Thread: [\[TUT\] Untethered Jailbreak For 4.3.1/4.3.2 And Now 4.3.3! \[+Video\]](#)

AnthonyWasH3r3 - April 3, 2011, 10:54 pm

Hello HF! The wait is finally over, there is now an untethered jailbreak for 4.3.1, 4.3.2, and 4.3.3 for the iPhone 3GS/4, iPod 4G/3G, and iPad 1G, AppleTV 2G!

(Note: This guide was written for 4.3.1 but it works exactly the same for 4.3.2 and 4.3.3)

If you ran a tethered version, you can just run the untethered version right over it without restoring. Please visit [The Dev Team Blog](#) for more information.

VIDEO:

<http://www.youtube.com/watch?v=fg71umK6sPs> -Same method for 4.3.1/4.3.2/4.3.3

Before We Begin

- Backup your iDevice with iTunes.
- If you are using windows 7, you may need to run it in windows xp sp2
- If you are on 4.3 or anything else below, upgrade to 4.3.1 or 4.3.2 first

Required Downloads

4.3.1

- RedSn0w [\[Win\]](#)[\[Mac\]](#)
- Or PwnageTool for Mac [\[Torrent Link Download\]](#)

4.3.2

- RedSn0w [\[Win\]](#) [\[Mac\]](#)
- Or PwnageTool [\[Torrent Link Download\]](#)

4.3.3

- RedSn0w[\[Win\]](#)[\[Mac\]](#)
- Or PwnageTool [\[Torrent Link Download\]](#)

IPSW's

- 4.3.1/4.3.2/4.3.3 IPSW for your iDevice: [LIST](#)

(If the link is down for the IPSWs then click the spoiler)

Spoiler [\(Click to View\)](#) You can either google it and download from another site, or you can download 4.3.2 from iTunes and then find it in these folders, depending on the OS:

Quote:Mac OS X: ~/Library/iTunes/iPhone Software Updates

Windows XP: \Documents and Settings\username\Application Data\Apple Computer\iTunes\iPhone Software Updates

Windows Vista & Windows 7: \Users\username\AppData\Roaming\Apple Computer\iTunes\iPhone Software Updates

You can either use RedSn0w, or PwnageTool.

Step 1-Redsn0w

- Open RedSn0w
- Select your IPSW
- Click next while it loads the jailbreak

Step 2

- Check your options
- Click next

Spoiler ([Click to View](#))

[img]http://img12.imageshack.us/img12/8937/screenshot20110404at123.png[/img]

Step 3

- Get your iDevice ready and click next
- Follow the on screen instructions

Spoiler ([Click to View](#))

[img]http://img28.imageshack.us/img28/8937/screenshot20110404at123.png[/img]

[img]http://img543.imageshack.us/img543/8937/screenshot20110404at123.png[/img]

Step 4

- Wait :P

Step 5

- When your device turns back on, you should see Cydia!

Step 1-PwnageTool

- Open PwnageTool
- Select Expert Mode
- Select your iDevice

Spoiler ([Click to View](#))

[img]http://img829.imageshack.us/img829/115/screenshot20110404at122.png[/img]

Step 2

- Browse for IPSW
- Select your options
- Build your IPSW

Spoiler ([Click to View](#))

[img]http://img195.imageshack.us/img195/115/screenshot20110404at122.png[/img]

[img]http://img860.imageshack.us/img860/115/screenshot20110404at122.png[/img]

Step 3

- Connect Device to USB and follow the instructions

Spoiler ([Click to View](#))

[img]http://img545.imageshack.us/img545/8937/screenshot20110404at123.png[/img]

Step 4

- Look through some helpful iPhone guides while you wait :P

Step 5

-If all goes well, you should see Cydia somewhere on your springboard!

? Congratulations, you now have an untethered jailbroken 4.3/4.3.1 iDevice!?

If this tutorial has helped you, or you are having some problems with this, post below

quickshift - April 3, 2011, 11:13 pm

already did this like 10 minutes ago or I would've used this guide. Also to anyone using Windows 7 32 bit you may need to run it in compatibility mode with windows xp sp2.

AnthonyWasH3r3 - April 3, 2011, 11:36 pm

(Apr 3, 2011 11:13 PM)quickshift Wrote: [\[CITE\]](#) already did this like 10 minutes ago or I would've used this guide. Also to anyone using Windows 7 32 bit you may need to run it in compatibility mode with windows xp sp2.

Oh, yeah. Forgot about that. Added that in there. Thanks!

ExoMemphiz - April 4, 2011, 1:11 am

Awesome guide, and nicely released after such a short time after the Jailbreak came out!

Good job, you've got everything that you need to know!

AnthonyWasH3r3 - April 4, 2011, 1:18 am

(Apr 4, 2011 01:11 AM)ExoMemphiz Wrote: [\[CITE\]](#) Awesome guide, and nicely released after such a short time after the Jailbreak came out!

Good job, you've got everything that you need to know!

Thanks man! I've been waiting all day for this lol.

Video is in the process of being uploaded to YouTube.

AnthonyWasH3r3 - April 4, 2011, 4:59 am

(Apr 4, 2011 01:46 AM)khanisgr8 Wrote: [\[CITE\]](#) i will be able to unlock my device on this jailbreak ?

i got 3gs

version 4.2.1

new boot loader

modem firmware 06.15.00

its unlock but tethered jailbreak (means when ever my mobile off i need to start it by using redsn0w)

No sorry. Ultrasn0w unlockers need to stay away for now.

101 - April 4, 2011, 5:38 am

What's new in the 4.3 iOS?

SuckMyDong - April 4, 2011, 6:07 am

Thanks for this man

Got my 3gs jailbroken now :)

AnthonyWasH3r3 - April 4, 2011, 6:08 am

Honestly, I don't know :P I think faster safari and native wifi tethering.

There isn't custom animated bootlogos (or atleast I don't think there is) so if you're on 4.2.1 jailbroken with greenpois0n, you can leave it and be fine.

(Apr 4, 2011 06:07 AM)MRblack Wrote: [\[CITE\]](#) Thanks for this man

Got my 3gs jailbroken now :)

No problem! Glad to help out :D

iStandUp - April 4, 2011, 2:26 pm

<http://www.felixbruns.de/iPod/firmware/>

Link's down.

AnthonyWasH3r3 - April 4, 2011, 2:34 pm

(Apr 4, 2011 02:26 PM)Ashokfarts Wrote: [\[CITE\]](#) <http://www.felixbruns.de/iPod/firmware/>

Link's down.

Thanks for notifying me. You can download it from another site if you find one, or you can download it straight from iTunes.

After you download it from iTunes, when looking for the IPSW, look in these following folders, depending on what OS you have:

Quote:Mac OS X: ~/Library/iTunes/iPhone Software Updates

Windows XP: \Documents and Settings\username\Application Data\Apple Computer\iTunes\iPhone Software Updates

Windows Vista & Windows 7: \Users\username\AppData\Roaming\Apple Computer\iTunes\iPhone Software Updates

I'll be sure to include this in the tutorial

101 - April 4, 2011, 3:36 pm

I'm still on 4.0.2 lol! I cbf jail breaking newer iOS until there is a good enough reason.

AnthonyWasH3r3 - April 4, 2011, 3:44 pm

(Apr 4, 2011 03:36 PM)101 Wrote: [\[CITE\]](#) I'm still on 4.0.2 lol! I cbf jail breaking newer iOS until there is a good enough reason.

Lol. Here is a guide you might want to look at for information about 4.3:

<http://www.tuaw.com/2011/03/04/ios-4-3-brings-a-handful-of-new-features-and-new-headaches/>

The main things are Personal Hotspot, and iTunes Home Sharing which allows you to stream all kinds of content from your Mac to your iDevice (not sure if it works for Windows), and a faster Safari

paulos - April 5, 2011, 1:29 pm

Awesome job :D Thank you for the share.

- And very easy to read :D

AnthonyWasH3r3 - April 6, 2011, 10:55 am

(Apr 5, 2011 01:29 PM)paulos Wrote: [\[CITE\]](#) Awesome job :D Thank you for the share.

Thanks man! I'm glad it helped. (:

Tunasty - April 7, 2011, 12:24 am

Nice tutorial bro. i didnt know 4.3.1 is out. good to know :)

Chaos Water - April 7, 2011, 12:46 am

To bad Apple stopped iOS Upgrades for iPod Touch 2G, they're not even worth half the price they were when they first came out!

Zry0Pwn - April 7, 2011, 10:53 am

Worked fine on 8GB 4G but after i could not connect to my wifi? Please help

AnthonyWasH3r3 - April 7, 2011, 11:36 am

(Apr 7, 2011 10:53 AM)iTz Ryannn x Wrote: [\[CITE\]](#) Worked fine on 8GB 4G but after i could not connect to my wifi? Please help

I heard of that happening in some cases, mostly because of 4.3.1. Have you even been connected to your wifi while on 4.3.1? Before the jailbreak?

"h3l1m@n" - April 7, 2011, 4:38 pm

you got any information whether UltraSn0w will come for new bootloader and 4.3.1 or not?

AnthonyWasH3r3 - April 7, 2011, 7:14 pm

(Apr 7, 2011 04:38 PM)-"h3l1m@n"- Wrote: [\[CITE\]](#) you got any information whether UltraSn0w will come for new bootloader and 4.3.1 or not?

I'm not sure what UltraSn0w will come out with.

Legit Dude - April 7, 2011, 8:44 pm

Jail breaking includes free songs and apps from iTunes correct?

Zry0Pwn - April 7, 2011, 10:51 pm

(Apr 7, 2011 11:36 AM)AnthonyWasH3r3 Wrote: [\[CITE\]](#) I heard of that happening in some cases, mostly because of 4.3.1. Have you even been connected to your wifi while on 4.3.1? Before the jailbreak?

Yes I was able to connect before and I have now found a fix

You have to forget your network switch your. iPod/iPhone off and your modem/router and switch both back on and it should be fine

AnthonyWasH3r3 - April 7, 2011, 11:39 pm

(Apr 7, 2011 08:44 PM)Legit Dude Wrote: [\[CITE\]](#) Jail breaking includes free songs and apps from iTunes correct?

Yeah, you can D/L songs on your iPod for free along with cracked app store apps

and glad it's working Ryan. I'll remember that, thanks.

Chaos Water - April 8, 2011, 12:05 am

(Apr 7, 2011 10:53 AM)iTz Ryannn x Wrote: [\[CITE\]](#) Worked fine on 8GB 4G but after i could not connect to my wifi? Please help

After upgrading my iPod Touch 2G to iOS 4.2.1 I had an issue where I would connect to a WiFi an it would continuously connect and disconnect, I didn't seem to find a fix but me, you and many others experience the same issue after upgrading the firmware/jailbreaking.

AnthonyWasH3r3 - April 10, 2011, 8:45 am

(Apr 7, 2011 04:38 PM)-"h3l1m@n"- Wrote: [\[CITE\]](#) you got any information whether UltraSn0w will come for new bootloader and 4.3.1 or not?

I've updated this post to show information about UltraSn0w

iCyber Attack - April 10, 2011, 9:02 am

Great tutorial, you really have to be slow if you cannot follow this. Jailbroke my phone in 5min ;)

XHACKERX - April 11, 2011, 6:07 pm

Can someone help i jailbroke it like 3 days ago but today i shut it off for about 10 hours but now it keeps saying my credit card info is messed up but its not please help

AnthonyWasH3r3 - April 11, 2011, 6:21 pm

(Apr 11, 2011 06:07 PM)XHACKERX Wrote: [\[CITE\]](#) Can someone help i jailbroke it like 3 days ago but today i shut it off for about 10 hours but now it keeps saying my credit card info is messed up but its not please help

You mean with iTunes and the App Store? The jailbreak would have nothing to do with that. Just enter your info back in.

XHACKERX - April 11, 2011, 6:29 pm

I did that but it says invalid and im guessing itunes wont let me gett all theese apps for free idk why it stopes working

And ive tryed using other cards an they all said sercurity code invalid

AnthonyWasH3r3 - April 11, 2011, 6:50 pm

I think I heard of that problem happening before. Try restoring and trying again.

vaan14 - April 11, 2011, 7:57 pm

i got an ipod touch 2g also, what would happen if i were to actually do the untethered 4.3.1??

AnthonyWasH3r3 - April 11, 2011, 7:59 pm

(Apr 11, 2011 07:57 PM)vaan14 Wrote: [\[CITE\]](#) i got an ipod touch 2g also, what would happen if i were to actually do the untethered 4.3.1??

You can't :P you couldn't even get on 4.3.1.

Notizen - April 11, 2011, 9:14 pm

I updated to 4.3.1 the other day because my 4.2.1 Jailbreak was having some issues. Ever since updating and jailbreaking (yes I clean restored before I jailbroke again) I've been getting horrible physical memory usage. I used to get around 150mbs of free memory now I only have around 90 normally. I'm probably just going to downgrade to 4.2.1 but I was just wondering if anyone else has been having similar issues?

lucygoose - April 12, 2011, 4:06 am

hi, umm i only just found out about this jailbreaking thing and ive tried, but it doesnt work. im currently using redsn0w on windows vista 32bit. ive changed the compatibility and set it to run as administrator, ive also tried holding down the home button the whole time while it's uploading, xept none of these have worked? redsn0w keeps crashing as soon as it gets to "uploading ramdisk" any help is greatly appreciated =D

GreenLee - April 12, 2011, 5:28 am

Wow bro I love your tutorial thank a lot man!

AnthonyWasH3r3 - April 12, 2011, 5:45 am

Thanks so much man, It means a lot. And I'm glad I helped (: I'll pm you my address.

XHACKERX - April 12, 2011, 4:14 pm

Can someone please help me Im using Installous for iPhone 4 and i keep getting an API Unavailable error please help i need my apps :D

AnthonyWasH3r3 - April 12, 2011, 4:35 pm

(Apr 12, 2011 04:14 PM)XHACKERX Wrote: [\[CITE\]](#) Can someone please help me Im using Installous for iPhone 4 and i keep getting an API Unavailable error please help i need my apps :D That should really be in a separate thread.

narcpharr - April 13, 2011, 1:10 pm

Involving the API error, I had the same problem along with no service. I fixed this however by adding <http://cydia.pushfix.info> as a source in cydia, installing pushfix.info, restarting, then downloading Ultrasn0w fixer for 4.3.1 from the same source. I had to restart the phone following ultrasnow and no it still didn't work. But after restoring my phone using the same customize ipsw, both problems were fixed.

I dont think it was just luck as I had tried restoring to fix the problem 4+ beforehand and apparently certain basebands were only effected by this jailbreak. BTW I used pwnagetool 4.3

AnthonyWasH3r3 - April 26, 2011, 7:14 pm

I have updated this post to include 4.3.2.

'Snorlax - April 27, 2011, 1:22 am

What if I take my iPhone 3Gs which is jailbroken in 4.2.1, and upgrade to 4.3.2, and then jailbreak it?

Will I loose any apps, or do I have to install them all again?

AnthonyWasH3r3 - April 27, 2011, 5:26 am

(Apr 27, 2011 01:22 AM)Snorlax Wrote: [\[CITE\]](#) What if I take my iPhone 3Gs which is jailbroken in 4.2.1, and upgrade to 4.3.2, and then jailbreak it?

I'm assuming you use installous. So make sure you have appsync from the hackulous source and backup/transfer purchases to iTunes. Then upgrade, restore from backup, jailbreak, get appsync, connect to iTunes and sync installous apps back to your phone. I kinda wrote that in a hurry, if you need any more info or are confused, feel free to PM me. I'll get back to you as soon as I can. I'm rather busy today :P

goligautham - May 5, 2011, 9:55 am

Does firmware version affect the jailbreaking process??

iOS: 4.3.2[8g4]

firmwareversion: 04.10.01

Can this iPhone 4 be jailbroken???

Using RedSn0w??

AnthonyWasH3r3 - May 5, 2011, 10:02 am

hello, i have iphone 4, (version 4.3.2) and its on 3 contract and the phone is not unlocked, could i still use one of them software to jailbreak it?

AnthonyWasH3r3 - May 5, 2011, 12:24 pm

(May 5, 2011 11:47 AM)pirzada01 Wrote: [\[CITE\]](#) hello, i have iphone 4, (version 4.3.2) and its on 3 contract and the phone is not unlocked, could i still use one of them software to jailbreak it?

Yeah you can jailbreak. But you can't unlock unless you preserved your baseband before upgrading.

(May 5, 2011 11:47 AM)pirzada01 Wrote: [\[CITE\]](#) hello, i have iphone 4, (version 4.3.2) and its on 3 contract and the phone is not unlocked, could i still use one of them software to jailbreak it?

Yeah you can jailbreak. But you can't unlock unless you preserved your baseband before

upgrading.

pirzada01 - May 5, 2011, 12:37 pm

thanks, er what do u recon would be better redsn0w or the other one, i jst want the safst, one and on options of redsn0w do i jst click install cydia?

AnthonyWasH3r3 - May 5, 2011, 12:44 pm

Well if you have a Mac, then use pwnagetool. If not then redsn0w is the best option. And yes, check install cydia.

pirzada01 - May 5, 2011, 12:47 pm

thanks alot :D
gonna try this
got any precautions? before i try

AnthonyWasH3r3 - May 5, 2011, 1:30 pm

no problem man! I'm glad it helped.

To get paid apps, go into cydia and go to manage, then sources, and then edit and add cydia.hackulo.us as a source.

Then download installous and THEN you can download paid apps for free (cracked)

pirzada01 - May 5, 2011, 3:22 pm

hey, i pmed u but i mite aswel post here jst incase some1 else has the problem but after ii installed this, all my old apps are not loading up any fixes?

edit: found out that signing out and re signing in from store makes it work

AnthonyWasH3r3 - May 5, 2011, 3:53 pm

(May 5, 2011 03:22 PM)pirzada01 Wrote: [\[CITE\]](#) hey, i pmed u but i mite aswel post here jst incase some1 else has the problem but after ii installed this, all my old apps are not loading up any fixes?

It's on the dev team blog.

https://sites.google.com/a/iphone-dev.com/files/home/redsn0w_win_0.9.6rc15.zip?attredirects=0&d=1

And you browse for the 4.3.3 firmware.

[Rn] 7s^2 - May 6, 2011, 7:07 am

WOOT! Successfully jailbreaked untethered for 4.3.3 :D

Thanks hack forums

thanks anthony

how to confirm that I jailbreaked my ipod touch UNTETHERED??

AnthonyWasH3r3 - May 6, 2011, 7:44 am

Lol. Turn it off and turn it back on. And you're welcome man!

[Rn] 7s^2 - May 6, 2011, 8:00 am

I turned off and turned it back off but nothing special happens :D it was same as new when I bought :D is it ok?

AnthonyWasH3r3 - May 6, 2011, 8:29 am

You can still use cydia, right? That's untethered.

[Rn] 7s^2 - May 6, 2011, 9:38 am

Yea I can use cydia but no wifi :(Anyway I am downloading gangsta miami vindiction game from PC

AnthonyWasH3r3 - May 6, 2011, 10:02 am

Well that means it's untethered so you're good man.

iislight - May 12, 2011, 3:47 pm

Going to jailbreak a 4G ipod touch 4.3.3 firmware, On a PC Windows 7.

It worked, Thanks for jailbreak.

AnthonyWasH3r3 - May 12, 2011, 7:24 pm

Glad it worked for you man!

Maundz - May 14, 2011, 9:49 am

Im having some trouble with the ipsw i cannot find it in the browser for redsnow Also will this unlock my sim car carrier if anyone can help me (Teamview) there may b a suprise

xb0y - May 15, 2011, 1:36 am

I accidently updated my Iphone 3gs to V 4.3.3(8J2) Baseband : 05.16.02

and now it became shit :|

i can't play games :(

will your this Tuto work ?

Tx

Swish - May 15, 2011, 6:26 am

I got problems when jailbreaking my iPad.

I get stuck at "Exploiting with limra1n". Nothing happens after that.

I have tried it on 3 different computers. Two with Windows 7 & one with Vista. I have been running the the program as administrator & in Windows XP Service Pack 2/3 Compability Mode.

I have searched for a whole day now without any results that could help me.

Please, I really need help!

Thanks

AnthonyWash3r3 - May 15, 2011, 8:10 am

Sorry for the delay guys.

(May 14, 2011 09:49 AM)Westside Wrote: [\[CITE\]](#) Im having some trouble with the ipsw i cannot find it in the browser for redsnow Also will this unlock my sim car carrier if anyone can help me (Teamview) there may b a suprise

Make sure you downloaded it all the way and make sure that it is for the version you are on. It will not be able to unlock your sim, but you may be able to depending on the type of phone you have and the baseband. I might be able to help you later if you still have trouble on teamviewer.

(May 15, 2011 01:36 AM)X-b0y Wrote: [\[CITE\]](#) I accidently updated my Iphone 3gs to V 4.3.3(8J2) Baseband : 05.16.02

and now it became shit :|

i can't play games :(

will your this Tuto work ?

Tx

Yes, You can use this tutorial to jailbreak

Are you using the latest version for 4.3.3? And is it getting stuck on your device, or on the computer? I forgot what step that is.

b0lt - May 16, 2011, 3:34 pm

Bookmarked! :) Im gonna buy an Ipod and try this out!

goligautham - May 17, 2011, 12:39 am

hey the redsn0w for 4.3.1 windows download link is not working.

Damn I need it so badly.

Anthony please help.

AnthonyWasH3r3 - May 17, 2011, 2:12 am

New link;

dismayed - May 19, 2011, 1:09 am

thanks a ton, it finely can play 3rd party programs :D I used Po1son and that fucked up my iPod (My iPod didn't turn on >:|) I had to do a whole recovery to fix it. And came along to this. Worked like a charm (Worked the first time too) One question? How do I get rid of it when I sell it or something or I dont want it any more? do I do a whole formate in the iPod? Just asking

Edit: I used a 2G iPod and worked great if people wanna know if it works

AnthonyWasH3r3 - May 19, 2011, 1:49 pm

Yeah, greenpois0n doesn't work for 2G iPod. Glad it worked for you man. Usually it being jailbroken wouldn't reduce the price, but if the buyers don't want it, then all you have to do is restore (reformat) it.

Alhaji - May 21, 2011, 7:47 am

hey what's the difference between tethered and untethered?

I'm new to all of this :(

AnthonyWasH3r3 - May 21, 2011, 7:55 am

Tethered means you have to plug it into the computer and "rejailbreak" (in a sense) everytime the idevice turns off. Untethered works normally and is what you want.

Delta - May 21, 2011, 7:57 am

Awesome guide thanks so much!!

AnthonyWasH3r3 - May 21, 2011, 8:37 am

(May 21, 2011 07:57 AM)Delta Wrote: [\[CITE\]](#) Awesome guide thanks so much!!
No problem! glad it helps

AnthonyWasH3r3 - May 25, 2011, 6:43 pm

This thread needs to come back up.

my3rdball - May 30, 2011, 10:11 pm

links down for redsnow :F i tihnk

AnthonyWasH3r3 - May 30, 2011, 10:18 pm

Sorry about that, please use this one. <http://www.#/?d=3QMQ6ROO>

2buckz - May 31, 2011, 6:05 pm

Doing this now - building your IPSW takes forever.

DeadOwnage - June 6, 2011, 9:07 pm

Every Time I Select MY IPSW in redsn0w it gives me an error about unable to recognize it.

AnthonyWasH3r3 - June 7, 2011, 5:14 am

Make sure you select the 4.3.1-3 ipsw.

ElasticWeed - June 7, 2011, 6:25 am

FINAL EDIT: Found the problem, You have messed up the download links >.>

I have gotten the latest version (rc16) and have re-uploaded it [HERE](#), enjoy :).

AnthonyWasH3r3 - June 7, 2011, 8:38 am

Sorry. I'll try to fix that when I get home. The official ones went down and I tried to find more official ones but I guess I mixed them up.

I'm out! - June 13, 2011, 8:38 am

Uh, lol..

Currently, trying to jailbreak, iPod touch 4G 4.3.3

Kinda confused about the already checked box "Enable Battery Percentage"

Updated**

Solved. Officially jailbroken, my iPod touch 4G Firmware 4.3.3 ;)

tfnaq - June 13, 2011, 2:36 pm

thanks man!

nice tutorial

AnthonyWasH3r3 - June 13, 2011, 3:56 pm

No problem guys (:
Glad it helped.

Baws - June 13, 2011, 6:27 pm

Thanks bro, just jailbroke my shit again. :)

OreosS - June 15, 2011, 4:32 pm

Um i cant find my .ispw i have looked in the apple computer folder but i cant seem to find it. There is just nothing there. Mind helping me please?

Nvm :/ found it...

Trybbox - June 16, 2011, 8:04 am

Thanks, worked fine on 3gs 8GB :)

Lil Herb - June 16, 2011, 8:11 am

I'm having problems with mine my button is 2 hard to press and its quite hard :(any ideas of what I should do.

What Does ™ Mean? - June 16, 2011, 8:14 am

FINALLY?? There's been a JB for 4.3.3 for weeks now! (no offense)

AnthonyWasH3r3 - June 16, 2011, 3:13 pm

(Jun 16, 2011 08:11 AM)Charlie Sheen Wrote: [\[CITE\]](#) I'm having problems with mine my button is 2 hard to press and its quite hard :(any ideas of what I should do.

I'm not sure what you can do there. There might be programs to force it into DFU mode, but I'm not sure.

(Jun 16, 2011 08:14 AM)What Does ™ Mean? Wrote: [\[CITE\]](#) FINALLY?? There's been a JB for 4.3.3 for weeks now! (no offense)

No offense, but in case you can't really tell by the thousands of views, hundreds of posts, and the date when this was made, this isn't a relatively new thread.

+Pirate - June 17, 2011, 5:48 pm

Ok, im a Noob at jailbreaking... What does the ISPW's do?

Im on 4.3.3 on iPod touch

ISPW's are apples firmware file.

MaxPain - June 18, 2011, 6:19 am

Guys can I fix the thing that when I shutdown my iPod I can recover it back without having to connect it on my computer??

187Cold - June 18, 2011, 7:52 am

(Apr 3, 2011 10:54 PM)AnthonyWash3r3 Wrote: [\[CITE\]](#) Hello HF! The wait is finally over, there is now an untethered jailbreak for 4.3.1, 4.3.2, and 4.3.3 for the iPhone 3GS/4, iPod 4G/3G, and iPad 1G, AppleTV 2G!

(Note: This guide was written for 4.3.1 but it works exactly the same for 4.3.2 and 4.3.3)

If you ran a tethered version, you can just run the untethered version right over it without restoring.

Please visit [The Dev Team Blog](#) for more information.

VIDEO:

<http://www.youtube.com/watch?v=fg71umK6sPs> -Same method for 4.3.1/4.3.2/4.3.3

Before We Begin

-Backup your iDevice with iTunes.

-If you are using windows 7, you may need to run it in windows xp sp2

-If you are on 4.3 or anything else below, upgrade to 4.3.1 or 4.3.2 first

Required Downloads

4.3.1

-RedSn0w [\[Win\]](#)[\[Mac\]](#)

-Or PwnageTool for Mac [\[Torrent Link Download\]](#)

4.3.2

RedSn0w [\[Win\]](#) [\[Mac\]](#)

-Or PwnageTool [\[Torrent Link Download\]](#)

4.3.3

-RedSn0w[\[Win\]](#)[\[Mac\]](#)

-Or PwnageTool [\[Torrent Link Download\]](#)

IPSW's

-4.3.1/4.3.2/4.3.3 IPSW for your iDevice: [LIST](#)

(If the link is down for the IPSWs then click the spoiler)

Spoiler [\(Click to View\)](#) You can either google it and download from another site, or you can download 4.3.2 from iTunes and then find it in these folders, depending on the OS:

You can either use RedSn0w, or PwnageTool.

Step 1-Redsn0w

-Open RedSn0w

-Select your IPSW

-Click next while it loads the jailbreak

Step 2

-Check your options

-Click next

Spoiler [\(Click to View\)](#)

[img]http://img12.imageshack.us/img12/8937/screenshot20110404at123.png[/img]

Step 3

- Get your iDevice ready and click next
- Follow the on screen instructions

Spoiler ([Click to View](#))

[img]http://img28.imageshack.us/img28/8937/screenshot20110404at123.png[/img]

[img]http://img543.imageshack.us/img543/8937/screenshot20110404at123.png[/img]

Step 4

- Wait :P

Step 5

- When your device turns back on, you should see Cydia!

Step 1-PwnageTool

- Open PwnageTool
- Select Expert Mode
- Select your iDevice

Spoiler ([Click to View](#))

[img]http://img829.imageshack.us/img829/115/screenshot20110404at122.png[/img]

Step 2

- Browse for IPSW
- Select your options
- Build your IPSW

Spoiler ([Click to View](#))

[img]http://img195.imageshack.us/img195/115/screenshot20110404at122.png[/img]

[img]http://img860.imageshack.us/img860/115/screenshot20110404at122.png[/img]

Step 3

- Connect Device to USB and follow the instructions

Spoiler ([Click to View](#))

[img]http://img545.imageshack.us/img545/8937/screenshot20110404at123.png[/img]

Step 4

- Look through some helpful iPhone guides while you wait :P

Step 5

- If all goes well, you should see Cydia somewhere on your springboard!

? Congratulations, you now have an untethered jailbroken 4.3/4.3.1 iDevice!?

If this tutorial has helped you, or you are having some problems with this, post below

its guys like you that does so the TUT looks so hard!

its so easy to jailbreak i had jailbroken my iphone almost when the jailbreak came out almost 2 months ago. Download redsn0w and just follow the steps too easy. google it

AnthonyWasH3r3 - June 18, 2011, 8:03 pm

Yeah, that would be a tethered jailbreak. This is untethered so you won't have that problem.

Baws - June 20, 2011, 10:41 pm

Fuck! Well I just moved to my cousin's place for couple days and I didn't bring my laptop..And I restored my fucking iPod but on this laptop when I download the firmware and extract it it's a folder and not a file i can click on on redsnow. Any ideas?

linuxminux - June 20, 2011, 11:26 pm

Thanks for this tutorial going do this when i get home

sometimes it doesn't download all the way or it's incomplete.

Also, I think firefox or IE makes it a rar/zip but you can just change the extension if it's the right size.

Glad you got it working.

iSmile - July 3, 2011, 12:47 pm

hmm i dont get it.

Now i have downloaded it, installed it on my ipod (so its jailbroken now).

But now I would like to get into the app store, to get something, but it asks me to pay..

Did i something wrong?

No, that's unrelated to the jailbreak.

Just download that app with installous.
