Thread: [research of tutorial] how to make a rat that bypass window antivirus

Jigglypute - *June 12, 2022, 11:55 am*

hey people, i'm trying to make an remote access trojan in c++, but i don't find intersting resource and i don't want use fatrat like a script kiddy, someone have some resource to make a rat that can bypass the window antivirus?

Fenonym - *October 7, 2022, 9:03 am*

i wan't to know that too haha thanks :)

The whole idea is if you use someone elses code, you are a script kiddy.
If you want to do it yourself, start here:
https://www.w3schools.com/cpp/default.asp
Spoiler (Click to View)
Then just search here:
https://www.youtube.com/

We don't need any more half ripped malware.
