for people that don't know how .

kuyaMacoy - October 5, 2016, 6:40 am

Im having a error

Error 1 'ComponentModel' is ambiguous, imported from the namespaces or types 'System, System.Windows.Forms'.

Please help guys
