Thread: Optional swear word censoring?

I understand the purpose of it being there, however I think if you provide an option for (perhaps only upgraded users) to toggle this off would be great cus idk about you lot but swear words really help some sentances come together.

Omniscient - *September 1, 2021, 10:34 am*
I think you fucking know what each fuck means from the fucking filter you fucking fuck.

shit = not censored
cunt = not censored
ass = not censored

So really just one word censored and I don't see how you lose any context.

And just like that, a quote for the signature was born, thanks Omni. ?

@OP, have you got any examples of where this has presented a problem in readability by any chance?

Consider looking at Milkers.org for more stuff. I haven’t updated it in a while though

I like how HF makes us say Fugg instead of the word that can’t be mentioned it’s like we’ve got our own word that only we can say just like the N words have their word ?

Pyro - *September 3, 2021, 7:02 pm*
i personally use f*ck on HF instead of fugg, looks better to me

Sajuuk - *September 4, 2021, 10:36 pm*
That word can be oh so hurtful. Just be thankful we can still use cocksucker, asshat, shithead, etc. As for a solution, I side with the UserScript proposal.

Yeah, I think we don't need to be an R or X rated site imho. We do offer the site to teens as well.

See, you just have to be more creative than the simple F word.

I think its silly to censor the word fuck when you can say any other cuss word. Does it hurt SEO or something? We've gone from calling rep removal a repfuck to censoring the word fuck, crazy how that happened.

I doubt any teenager minds the swearing in fact teenagers are going to swear more than the adult members of HF. If a parent is watching over their teenager on the internet, they aren't going to let them on HF anyways.

Fugg works, but if you really want to see the word fuck then you can install this TamperMonkey script I made :)

Maybe I just like pissing you off.

I honestly say the F world quite a bit when I speak since I guess I use it as a filler or something. But I don't often type it when I am trying to get my point across on a forum so it never even occurred to me this was a feature.

I am a prolific swearer. The F word is basically just part of my vocabulary that I often am not even aware I'm cussing.

Here's a script you can use to restore the original words.

Download Tampermonkey extension and paste this code into it: check the code.

Do it now you fugger ?.

Edit just saw you did it before me haha, nice!

I guess the f word must really hurt SEO or I don't see this forum censoring it given the admin's other views. But I don't really know.

[(5)] - *October 7, 2021, 3:03 pm*
It's weird that the filter bothers people so much. Who cares?

Kriptik - *October 7, 2021, 3:17 pm*
I think you still can use the fuck word, just be creative.

Goku - *October 19, 2021, 6:02 am*
Lol, people, stop being pragmatic. Swearing words hurts SEO and also puts a certain classification on your website.

HF is in no way trying to take away your 'freedom of speech'.
