Thread: Seeking Guidance on Developing an "Unlock All" Tool

Lukas555 - *May 16, 2024, 11:07 am*

Hi everyone,

I'm interested in learning how to develop an "unlock all" tool for warzone/CoD similar to the one demonstrated on the youtube channel "@unlockallnews". If anyone has experience in creating such tools or can point me toward resources or tutorials that cover this specific type of cheat development, I would greatly appreciate your help.

What I'm Looking For:
Detailed guidance or tutorials on developing "unlock all" tools.
Recommended resources or courses that cover similar topics.
Advice from experienced developers on the best practices and potential pitfalls in this area.
My Background:
I have basic programming skills in languages like C++ and Python.
Familiar with general hacking concepts but new to cheat development.

Thank you in advance for any assistance you can provide!

Best,

For game hacking in general take a step back and watch through the video playlist on Youtube by guided hacking. It is called "start here" and should teach all the basics. Modern games are almost all anti cheat protected though... you will have a steep learning curve before you until you can tackle these.

Best,
thank you for the reply. But what youtube video do you mean?

He's talking about Guided Hacking Youtube channel. There is a lot of videos on there that go indepth over game hacking, specifically playlists labelled for newbies. First one has 20+ videos just to start with basics.
