Thread: Shopify Developer

web0m - *January 4, 2023, 11:45 am*

Hello,

I currently have a real life customer, who wants some changes made to their Shopify store.
Unfortunately, I am caught up in other projects.

Therefore, I am looking for someone who might be able to help out making these adjustments.
It's not really a lot, and not really a little, it's a decent amount of work, maybe a day of work, and it's not too difficult.

Let me know if you have experience developing on Shopify stores, and I will give you more information.
I require some portfolio, or that I feel like I can deem you trusted, as this is real life clients, and I will be held responsible for whatever happens to the store.

Yo.

I do have some experience with Shopify. Is this about a custom theme/app ? Or just some simple changes here and there ?
Could you send me details regarding those adjustments ?

It requires coding knowledge.
Such as, HTML, CSS, JS

Hi,

I have worked with Shopify quite a lot and worked within web development industry for 8+ years, drop me a message and I can show you some work and hopefully can come to an agreement.

If they need email support then I would appreciate if you refer me, I currently handle email and social media support for a couple of ecommerce stores.
