Change your IDE colors

Alright, I've seen a lot of people asking how you can change such things as the background for your code and the code's color itself. Well in this tutorial I will show you how.

Note: this does not change anything with the actual form.

1.) Click "Tools" and then click "Options" like so:

2.) Under "Environment," click "Fonts and Colors"

3.) Now you change your colors for syntax highlighting.

I made an ugly example :D

And here I labeled some of the values, if you wanted to find them faster.

Thanks for reading.

Thanks to h4yR0 for this link: <http://studiostyl.es/>

Where you can download many other themes for VS.
