Thread: [My Guide in Getting Pedo's \(Not PedoBears\) Pedophile :\)](#)

Braniac - March 30, 2011, 1:32 pm

Well. Here's my guide in getting pedophile's

Usually in most place's Pedophile's dont really join adult chatting/Dating Chat. as most of them know those people there are just some bots and women and most people there dont care and just want freesh!t or as what i call them freeloaders.

So if i were you join in the teen's/Live Chat room as there are tons of these on Chatting rooms such as Chatavenue and my favorite Yahoo Chat :)

Why i say my favorite Yahoo Chat cause its easy to trick there and there's an Age Section as 40-60 Above. Blah blah blah blah.

To get pedo.

You need a

*Rat

*email

*any messenger but yahoo i prefer

*Social engineering

*Brain on how to use a rat

*Basic Computer Skills

*A VPN

First off why you need a rat(Remote Administration Tool)

as you need that because to get evidence.

And its the easiest way to communicate as it have a feature that you can send a message directly to there pc's and no need to worry about getting block or whatnot.

Second Email as we need this so that the pedo know's where to send the money

Third Messenger as to communicate to the pedo's to bait them

You all know how to use social engineering/How to use a rat/VPN and you guys know how to use a rat.

Here's how you do .

First go to yahoo chat or Chat avenue and go to the room entitled as Teen's/Live Chat/General Chat.

Because as many pedo's there most likely go there and target innocent people.

Then Just go there and post it "accidentally" like Here's a Picture of me "Download link" then say oops wrong post :(

Then as you will notice people will just Download your picture

and they will pm you like asl/ How are you/ hi/Do you have a messenger?

The only thing they dont know about the Picture is its binded with a rat :)

Now thats all you need just scan on there file's and if you dont find any Child pron. Just Download it to them as you can download them file's thats one reason i like rats :)

Then you just Send a message to them Saying "This is Mike Wizaoswki From International Cyber

Child Protection Agency or just make a legit name and just mess with him.

Like We just recieved a tip from a concerned Citizen in your (where he lives as he would freak cause you will know where he live's and its more legit) that you have interacting with underage girls online

Or make something like that.

And just ask them Money and sent it to this email/paypal address

Note : DONT POST that this is a Leet Haxor that hacked and you and found that your a pedophile i'm gonna report your BLAH BLAH BLAH BLAh.

well here's my tutorial :)

Boxing - March 30, 2011, 1:34 pm

Haha, cool guide.

A lot of it is common sense though.

Braniac - March 30, 2011, 1:58 pm

Yeah

well mostly is just the easiest way for me to bait and target pedo's :)

Barely any posts :(

Xeder - March 30, 2011, 2:25 pm

There is only 1 small con, if you write that you are from some kind of agency and you say that he will have problems with law if he doesn't pay, he will for sure know that you are bluffing and that he has some shit on his comp (unless he is total moron), becouse noone from federal agency will tell person to pay some \$ in order not to get into prison;/. So over all it is easier to sell him some photos and/or blackmail him with some kind of proof.

Braniac - March 30, 2011, 2:37 pm

Dude . just make up a story its much easier :(. the name i gave there was just an make up legit name :)

and dude its for attracting Moron People as in Dumb pedophiles :)

Wow. This was interesting.

I liked reading it.

Thanks for the info.

I cant RAT on my system. One problem.

Nevertheless, i can SE =)

SilvosQuirk - August 12, 2011, 10:53 pm

Brief but comprehensive. Thanks for the guide, bro.
