Thread: [Deface Homepage Generator V4 \[FREE\]](#)

Mefjus - April 1, 2011, 6:27 am

Hello Hackforums.net

[img]http://mablutze.at/Video.gif[/img]

[img]http://img405.imageshack.us/img405/4664/progh.png[/img]

I have coded a Deface Homepage Generator in JAVA!

Example Page : <http://mablutze.fileave.com/owned.html>

Download : [Here](#)

VSCAN : Spoiler ([Click to View](#))

<http://www.virustotal.com/file-scan/report.html?id=ead3adfc2b1ae8e57d25d0c05badeb54e5014030303981ad9d1fd8350f693f29-1301664188>

Spoiler

This is my first program :D If this tool is useful, i will program more !

Change LOG:

Quote:V2: Added a Youtube Music changer!

V3: Some bug fixes

V4: New structure of the source... No more /data/ folder need!

Greetz mablutze aka gazug!

Daddy???????????? - April 1, 2011, 6:30 am

dude he didnt make this thats a lie that was posted in the hacking tools and programs section i got it from there and this guy did not make this

chrolode - April 1, 2011, 6:34 am

:D

Very advanced guy ^^

Spoiler ([Click to View](#))

message too short

Mefjus - April 1, 2011, 8:48 am

;D ideas for version v5?

tooo short :D

Stenography - April 1, 2011, 12:12 pm

can someone explain me please how the f*ck i run it ?

Mefjus - April 1, 2011, 12:16 pm

do you have installed java?

run it with javaw.exe

snake_escape - April 1, 2011, 12:47 pm

Why would you even want this...Everyone is going to think that their websites are defaced by the same person

Tizen - April 1, 2011, 4:07 pm

0 rep, 67 posts, normal user, V4 already... very suspicious, not gonna try it.

-mothered- - April 1, 2011, 6:25 pm

You can always opt to execute via Sandboxie, or better still, a Virtual Machine.

Mefjus - April 5, 2011, 1:00 pm

push it up!

working on new version!

sry :D i am the coder :D

my name is "mablutze" in some forums and in others "gazug"

sry :D probably i will change it!

greetz

Reyce - April 11, 2012, 6:53 pm

update please download down thanks :)
