Thread: Visual Basic & WebKits. [TuT] No More IE Control!

HackFox - *August 20, 2010, 8:46 am*

Visual Basic & Webkits

As you know google chrome uses a webkit for the websites rendering. And as you can understand it's way faster then the normal Internet Explorer. As i believe one of all the coders plans is to start off making a WebBrowser, well i am here to help you making it more effective and fast. The way to put WebKit in our browser, hears in the name WebKit.NET. After you download it lets see how to set it up.

1)Make a new project in VB
2)Go to the toolbox and right click. Then select Choose Items… and choose the file webkitbrowser.dll from bin WebKit.NET-0.5 Pre release.
[img]http://a.imageshack.us/img687/3020/webkit2.png[/img]
After you put it in your form let's simply name it webkit_browser. And in Form1_Load or in a Button , Simply write:

webkit_browser.navigate("www.google.com")

Before you run the program somewhere put the content of the bin [the file that you downloaded] in the content of your new application in the disk [debug/release]. Differently your tries will be pointless.

Questions & Answers:
1) Q: I get this error when debugging from VB Spoiler (Click to View)
[img]http://a.imageshack.us/img831/2448/errorgv.png[/img]
A: If you get this error please try running it directly from the debug/release folder or google it Spoiler (Click to View)[img]http://a.imageshack.us/img843/6788/answer.png[/img]
Note: Make sure to read the most important part of the thread

Damn 50 views 1 reply . Nice leech :\

Kotei - *August 20, 2010, 10:27 am*
Never really used web browsers anyways, but nice.
Also guys just because there are low posts to views doesn't mean people are leeching..
Maybe they just have no use for this like me.

Yeah thats still a true theory
and thanks for the reply mate

No problem i just posted this to help
People learn what webkits are and showing them an example
Since they all use IE Control webkits will help them make their browser
not a really common one but advanced faster and effective
Thanks guys for replying i will be waiting for more
Best regards,
HackFox

Coder - *August 20, 2010, 10:51 am*
Thanks for this tutorial, I thought this would be harder. :)

Care - *August 20, 2010, 11:01 am*
Thank you, sir. I'm starting to get into programming and coding, and this is gonna help out a lot.
