I am not into crypto now , but I will soon.
But Forex is my thing.
All those are claims without proof.
What is the DD ?
I can vouch for forex not crypto.

So I'm testing out crypto bots, but none are released yet. I provide those who purchase the pro package and higher with quite a few crypto bot recommendations. So I can send you some recommendations. Will send you my dis-cord via pm.

Great. I will post some myfxbook links today. Both live and demo accs. The fx/crypto broker I

recommend has spreads so low that demo results would be similar in live testing.

I currently am offering 50% off all packages till Monday.

For everyone to know:
He's been trying to haggle me down to the lowest possible price on my pro package. I know the value of not only what i'm currently offering, but also what i plan to offer in the future, and I still gave them a discount because i thought their situation was rough.

Honestly the way this user was acting sus'd me out more, which is why I started to ignore them.

And as I told you via chat, that my products overlap. The whole point of this suite and group is to not focus on one investment, but rather create a diverse portfolio. Those who are actual members understand, but you wouldn't.

That's why im not running away just because a single bot had a bad day. Boo Hoo tears he's so sus, but i literally don't care because i'm putting up some new bots now. Time is limited and I got a life to live too so when I get to it I get to it. I know that what I offer is legit, and it will continue to expand.

The accounts are fresh, these algos will pick up for the slack of the others (in terms of performance) while they recover. So take your time and wait it out. I'm not going anywhere.

In the meantime i'm also working on even more non-trading methods with a solid ROI. So stay tuned for that.

You type like a child with brain damage.

My experience has been good so far, except for the one hiccup regarding the prop account but that was my fault more than it was OP's. There is absolutely nothing "sus" about what is being offered and I have access to all of the products and have reviewed them all.

EDIT: The only thing I can fault so far is one high return method but he states several times and makes it very clear that particular investment type is very high risk. Other than that there are investments available for people with small, medium and large amounts of capital with varying degrees of ROI and risk associated.

Thanks for your words,
I try my best to be as transparent as possible considering the type of forum this is. Thanks for the free bump too!

The main issue is that everyone loves the high ROI super fast methods but no one likes the risks

associated. I'm trying my best to balance the two, but that is also why the Pro Package includes Auto Safe Investments which I recommend you to go through so you can learn how to grow your money SAFELY and RELIABLY without higher risk methods. It makes a very nice compliment to the overall goal of any person who wants to become rich. More bots have been added to myfxbook, and i'm excited for the future of this service and more.

Another thing to note is that a FREE 5 day trial is available for anyone interested.

Forget about the risk. The expectation is that you provide a method with 100% or more profit everyday. The more % the better. Remember the % should be daily, not weekly or monthly. 100%, 200% or more return daily would be good.

that's too high, my next method provides approx 3% - 10% Daily, and that's pushing the upper limits of crazy & sustainable profitability! But that's a new ebook with nothing to do with algos and trading.

Hi, I haven't done my dd on Forex trading and am based in Australia... The bots in the middle package are only on brokers that are in the US?

And do you have the bot stats for the Crypto bot? I have experience setting up my own back then it made decent profit for a bit in short term but unfortunately it wasn't perfect over the long term. I used 3commas and Tradingview alert, API calls from signals - is this similar?

No the bots can work on ANY broker. And usually the USA has a harder time than the rest of the world due to more restrictions on what broker and strategies they can use.

Crypto Bots will be coming soon enough. I've had my hands literally full with backtesting, forward testing and answering client support requests. Once i find some more time i'll be firing up some new indicators i have on tradingview and backtest some crypto strategies for smaller accounts.

As for large accounts, I already have a few very safe and reliable crypto trading methods.

I'm from Australia as well and use Eightcap as my broker. All the bots I've tested so far are compatible with them.

So i've realized that many people here would like to get started with reliable bots, and don't necessarily need, or even has the capital available to create a diverse bot portfolio yet. So i'll be changing things around to be more newbie friendly.

I'll be offering 3 Packages:
1. Lite Bot - 1 Bot that delivers around 0.5%+ a day - $200 Min Investment - $99/Year
2. Pro Bot - 1 Super Scalping Robot that can Deliver 30% - 50% per month - $1000 Min Investment - $497/Year
3. Elite Package - Lifetime Membership and Custom EA Portfolio Development - Meant for big ballers and whales - $10,000+ Min Investment - Not Available Until 50+ Members in Pro.

Will change the thread design etc. soon.

I've been assisting with the development of the strategies for the bot/s so I have not personally entered the live market as of yet. This is mainly because I have a very specific trading style that I wanted to incorporate, the amount of variables involved is quite substantial so the testing I am performing is taking time and based on prior experience in the markets it is a process I do not want to rush.

That being said I have started paper trading one strategy as of last night that went well and is due to run again in about an hour. The backtesting was spectacular and the aim is to now see how it behaves with live data and market conditions.

I don't have a doubt that you would be able to recoup the amount for the service using the algo's and bots Casual provides, as previously mentioned I am very particular about how my trades are conducted so wanted to tweak this to my style :)

CasualInvesting - *April 22, 2022, 4:58 am*
Yep. The Algos Bunta is testing is to compliment my prop trading service as well as Offer more robots for members to use.

PS: the current drawdown has already recovered, just that myfxbook doesn't update the account stats often

Exactly as Brunta said. Currently he's helping me with the testing and optimization of new strategies. I like his trading style and have been working closely with him to optimize the algos.

Just to add to this, the strategies and systems implemented can basically be interchangeable between the two markets with the main difference being the fundamental analysis.

Trading the crypto market relies a lot less on the fundamentals as it does the technical side of things which makes it much easier to trade alongside bots (And as a person in my experience) as opposed to Forex where there are regular news releases that affect market sentiment and because of this it's generally not wise to open positions during these times.

One of several solutions to this is that the bots have logic that allows pausing for an interval before and after news releases to ensure you're not caught out with unpredictable market movements and will then analyze and follow the strategic entry conditions afterwards. So essentially you're eliminating the need to do most if not all fundamental analysis.

Yes, with my reccomended settings, a $100 account will trade like a $10,000 Account. Which results in a lot of safety.

With $1000, it will trade like a $100,000 Account which allows me to add a bit more risk to achieve an average 2%+ per day

Drawdown doesn't usually gets higher than 30%, and avg drawdown is closer to 4% or less with a $1000 account as shown in the MyfxBook. With a 10k account, it will be on average less.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Stanley

Thanks! I've been getting more algos in the testing phase, so whether you purchase now or later down. You'll have access!

I'm also running a special promo for the weekend. The full package for $199!
