Op:

If you'd like PM me the details however, if you can have upon ready ALL information. Such as what type of forum and version (if you know where to find it) most times it will be at the very bottom in the footer. If it's not there then it's probably a MyBB, PhpBB, IPB, or Vbulletin forum. Even so, this much would help.

Next time, try posting this in the topic as well. It will help people respond faster.
