Thread: [My Very First Program \(More Simple Program Does not Exists\)](#)

xGin - April 3, 2011, 9:42 am

Hi Hackforums ?

So i Decided to make my first program.

Its a simple "Launcher" that launches like Facebook, Youtube and so on...

It is a very simple program, So DONT make fun of my Noobness >.<

Download:

Paranoid - April 3, 2011, 9:44 am

Got any pics bro? What's the use of this?

Doctor07 - April 3, 2011, 9:48 am

(Apr 3, 2011 09:44 AM)yay Wrote: ([CITE](#)) Got any pics bro? What's the use of this?

I Decompiled and looked at the source code, it looks like a program that opens a specific program/page on the click of a labeled button.

Pic of this program.

And the "?" button:D:D:D

h4yR0 - April 3, 2011, 10:16 am

Uses Process .Start (" bla bla .. ")

But good if it's your first program ,hope you will learn much more than this on HF

versx - April 3, 2011, 11:28 am

If it's actually your first program, then at least it's not one of those simple hello worlds lol. Keep it up!

Cody8295 - April 3, 2011, 11:40 am

As long as it's not a C&P'd crypter. Good job.

Cody8295 - April 3, 2011, 1:19 pm

Calm down with the flaming, guys.

Fake. - April 3, 2011, 2:34 pm

Get outta here, simpler programs do exist.

Anyway, nice to see you're learning.

MC111 - April 3, 2011, 2:47 pm

I've just started learning VB (going to college in August to do software development thought I might as well get a head start) and this seems a very good first ^^ keep up the good work. Also nice RS link, I have # pro so it worked out better for the download lol.

SeRCH4 - April 3, 2011, 3:48 pm

Could you by any chance PM me the Source...

Just trying to learn and reading lot of sources lately.

Thanks.

Kid Wiz - April 3, 2011, 4:18 pm

Show us some screen shots.

xGin - April 4, 2011, 7:25 am

look in the comments lol, There's one with a picture :D

Maceme - April 4, 2011, 7:28 am

This would be awesome with it running in the background, and if you type "facebook" it runs...Well facebook.

Keep it up

Gooples - April 4, 2011, 7:40 am

That is very nice, you should make a better gui though.

Modestep - April 4, 2011, 7:51 am

Just trying to learn and reading lot of sources lately.

Thanks. The code is like this:

Code Process.Start("www.facebook.com") This opens facebook, you can put different urls etc..

Pussy Cat - April 4, 2011, 8:13 am

If this is your first program ever in VB then good job ? Good luck on learning more.

chester1997 - April 4, 2011, 8:18 am

Nice program Try learning how to make clocks and calculators and other basic stuff.

xGin - April 4, 2011, 8:22 am

I need a tutor guys, Please add my skype lol1234549 >_<

xGin - April 6, 2011, 6:49 am

Guys tell me anything that i can improve (except gui)

ident - April 6, 2011, 9:56 am

(Apr 6, 2011 06:49 AM)CeTeX1337 Wrote: [\[CITE\]](#) Guys tell me anything that i can improve (except gui)

Rather then duplicating the code create a new class to handle the execution of processes (process manager)

MouseDesign - April 6, 2011, 10:06 am

There are more simple programs than that mate. When you first start learning VB.net in school for example you learn how to calculate the sum of 2 - by the user inserted - numbers. So, good job.

H4ckThePlanet - April 6, 2011, 10:08 am
