[DOWNLOADING LINK](#)

ENJOY !! ?

No one need this collection

samee2009 - April 2, 2011, 12:02 am

Thank..u..very much..for nice sharing..

Lucifer Morningstar - April 2, 2011, 12:15 am

virus scan please.

hope it works gona test it on vm and sandboxYeH :')

Technical Department - April 2, 2011, 12:36 am

thankz for share

:)

msg too short

lol

btw, maybe anyone has syrian shell v4???

anyone???

or gny v2 w/ safemode turnoff

gaccount - April 2, 2011, 1:22 am

Thank you everyone for your wonderful comments..

Mudkip - April 2, 2011, 3:05 am

It would be better if you set up a site with separate text files of sources.

gaccount - April 2, 2011, 3:40 am

kk..

i will think about that...

blake1996 - April 3, 2011, 1:20 pm

thanks dude

too shorttyt

gaccount - April 4, 2011, 9:14 am

thnx guys.

complements are always Welcome !!

bhavanshu - April 4, 2011, 12:58 pm

nice share dude.. keep it up

lr00tstuff - April 4, 2011, 1:24 pm

Thanks for posting this .

iSaRaYloVeR - April 4, 2011, 7:44 pm

I would dowload this but i don't like sharing shells ;/ thanks tho

caosinf - April 4, 2011, 8:23 pm

thanks ..nice colection. i will save all

Ghost? - April 4, 2011, 10:11 pm

I alreDy had all these.

Nice share though.

nick342 - April 12, 2011, 2:41 am

define shell please, and explain how it functions please

/noob here

wasabi-kun - April 12, 2011, 8:01 am

thanks for sharing

ttttooshortttt

gaccount - April 13, 2011, 3:07 am

THANKS GUYS FOR YOUR COMMENTS

Hackering99 - April 13, 2011, 3:25 am

It is malware.

Message to short..

gaccount - April 13, 2011, 11:29 am

This is a small collection of SHELLS..

some shells can be infected due to their script

darkcodec - April 13, 2011, 11:51 am

how do I use it to in defacing a website...

gaccount - April 14, 2011, 8:50 am

First of all if you have HACKED any website then find a place where you can upload PHP files or images then first upload your shell in the form of PHP if it shows an error then open your shell from NOTEPAD and save it as yourshell.php.png or gif,jpeg then after uploading then open the site and find your file after that right click and click on copy image location and now you can upload your shell....

craterbear - April 14, 2011, 3:21 pm

thanks heaps, these were really useful!!!! :D

Grey-Tech - April 14, 2011, 6:24 pm

Nice share, thanks a lot :)

«v?s??1337» - April 14, 2011, 6:34 pm

Thanks for this. Also, guys, what is the best shell in your opinion?

gaccount - April 15, 2011, 8:02 am

thnx guys....and from my opinion JACKAL v1.3 is the BEST....

Syknev - April 15, 2011, 8:20 am

thanks very much xD :D

KeeP Up :D

vaibhuvcool@gmail.com - April 15, 2011, 8:23 am

Nice Share dude....this will be helpful :)

bluemvj - April 15, 2011, 9:28 am

guuys i am noobie can anyone tell what they do and how to use them

moorekay3030 - April 15, 2011, 9:30 am

thanx for the share, this will come in handy :)

Mr.TerrorisT - April 15, 2011, 10:05 am

thank u very much for posting this thread

Scavok - April 15, 2011, 1:06 pm

Good share i will downlaod when i get home :)

gaccount - April 16, 2011, 1:40 am

Thanks guys..

and bluemvj : by uploading SHELLS we can go to any DIRECTORY of website without password..

bluemvj - April 16, 2011, 1:56 am

guys please explain me how to use them ...:-))

Although all PHP Shell's are detected as a Virus... Okay then you have fun carrying on that option.

gaccount - April 16, 2011, 10:52 am

(Apr 16, 2011 01:56 AM)bluenvj Wrote: [\[CITE\]](#) guys please explain me how to use them ...:-))

Buddy its quite easy.... you have to upload your shell on the site..in the form of an image or in the form of PHP then open the site and find your shell EXAMPLE :- If i have uploaded my shell in the form of an IMAGE in the website's Album section then i will open the site and i will find my image and then right click on it and click on COPY IMAGE LOCATION then you will be in the WEBSITE's DIRECTORY !! then just replace the INDEX file with your DEFACE PAGE....

and if still you have problem then just PM me i will be happy to help you ?
