Thread: [IP Address \(Not Local IP\) VB.NET](#)

iBoNeT - March 29, 2011, 6:45 pm

Hey!

Need : Label(1)

Click on form and get it :

```
Code Imports System.Net
Imports System.IO
```

```
Public Class Form1
```

```
    Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)
```

```
Handles MyBase.Load
```

```
    Dim req As HttpWebRequest =
```

```
WebRequest.Create("http://whatismyip.com/automation/n09230945.asp")
```

```
    Dim res As HttpWebResponse = req.GetResponse()
```

```
    Dim Stream As IO.Stream = res.GetResponseStream()
```

```
    Dim sr As StreamReader = New StreamReader(Stream)
```

```
    Label1.Text = (sr.ReadToEnd())
```

```
End Sub
```

```
End Class
```

I dont get what you mean by 'NOT LOCAL'. If you mean it doesnt return 127.0.0.1 then ok... but otherwise who's IP would it return? :)

Shannon R. - March 29, 2011, 6:48 pm

He means all IP's assigned to your router, usually 192.168.1.100 to 192.168.1.105 etc.

iBoNeT - March 29, 2011, 6:49 pm

Local IP Exp : 192.168.254.254(Your router)

but otherwise who's IP would it return? Exp : 417.323.323.2.3232

s3v3red - March 29, 2011, 6:49 pm

So he means NOT EXTERNAL...

CaZzUaLLv3x - March 29, 2011, 7:30 pm

do it without whatsmyp

so i guess you c&p this off youtube

Exactly, lol.

And also:

I've seen this source.... 1000 times now. Why reposting?

Angry Asswipe - March 29, 2011, 8:45 pm

Not Local = Not 127.0.0.1

Thus, it would be the ip that usually starts with 75.*, 98.*, 97.*, or 1xx.*

www.whatismyip.com vs 127.0.0.1

rofl.

and sure he c&p it. it is very known code. i used it for my rat along time ago.

anyway that ip make me rofl :)
