Thread: Intro I made for Krazy Beast

___GS___ - *August 21, 2010, 8:40 am*

Made it using After Effects and Sony Vegas 9. What do you guys think?

I don't make them for friends of friends sorry. I need to finish the intros I need to do now then I can start on other requests and I'll most likely start charging for them.

Doesn't mean you won't get an intro though. :) I'll be making a thread on it shortly. I still want to continue making intros for people, it's great practice. You might just have to wait longer than everybody else. :P

Nah, it was the first intro I made for someone and I made it because the other guy that was supposed to make his intro couldn't so I kind of felt bad.

LouisWilliams - *August 31, 2010, 7:27 pm*
Gold sound. wanna give me the template for this?

): i need to make an intro for my YT channel

That was pretty nice. The one thing that I found that almost killed it was the lens flare at the end. Everything about the lens flare was off. Color, animation, transition, ect.
You should have given it a color to match the rest of the video (ex. dark blue). The animation should have been more smooth. It just appears and its just sitting there for a bit, then it moves. It should maybe have started on the right off of the frame and just animated across the screen.
And the last thing you could do to enhance the effect alot is, while the lens flare is going across, you could add a camera shake (wiggle expression or wiggler). Very subtle camera shake nothing crazy. And then after the shake, have those particles become distorted, as if the lens flare just shot through and distorted their position.

Ahh other then that it was pretty cool. Nice font selection too. Maybe add a glow?
