Thread: [Invoke the Command-Line Compiler - Simple Way To Compile Net](#)

no1me - April 1, 2011, 7:10 am

i see post that some one ask about bat to exe and i begin to check

what i find is this method very simple (the smart guys will know what they can do with this)

vbc.exe /imports:Microsoft.VisualBasic,System Source.vb.

[http://msdn.microsoft.com/en-us/library/380cz5k4\(v=vs.80\).aspx](http://msdn.microsoft.com/en-us/library/380cz5k4(v=vs.80).aspx)

Enjoy

Ph03.nix - April 2, 2011, 3:26 pm

I found this out while playing around with runpes on 64bit ?

It's very useful to compile code from stubs

I didn't know how to exactly handle the imports

Thanks for posting ?

Keep it up!

no1me - December 7, 2011, 10:43 am

i dont know why ppl dont use it ! just one line of code . maybe i make vid that show how powerful this can be .

wertyl11 - December 7, 2011, 11:11 am

Ah this is nice.

Tested it and it worked perfectly :)

Thank you for this <333

If you used this you would need VB installed though.

yeah, you talk right, allmost the same

nice search mate ?

Invoke - December 8, 2011, 12:33 am

Saw my name in the title, came to the thread...

sadface

Nothing about me.

sadface

Nothing about me.Lmaoo!

Thanks for pointing this out OP, although I already knew about it I found something on the MSDN page that I've needed for a while, so thanks for posting. ?
